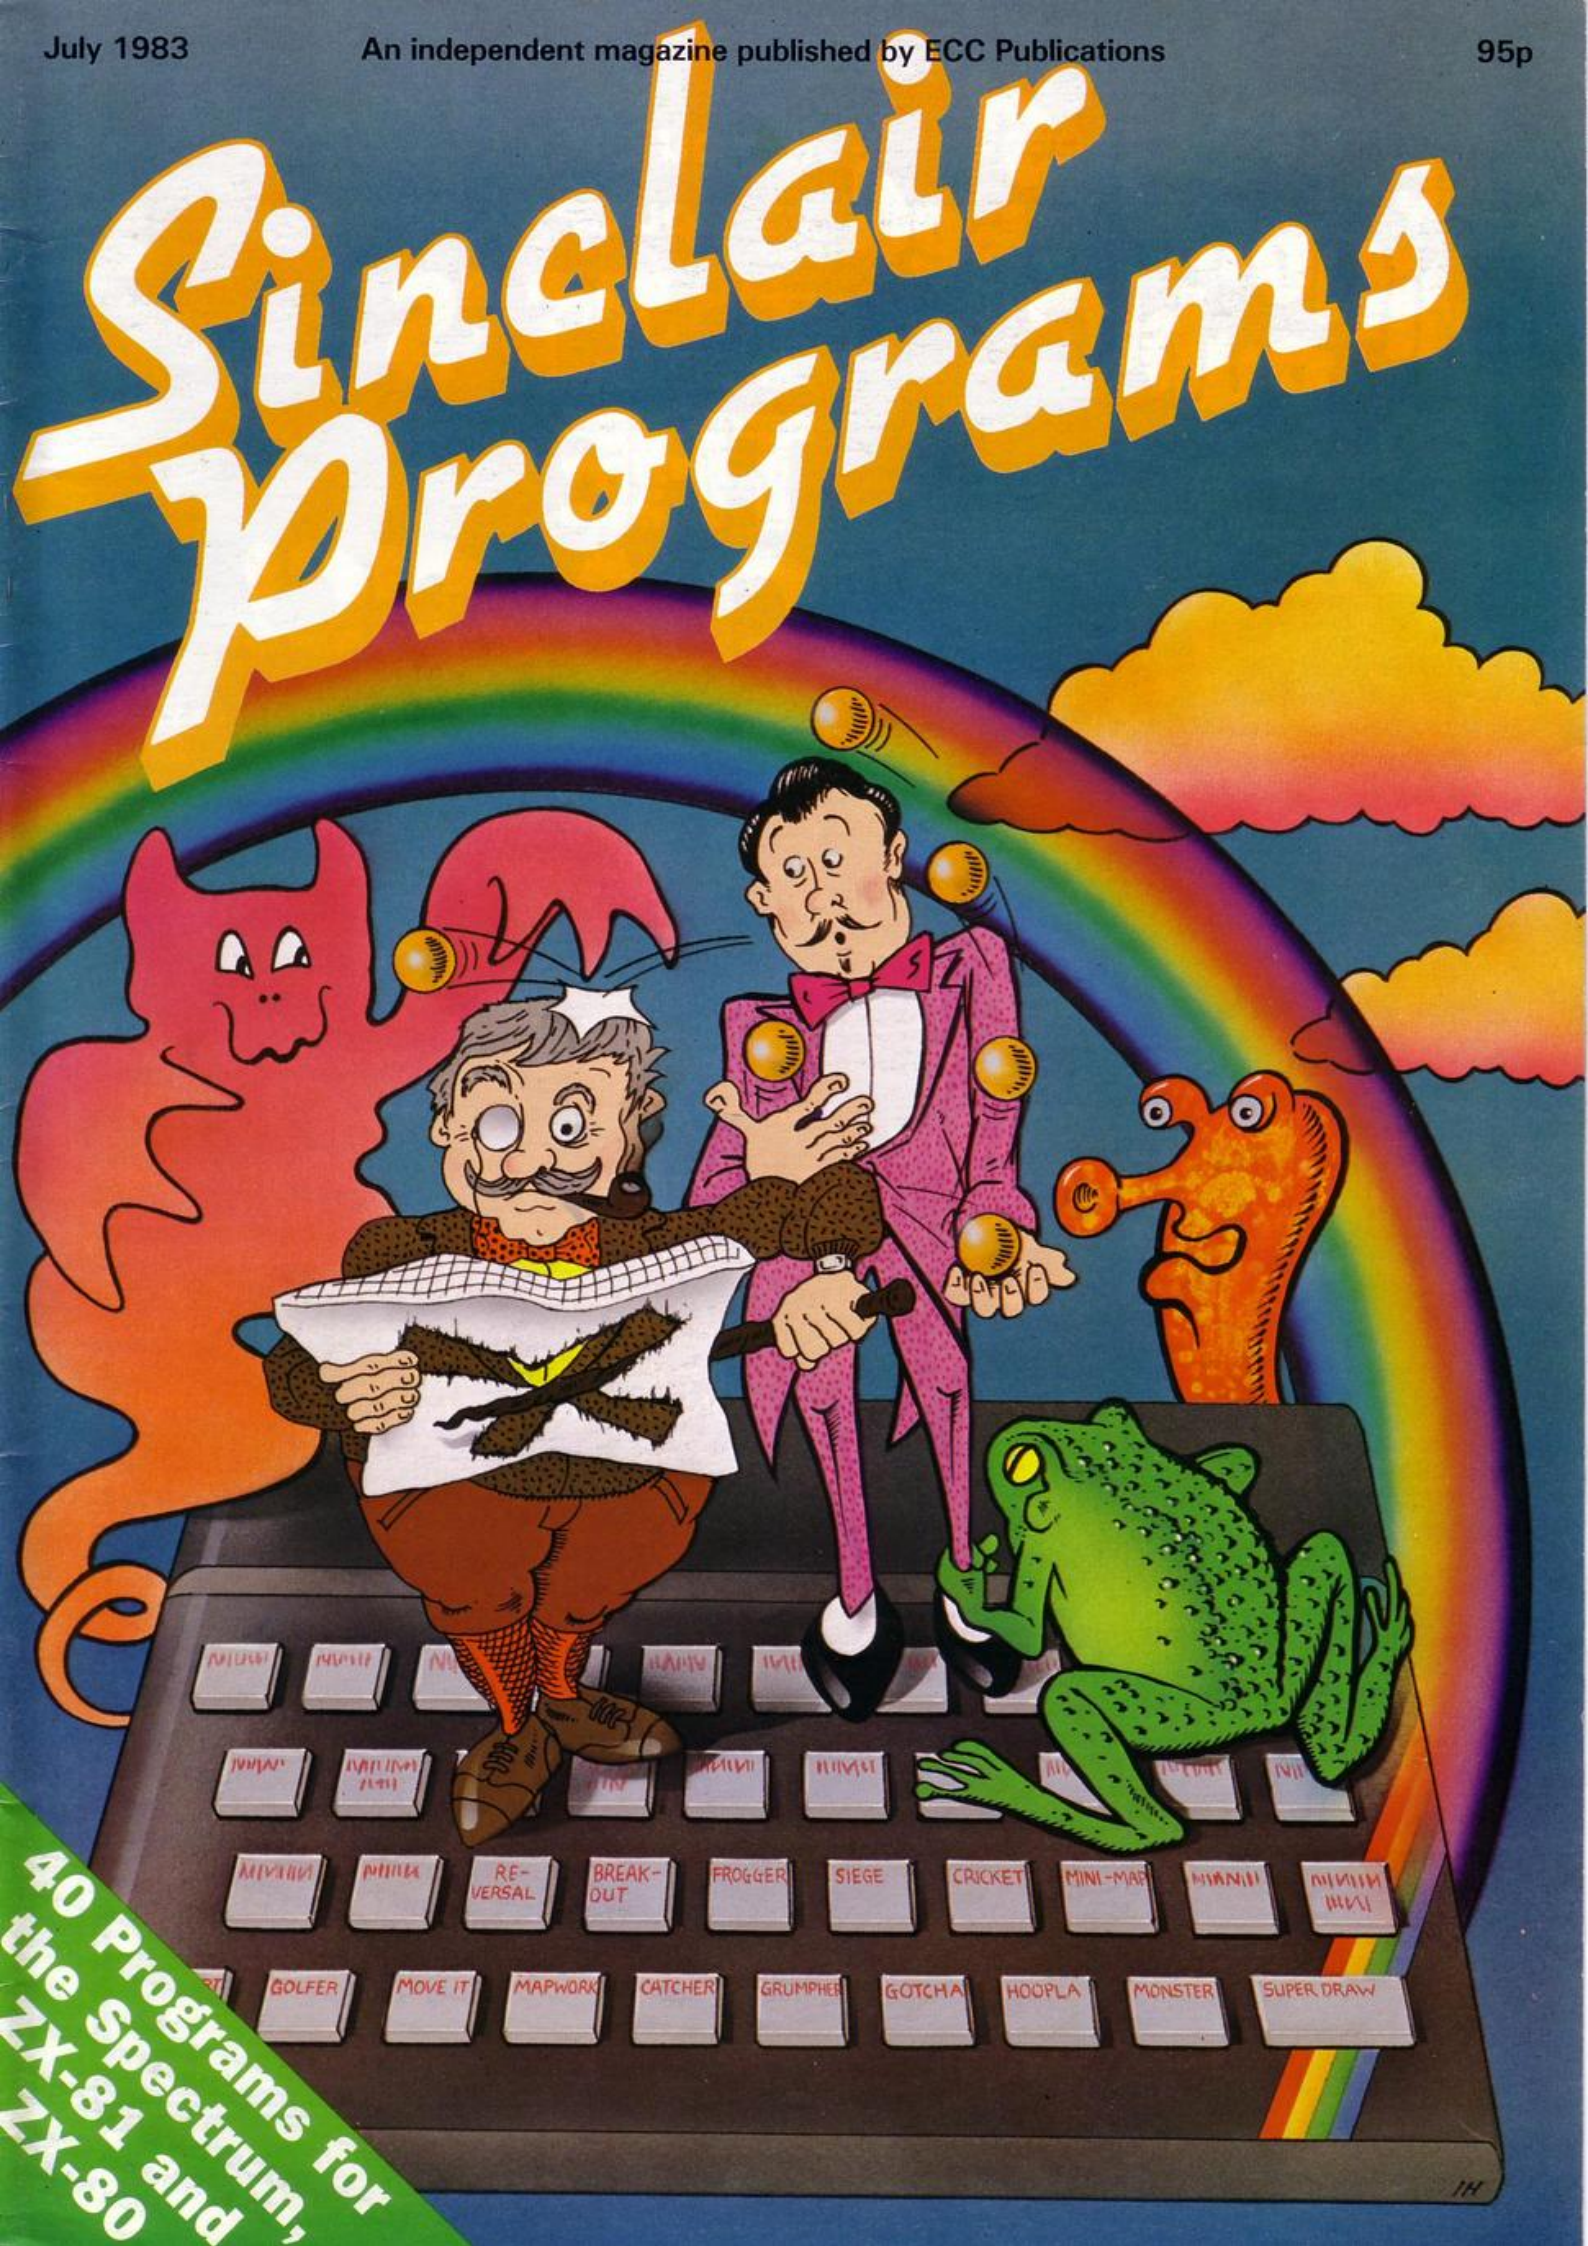
Sinclair Programs



40 Programs for the Spectrum, ZX-81 and ZX-80

Second Edition Just Published

If you only buy ONE computing book

THIS IS THE CLASSIC!

An entertaining, but **thorough** reference source with the most readable, comprehensive glossary you'll find anywhere. The Good Computing Book for Beginners is an essential A-Z of all the facts you need to know about computing — and none you don't!

Whether you're brand new to computing, or an old hand keen to stay ahead, you'll score by keeping this classic, top-selling book within reach to use again and again.

The author, Dennis Jarrett, is a successful journalist who was also founder editor of Which Computer? magazine — so his first edition quickly became a standard work. Now this new, substantially enlarged and revised edition covers the latest trends, terms and technology with the relevant facts — and ONLY the relevant facts — in **plain English.**

Here's another fact you'll find fascinating: it will only cost you £2.95!

Use the coupon below to get your copy right away — or buy it soon from your bookshop. It's the **one** book you'll turn to again and again.

Please send me____ copy(ies) of The Good Computing Book for Beginners by Dennis Jarrett at £2.95 each plus 50p post and packing. I enclose a cheque for____ / Please debit my credit card account Visa/Access/Diners/Amex number____

Cover Design/Illustrations
Ivan Hissey

To help with entering graphics characters we have adopted a system of writing the characters for the ZX-81. We indicate inverse characters by the letter i and graphics by g, so that an inverse letter W is shown as iW and the graphics character on key 6 is denoted by g6.

Spaces are shown by sp and inverse spaces are isp. If some occur together, for instance a row of six spaces, they are shown by 6*sp and where there is a combination of characters each one is divided by a colon, thus sp:isp:6*g6 means a space followed by an inverse space and then six characters on the 6 key.

Where whole words are written in inverse letters they appear in the listings as lower-case letters.

In the Spectrum listings, letters to be entered in graphics mode are underlined, while other graphics instructions are underlined and take the form shown above, with the addition that inverse graphics characters are represented by the letters "ig".

ZX KEYBOARD FOR USE WITH/81 SPECTRUM

Our new cased keyboard has 52 keys, 12 of these are used for the numeric pad. The numeric pad offers some useful features, you can cursor with one hand and it will be a boon for anyone who enters a lot of numeric data. The pad is a repeat of the 1-9 keys plus it has a full stop and a shift key. The numeric pad keys are coloured in red, the normal keyboard keys are grey, with the case being black which makes the whole thing very attractive. The case measures 15 x 9 x 2½. The computer (either 80/81 or spectrum) fits neatly inside. You will have to remove the computer from its original case, it is then screwed to the base of the case. The case had all the bosses already fitted and the screw holes are marked. Also fitted inside the case is a mother board (81 model only) which allows 16K, 32K and 64K to be fitted in the case. All the connections are at the rear of the case i.e. Power, Mic, Ear, T.V. and the expansion port. The case is large enough for other add ons also to be fitted inside. One of these could be the power supply, then you could very quickly fit a mains switch, or a switch on the 9V line. This means you have a very smart self-contained unit. This case does not stop you from using any other add-ons that you may have e.g. Printer etc. We are convinced that this is the best keyboard available at present. It offers more keys and features than any other keyboard in its price range.

£45

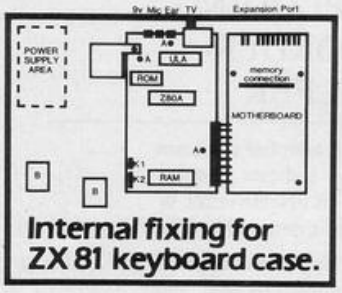
KEYBOARD (SPECTRUM/81)

NOTE

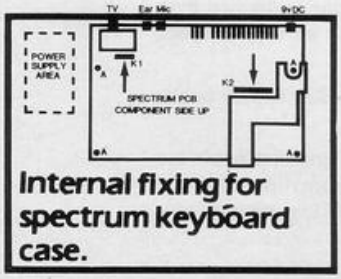
The case can be purchased separately with the keyboard aperture uncut, so if you have one of our early uncased keyboards, or in fact any other suppliers' keyboards, these could be fitted. The keyboard is connected to your computer by a ribbon cable and this has connectors fitted which simply push into the Sinclair connectors. It is a simple two minute job and requires no electronic skills. This keyboard does not need any soldering. Please specify on order whether you require the ZX 81 or Spectrum case.

SPECTRUM MODEL

This is supplied with spectrum legends, and a slightly different base for fitting the spectrum inside, again all the connectors are at the rear of the case and there is plenty of room for the power supply (and other add-ons). Should you want to change, we can supply both the Spectrum legends and details of updating your case which will enable modification from the ZX 81 to spectrum. PLEASE specify on your order whether you require the ZX 81 or spectrum case.



Internal fixing for ZX 81 keyboard case.



Internal fixing for spectrum keyboard case.

SPECTRUM LIGHT PEN

The pen enables you to produce high resolution drawings on your own television set, saving a vast amount of time over using basic programming statements, such as Plot, Draw etc. You can erase, modify and save drawings and it comes complete with software program. The superb light pen is available from D.K. tronics.

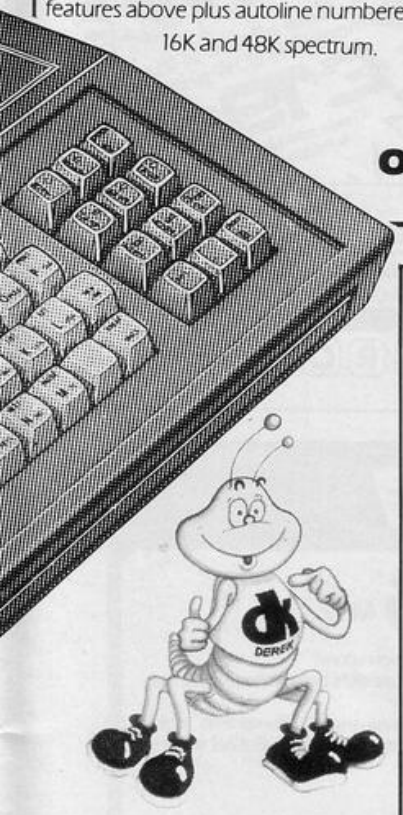
ZX 80~81 Spectrum HARDWARE

SPECTRUM/81 TOOLKIT

This is the toolkit which won acclaim in the feature in the August 1982 issue (pages 29 and 30) of Sinclair User, "It is the most impressive program, fast in execution with clear and full instructions...it stands out from the rest of the field." The ZXED is a powerful editor for use on the expanded ZX81. It is intended for use by the serious BASIC programmer and offers several useful and time saving features most helpful during all stages of program development. The facilities provided are as follows: ALTER, BYTES, COPY, DELETE, FIND, HELP, INSERT, KEEP, MOVE, RENUMBER AND VERIFY. The Spectrum Toolkit contains most of the features above plus autoline numberer and append, and will run in the 16K and 48K spectrum.



Both at only £6.95

4K GRAPHICS ROM £24.95

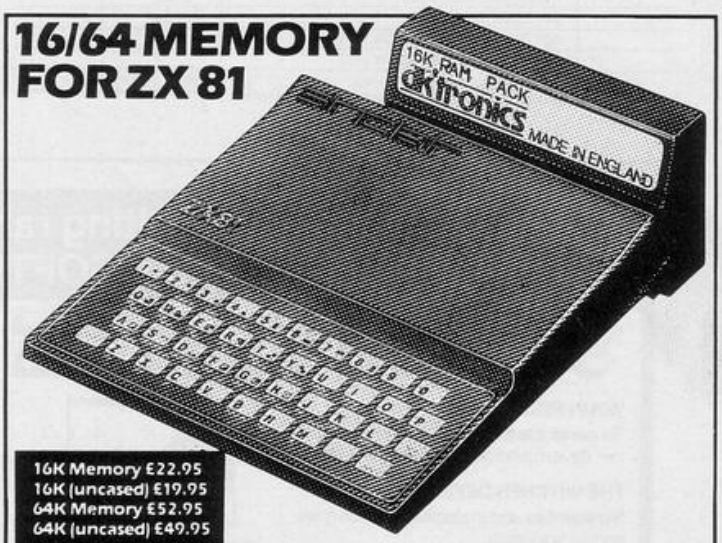
The DK Graphic module is our latest ZX 81 accessory. This module unlike most other accessories fits neatly inside your computer under the keyboard. The module comes ready built, fully tested and complete with a 4K graphic ROM. This will give you an unbelievable 448 extra pre-programmed graphics, your normal graphic set contains only 64. This means that you now have 512 graphics and with their inverse 1024. This now turns the 81 into a very powerful computer with a graphic set rarely found on larger more expensive machines. In the ROM are lower case letters, bombs, bullets, rockets, tanks, a complete set of invaders graphics and that only accounts for about 50 of them, there are still about 400 left (that may give you an idea as to the scope of the new ROM). However, the module does not finish there, it also has a spare holder on the board which will accept a further 4K of ROM/RAM. This holder can be fitted with a 1K/2K/RAM and can be used for user definable graphics so you can create your own custom character sets.

WHY WAIT?
ORDER TODAY FOR FAST DELIVERY

FLEXIBLE RIBBON CONNECTOR

If you have ever had whiteouts or system crashes this could be the answer. It stops the movement between the computer and the RAM expansion, it is supplied with a ribbon, 6 inches long, with a male connector at one end and a female at the other, at only **£10**

16/64 MEMORY FOR ZX 81



16K Memory £22.95
16K (uncased) £19.95
64K Memory £52.95
64K (uncased) £49.95

The above illustration shows the casing for the 16K or massive 64K.

nsion £22.95
ynamic Ram Chips. We use the dynamic as they are much denser than by less space. They are also much cheaper than the equivalent product . The Ram is manufactured with high quality materials, and uses high ms. It is supplied ready-built and only needs to be plugged into the rear of he components are fitted into holders. This massive add-on memory fully assembled and tested is the cheapest 16K memory available anywhere emory from 16384 to 32768. (Same as the Sinclair memory.)

16K (UNCASED) £19.95

nsion £52.95
ation on the 16K also applies to the 64K Memory Expansion, but the 64K giving nearly FOUR times the memory. This advanced model has ry. In addition, the block from 8K to 16K can be switched out to enable ons. The graphics ROM is to be used in this area. Position in Memory: ck From 8192-16384 is switchable.

64K (UNCASED) £49.95

Expansion MK1 £35.00, MKII £30.00.
um to 48K of user Ram. The Spectrum memory expansion is simple to fit, ide the case, and then only requires plugging in. Full fitting instructions e only tool you will need is a screwdriver and just two minutes of your ires no electronic skills. Position in memory from 32768 to 65536. (The grade to 48K).

Please state type of machine, which Rom memory size, quantity and place when ordering.

THE MICRO POWER SPECTRUM 'ADD-ON'

Bring 'JOY' to your Joysticks!!
Make your beeps BEEP!!
Create Multi-Channel Sound Effects!!

BLADAMM! BOOM

The new Spectrum Add-On gives you:
- ONE Atari/Commodore type Joystick Port
- TWO Potentiometer Joystick Ports
- Amplification of the standard sound output
- THREE-CHANNEL, PROCESSOR INDEPENDENT, PROGRAMMABLE SOUNDS — music, gun-shots, explosions etc
- Demonstration tape and full operating instructions

Note: The 'Add-On' simply plugs straight onto the back of your Spectrum.
No soldering required.

Now offered at the incredibly LOW price of **£19·95** Incl. VAT
(Please add 55p Post & Packing).

MICROPOWER MICROPOWER MICROPOWER MICROPOWER MICROPOWER MICROPOWER

An Exciting range for 16K ZX81 from SOFTWARE FARM

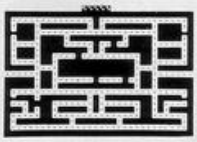
SUPER SCRAMBLE

YOUR MISSION
To penetrate the witches defences, enter her cavern and destroy her wicked heart.

THE WITCHES DEFENCES
Stalagmites and stalactites - which grow across your path.
Volcanoes - to get past alive - if you can!
Vampire Bats - that cling to your ship and make controls sluggish
Cave-ins - should you hit the side of the cave with your Laser Cannon or Bomb, part of the roof will cave in on you

- Written entirely in machine code
- Hall of Fame
- 1 or 2 players
- Mystery score positions to bomb
- 5 skill levels

GOBBLERS Mk 2



Beat that high score!
Gobble those dots before those meanies gobble you!
Your only aids are four 'Power Pills' which make the meanies edible. But not for long!

- Machine coded for fast action
- Extra 'Gobbler' for 10,000 points
- On screen scoring
- High score with enter name facility
- Up to 4 players

Improved Mk 2 version!

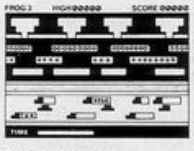
ASTEROIDS

Stay alive as long as possible in open space filled with flying rocks. Score by shooting them - which also causes them to break into lots of little bits and makes life even worse!

- Machine coded for fast action
- On screen scoring
- High score with enter name facility
- Up to 4 players
- Extra ship for 1,000 points (not as easy as it sounds!)
- Ship moves just like arcade version
- Rotate left/rotate right/thrust
- Fires in all 8 directions
- Increasing number of asteroids
- Three asteroid sizes
- alien spaceship (fires back!)

All games £5.95 each

NEW! FROG HOPPER



Jump your frog over the lanes in the road - preferably without being turned into jam by the approaching traffic! Then cross the river by hitching a few rides on some passing logs and finally into the safety of your hole on the opposite bank. Once all 'Frog Holes' have been filled you start again with a different pattern and a bonus frog.

- 50 Skill levels!
- Played against the clock - froggie only has a short while to live!

when more than one game purchased deduct £1.00 from each tape!

Send your order to:
Dept SP2, THE SOFTWARE FARM, Craigo Farm, Botany Bay, Tintern, Gwent

NUMBER CRUNCHER

IN A FIELD surrounded by fences and hedges, the object is for you to hit the numbers one to nine, in numerical order, as quickly as possible. If you hit a fence or hedge you bounce back into the field.

Number Cruncher was written for the 16K ZX-81 by Allan Jarvis of Cottingham, North Humberside.

SIMULTANEOUS EQUATIONS

PROGRAMS for the ZX-80 are becoming few and far between, while good-quality programs for the 16K ZX-81 and Spectrum are increasing rapidly in number. Therefore we were pleased to receive **Simultaneous Equations,** which was written by Mike Davies of Llandeilo, Dyfed for the ZX-80 to help him while working for his mathematics O level.

Enter each of the co-efficients A, B, C, D, E and F, followed by NEW-LINE, and the computer will solve the equation.

```
  1 CLS
  2 PRINT " SIMULTANEOUS EQUATI
ONS  SOLVER"

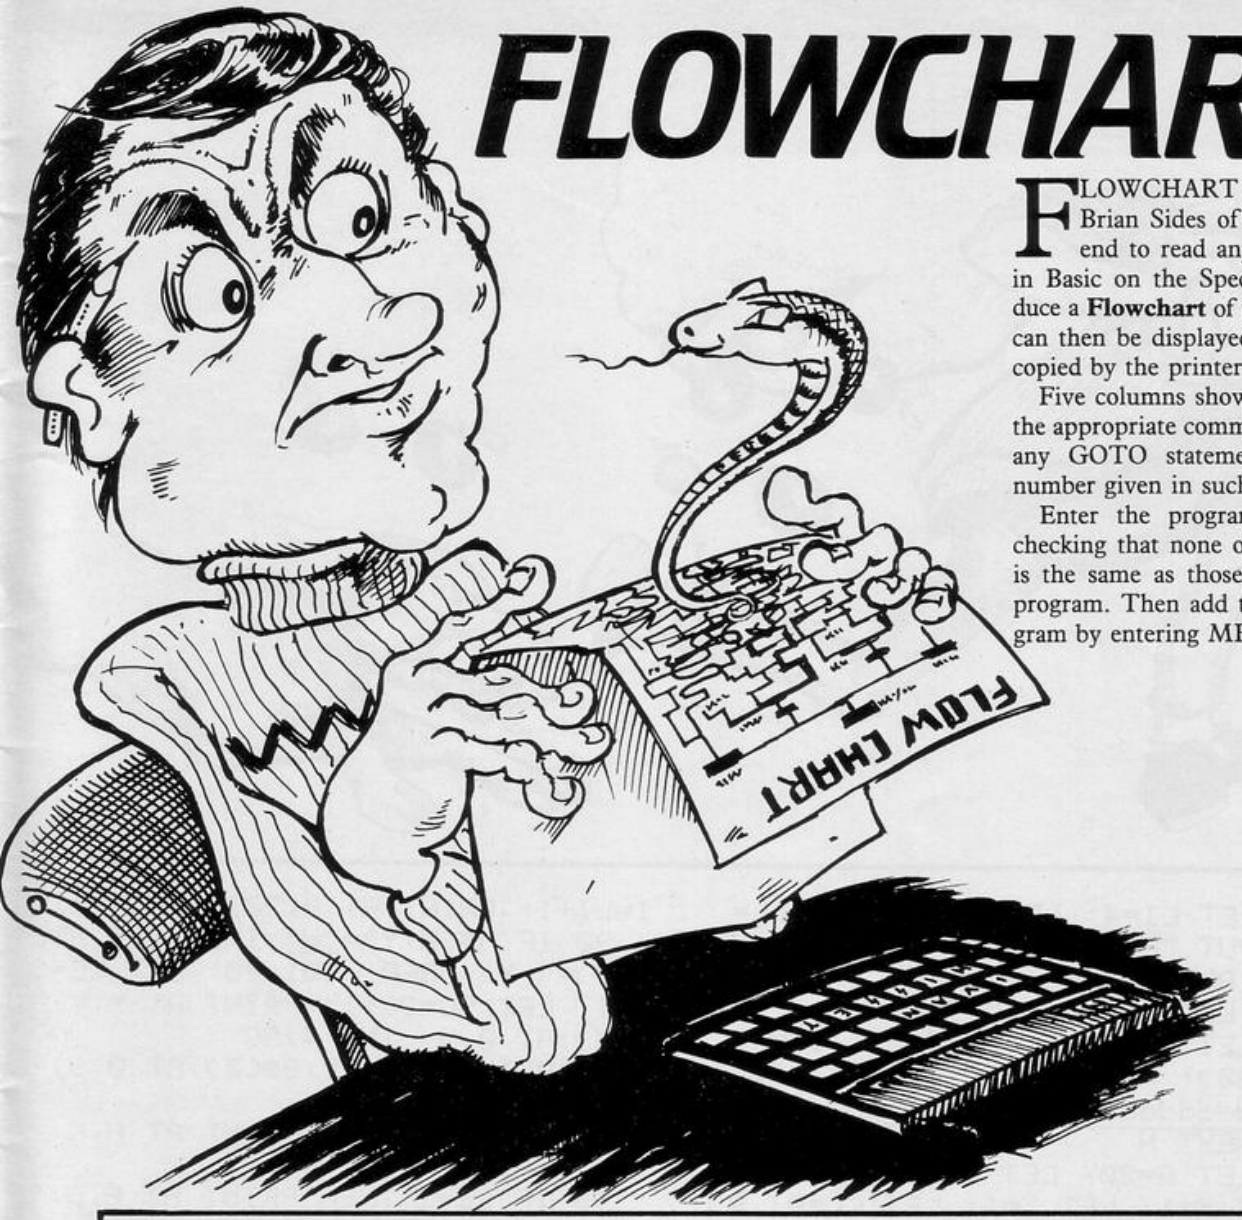
```

FLOWCHART



FLOWCHART was written by Brian Sides of Cefn-Glas, Bridgend to read any program written in Basic on the Spectrum and to produce a **Flowchart** of that program. That can then be displayed on the screen or copied by the printer.

Five columns show the line number, the appropriate command, the flow box, any GOTO statement, and the line number given in such a statement.

Enter the program to be charted, checking that none of its line numbers is the same as those in the Flowchart program. Then add the Flowchart program by entering MERGE " ".

YOU ARE an **Apple Thief,** prowling around an orchard collecting as many apples as possible before the irate farmer catches you. You and the farmer can move horizontally, vertically and diagonally. You have an advantage over the farmer because you are small enough to crawl under the fence. Also if you eat one of the magic apples you gain a life.

The program was written for the 16K Spectrum by Tat Tang of Aylesbury, Buckinghamshire.

LACE MAKER

POLLY BROWN of Charlesworth, Cheshire wrote **Lace Maker** to generate patterns for use as design charts for punch-lace or Fair Isle work on domestic knitting machines. She adds that it would also be suitable for those designing filet crochet.

The program first requests the number of stitches in each pattern repeat — 6, 8 or 12 for the more popular makes of knitting machine — followed by the number of rows required. Lace Maker can cope with any stitch repeat between 4 and 16, and any number of rows between 4 and 20. (16K ZX-81).

PROGRAMS BASED on various symbols scrolling up the screen are submitted frequently for review. D Basson and J Robery of Wickford, Essex have taken the idea and used it in a slightly unusual way in **Black Hole Destroyer.**

Black holes move up the screen and you must run into as many of them as possible before your fuel runs out. Move using keys 5 and 8. (16K ZX-81).

ALPHABET TIMER

THIS SHORT program, **Alphabet Timer,** was written by P Fisher of Newton Heath, Manchester for the 16K ZX-81 to help those who are not yet familiar with the QWERTY keyboard.

Once the word 'GO' is displayed, you must type-in the entire alphabet, in order, as quickly as possible. The computer will then give you a score in its own time units. The fastest time achieved in the *Sinclair Programs* office was 179 units.

ORWIN SOFTWARE: ZX81 CASSETTES

THE BEST SOFTWARE (BY VARIOUS AUTHORS) AT LOW PRICES

"Michael Orwin's £5 Cassette Two is very good value. It contains 10 stolid well designed games which work, offer plenty of variety and choice, and are fun."

Your Computer, May '82

"Michael Orwin has built a reputation for value-for-money software and his Cassette 4 offers quantity as well as quality."

Sinclair User, October '82

"If each game was on a separate tape and selling for £5 each I would still recommend them. But all on one for £5 . . . ! This sort of value for money just has not been seen before on any personal computer."

"Without sounding pushy I would like to conclude this review by saying — if you have a ZX81 and like games, then you should buy Michael Orwin's cassette 4."

2 extracts from *ZX Computing*, Oct/Nov '82

"Eight games, including an excellent version of the Scramble arcade game, three-dimensional noughts and crosses, dropping bombs on sprouting plants and a western style shoot-out. Easy to operate, graphically impressive and good value for money."

The Times, Saturday 11th December 1982
(*about Cassette 4*)

React, Invaders, Phantom aliens, Maze of death, Planet lander, Bouncing letters, Bug splat.
Basic:
I Ching, Mastermind, Robots, Basic Hangman. PLUS Large screen versions of Invaders and Maze of Death, ready for when you get 16k.
Cassette One costs £3.80

CASSETTE 2

Ten games in Basic for 16k ZX81
Cassette Two contains Reversi, Awari, Laser Bases, Word Mastermind, Rectangles, Crash, Roulette, Pontoon, Penny Shoot and Gun Command.
Cassette Two costs £5.

CASSETTE 3

8 progams for 16k ZX81
STARSHIP TROJAN

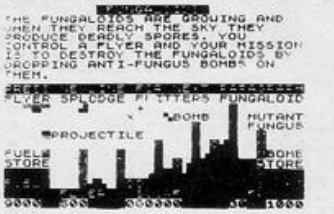
Repair your Starship before disaster strikes. Hazards include asphyxiation, radiation, escaped biological specimens and plunging into a Supernova.
STARTREK This version of the well known space adventure game features variable Klingon mobility, and graphic photon torpedo tracking.
PRINCESS OF KRAAL An adventure game.
BATTLE Strategy game for 1 to 4 players.
KALABRIASZ World's silliest card game, full of pointless complicated rules.
CUBE Rubik Cube simulator, with lots of functions including 'Backstep'.
SECRET MESSAGES This message coding program is very txlp qexi jf.
MARTIAN CRICKET A simple but addictive game (totally unlike Earth cricket) in machine code. The speed is variable, and its top speed is very fast.
Cassette Three costs £5.

CASSETTE 4 **8 games for 16k ZX81**

ZX-SCRAMBLE (machine code) with 3 stages.
Bomb and shoot your way through the fortified caves.

GUNFIGHT (machine code)

INVADERS (machine code)



GALAXY INVADERS (machine code)
Fleets of swooping and diving alien craft to fight off.
SNAKEBITE (machine code)
Eat the snake before it eats you. Variable speed. (very fast at top speed).
LIFE (machine code)
A ZX81 version of the well known game.
3D TIC-TAC-TOE (Basic)
Played on a 4 × 4 × 4 board, this is a game for the brain. It is very hard to beat the computer at it.

7 of the 8 games are in machine code, because this is much faster than Basic. of these games were previously (Some available from J. Steadman). Cassette 4 costs £5.

Please make cheques payable to ORWIN SOFTWARE. Recorded on high quality cassettes, sent by first class post from: ORWIN SOFTWARE, Dept. OSP, 26 Brownlow Road, Willesden, London NW10 9QL.

FROGGY
16K or 48K

SPECTRUM VERSION OF ARCADE GAME WITH FULL ARCADE FEATURES:

★ Fabulous Hi-Res Colour Graphics
★ Authentic Sound Effects + 3 Tunes
★ 3-D Logs, Swimming & Diving Turtles
★ 3 Lanes of Multi-coloured vehicles
★ On-screen Score, Hi-Score, Time-bar
★ Snake, Alligators and Baby Frog
★ 'Top 5' High-Score initials table
★ Demonstration Game routine

Your home-sick frog must leap across a busy main road, then onto logs and turtles in the river to reach safety of the river-bank frog-homes. THIS MACHINE-CODE GAME MUST BE SEEN TO BE BELEIVED!!

ONLY £5.95 INC. P & P

For SPECTRUM 48K or ZX81 16K

You are an Allied POW in the infamous **Castle Colditz,** Nazi fortress jail for Allied prisoners-of-war! Can you escape with your life through the vast labyrinth of rooms to the main gate? Tackle brutal **Gestapo** and **SS** guards, savage guard-dogs, traps and pitfalls! Survive if you can the **Corridor of Rats,** the **Tunnel of Poisonous Spiders,** the **Vault of Human Bones** and many more! And on your way, grab all the fabulous **Nazi loot** you can carry!

- ***Classic adventure games** — no random alterations!
- ***Fast, powerful machine-code** response to your commands!
- *''Save-game'' facility and (you'll need it!)

Hours (weeks?) (months?) of enjoyment!

For ZX81 with 16K RAM £4.95
For 48K SPECTRUM £5.95

Price includes ready-to-load cassette with library case and inlay, full instructions, postage and packing. Order today! Money refunded if not delighted!

Send cash, P.O. or cheque to:

THE WIZARD'S WARRIORS: A fast moving game that matches developments in your skill as a player by becoming increasingly more devious. By offering to you the full range of options you can choose how to control your warrior through the maze. A full implementation of this program enables such features as a continuous series of sound effects, arcade quality graphics, double-point scoring, and--for the very artful --bonus lives. **Spectrum £4.95**

FORTH: A full implementation. Ideal for writing fast moving arcade type games. Allows the full colour and sound facilities of the Spectrum to be used. Future Microdrive enhancements will be made available. **Spectrum 14.95**

ADVENTURE ONE: Features a save game routine as the game can take months to complete. 'a remarkably good version....well worth the money.' ...*Sinclair User*... **ZX81 £5.95**

MAZEMAN: A fast action m/c game that reproduces the spirit of the original. '..is very accurate and fast.' ...*Which Micro?*... **Spectrum £4.95 ZX81 £4.45**

CHESS 1.4: Ten levels of play with this m/c program. Good graphic screen display. 'In a class of it's own.' ...*Your Computer*... **ZX81 £5.95**

INVADERS: Very fast m/c action. Includes mystery ship and increasingly difficult screens. **ZX81 £4.45**

SPECTRUM BOOKS

AVAILABLE THROUGH COMPUTER BOOKSHOPS AND W H SMITH

40 BEST MACHINE CODE ROUTINES FOR THE ZX SPECTRUM £5·95

By Andrew Hewson and John Hardman. This book teaches the beginner all he needs to know in a simple, easy-to-learn form and its an invaluable reference work for the expert too! SECTION A: Three chapters explaining what you need to know about Z80 machine code on the Spectrum. • How to load and save machine code. • How to use the system variables. • How memory is organised. • How program lines are stored. • How to use the stack, the display, the attribute files. • How to call ROM Routines – where they are and what they do. • The structure of Z80 code – plus a valuable glossary. SECTION B: 40 routines including, • Scroll – up, down, side to side by pixel or by character. • Search and replace, token swap, string search. • Rotate character, invert character – horizontally and vertically. • Line renumber – including GOSUBs, GOTOs, RUN etc.

20 BEST PROGRAMS FOR THE ZX SPECTRUM £5·95

By Andrew Hewson. Program titles include: MACHINE CODE EDITOR – Write, modify, extend and load machine code using this all-basic program. No need to use an Assembler when you have this program. INDEX FILE – Learn about fixed length records, save numeric and string information, add to, sort, modify, delete and print your records. Ideal as a computer based filing system. DUCKSHOOT – Learn how to manipulate the attributes file *and* have fun at the same time. GRAPHIX – Construct up to 210 graphics characters with the full on-screen editing facilities, enhance and modify them and recall them later to build a detailed display to save on cassette. SPIROMANIA – A program to stretch your artistic talents, imagination and ingenuity. Draws a limitless variety of curves and spirals. Plus: FOOTBALL, DIGITISER, DIARY and many more.

HIRE ZX81/SPECTRUM PROGRAM TAPES

Make the most of your computer by hiring from the original and still the only software library offering all these features:

- Over 900 tapes stocked, offering more than 120 different programs from 39 suppliers (all with their permission)—many of the best currently advertised, plus some specially commissioned—and the range increases each week!
- Arcade, adventure and simulation games, many business and home utilities, graphics, education...and so much more besides
- Descriptive catalogue helps you make your choice
- **Free** quarterly, illustrated magazine includes tips from a professional programmer, DIY plans, reviews, letters, discount offers—and our **Top 40 Tapes** chart averaged from thousands of members' scores
- Full-time staff offer you a friendly, efficient welcome & service
- A fortnight's hire for just £1 +40p p/p—hire what/when you like
- All tapes guaranteed loadable
- Help given with loading problems (azimuth test tape available) and with marketing members' programs
- You may switch from ZX81 to Spectrum at any time
- Send SAE for details—or join on money-back no-risk approval today

The SINCLAIR OWNERS'
SOFTWARE LIBRARY
Warren Road, Liss, Hants GU33 7DD.

Please send me on money-back approval my magazine, descriptive library catalogue and order form, on the understanding that if I'm not delighted with your service within 28 days you will refund my money in full.

ADDRESS.....

.....

Please enclose cheque/P.O. for £8.50 (year's ZX81 membership)/ £9.50 (Spectrum). Overseas £2 extra in each case. SP

SPECTRUM COMPILER

For both 16K and 48K

Almost any BASIC program can be speeded up, by a factor of up to several hundred times. It will produce machine code which can be located at any address.

Handles nearly all BASIC commands. Some of the features unique to this compiler are:

1. Noise generator (explosions, gunshots)
2. Mini sprite graphics
3. Selected Screen Scrolling
4. Special BEEP commands
5. Special INPUT statement and normal INPUT statement
6. Fill the screen with current attributes, and many more, too numerous to mention

All this for only £7.99 both versions

TAPE COPIER

copies any Spectrum tape if you have sufficient memory for program to be copied £4.00 incl.

We have a number of original machine code games under development, which will use the full HI RES graphics and sound facilities of the compiler. These will be coming shortly.

Send PO/Cheque payable to:

REVERSAL

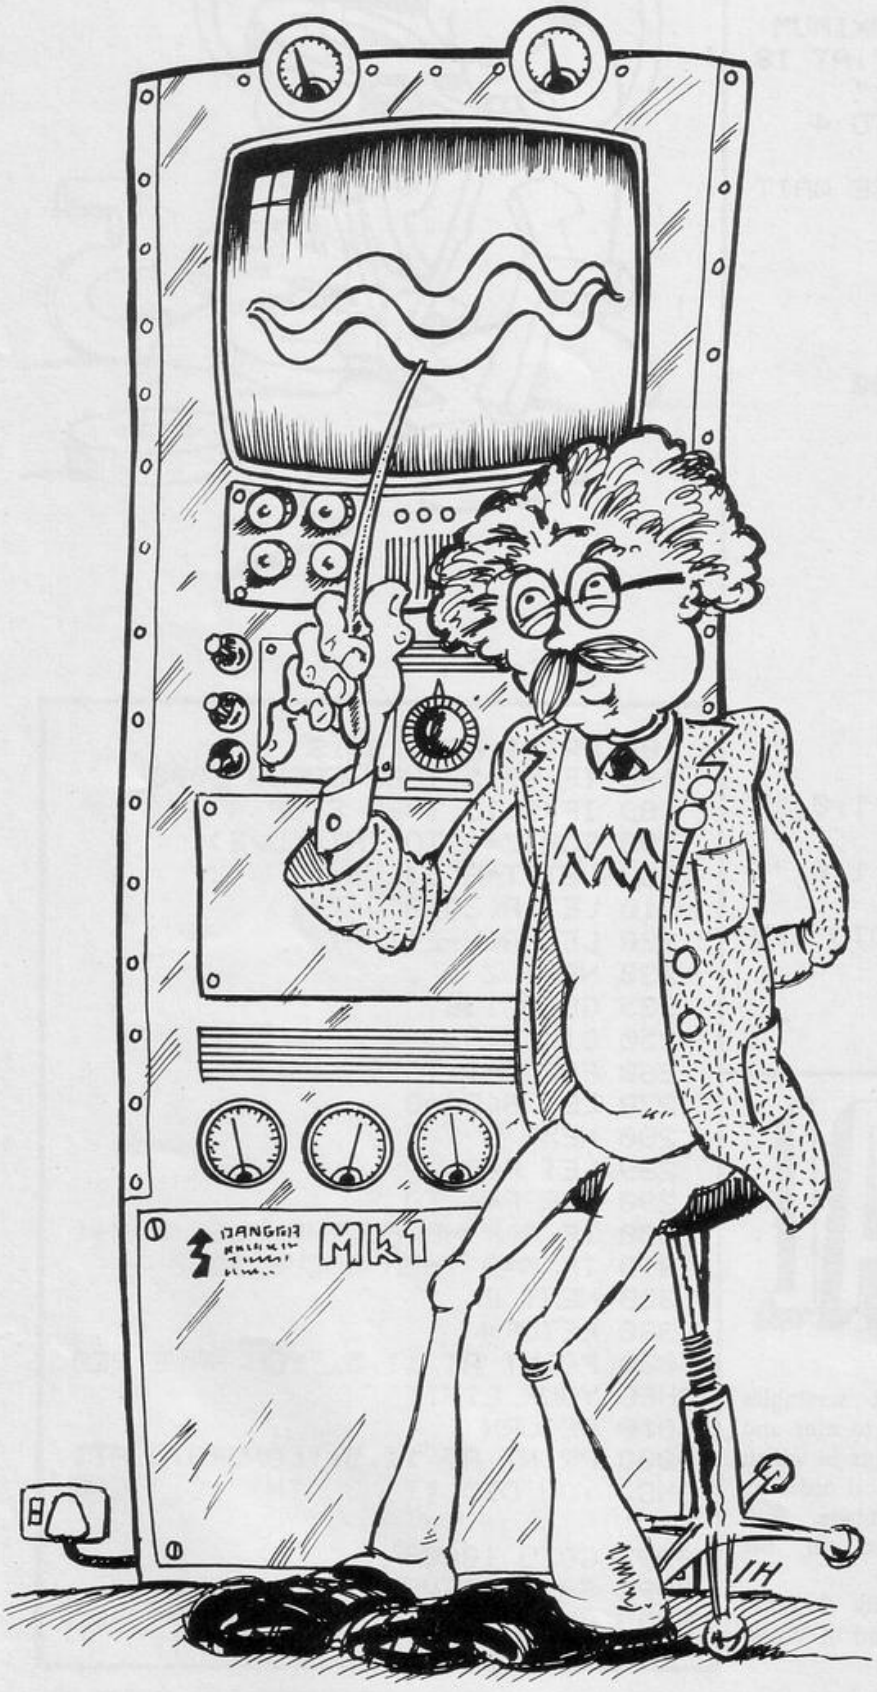
THE COMPUTER scrambles numbers from one to nine and you have 15 attempts in which to arrange them in numerical order by reversing blocks of numbers. Full instructions are included in the program.

Reversal was written for the 16K ZX-81 by Timothy England of Worksop, Nottinghamshire.

LISSAJOUS

A LEVEL physics students should find useful **Lissajous** which was written by Stephen Keevil of Dulwich, London for the 16K Spectrum.

The program is designed to draw graphs representing the mathematical relationship existing between pairs of sinusoidal waveforms. It is self-explanatory and contains a simplified explanation of the principles involved. Keevil adds that good examples of Lissajous figures will be obtained with a frequency of 1:1 and various values of phase angle.



```

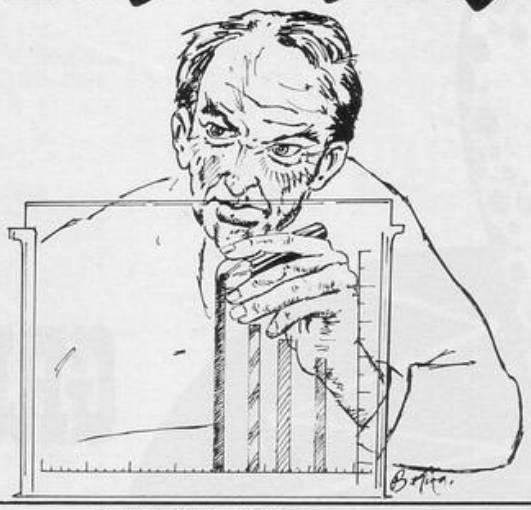
LETTER FREQUENCY



FINDING the frequency of letters in a language can be useful for many reasons, from code-breaking to the study of linguistics. Andy Munro has written **Letter Frequency** for the 16K ZX-81 which will draw a bar chart to show the frequency of letters in any word or sentence which is entered.

The scale of the chart will be altered automatically from 1:1 to 1:2, 1:5 or 1:10 to prevent the most frequently-occurring letter from going off the screen.

```
 1 REM "WORDS"

GRUMPHERS

THE OBJECT of **Grumphers** is to capture the grumphers by moving your figure on top of them with the usual cursor keys. As you move you leave a trail which you must not cross. Unless you move carefully you will soon find your way blocked at all turns.

If you find yourself trapped, use the 'J' key to jump to a random position on the screen. The game ends when you cross, or land on your own trail.

The program was written by John Litherland of Manchester for the 16K Spectrum.

CATACOMB

YOU ARE TRAPPED in the fathomless complexities of an underground cavern whose intestinal windings contain enormous golden nuggets and a mythology of fabulous beasts. Your aim is to collect as many points as possible by collecting gold and killing phantoms (inverse P), dragons (inverse D) and ogres (inverse O). Your remaining strength is displayed and can be boosted by the consumption of food pellets (inverse F).

Different caverns can be reached by passing through the exits (inverse X).

A running score and high score are displayed and your man is moved with keys 5 to 8. The Japanese author of the program, Ysichiro Idori of Purley, Surrey, reports his best score as 2,360 but says encouragingly: "I wish you will get higher mark."

In our listing, lower-case letters in brackets are graphics instructions (16K ZX-81).

MOVE IT!

MOVE IT is another round in the continuing battle between you and the ghosts which haunt your Spectrum. The ghost chases you round the screen and you score by tricking it into crashing into the blobs. If the ghost catches you it will eat you and if you run into a blob you will be SPLATTED.

The program was written by R Wileman of Emsworth, Hampshire.

DAVID HUGHES of Tunbridge Wells, Kent found, when he was teaching chemistry, that pupils were having problems with **Formulae.** So he used his 16K ZX-81 to write a program which could be used to test anyone's knowledge of chemical notation.

The program contains full instructions and works on a 16K ZX-81. When you are asked for the response 'Yes' or 'No', enter either 'Y' or 'N' rather than the full word.

```

MAP WORK

MAPWORK is an educational game written by Duncan Anderson of Bishops Frome, Worcester for the Spectrum. A map of England, Scotland and Wales is first drawn and you are asked which game you would like to play.

Game one names a town and then asks you to position the cross over that town by using the cursor keys. When the cross is in place, press 0 and your answer will be graded out of 10.

Game two reverses the procedure. The computer circles a town and you are asked to name it. The program has a vocabulary of 35 towns and there is a safeguard in it to prevent the same town being used more than once in each round.

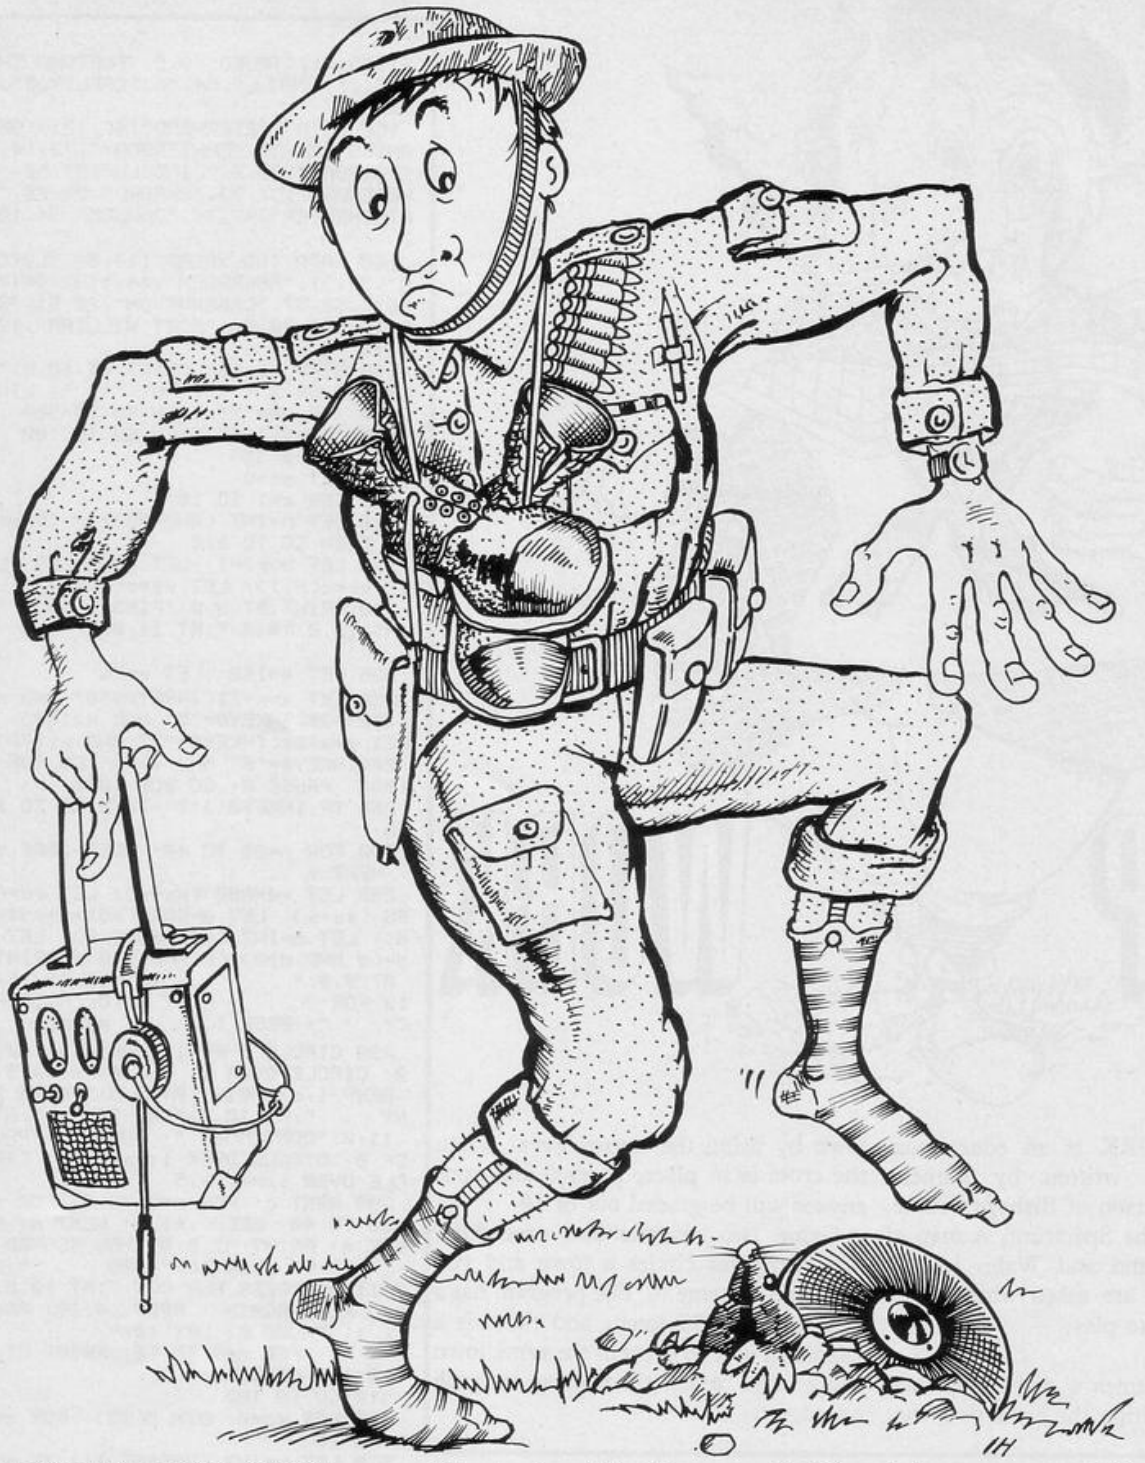
EXPLOSIONS



YOU (O) MUST MAKE your way across the minefield to reach your home (H). Avoid the mines marked—inverse space—or you will explode. It is safe to walk on the defused mines (+). Move up with 'E', down with 'D', left with 'G' and right with 'F'.

At the start of **Explosions** you are asked to input your speed, which must be between one and 20, and the number of mines in one row, which must be between 7 and 15. The game was written for the 16K ZX-81 by Peter Vitray of Budapest, Hungary.

GOTCHA is an exciting game for the 1K ZX-81 which can be played again and again without becoming boring. It requires some skill and forethought.

It was written by Paul Sutton, a law student of Cardiff, South Glamorgan. He owns a ZX-81 with 16K RAM pack, which he uses normally to help him in fantasy games, such as dungeons and dragons.

You—an asterisk—must avoid the two intelligent ghosts—inverse asterisks—for as long as possible. As each of you leaves a trail, it can become impossible to spot the ghosts for long periods.

Remember that you can cross your own trail or that of the ghosts, that you can move only in the upper half of the screen, and that you can move faster than the ghosts. Your movement is controlled by the usual cursor keys. Start by entering GOTO 1.

KET

THE SCENE is a perfect green pitch somewhere in the heart of the *Sinclair User* office. Lancashire step out confidently, only to see their first three players out for a duck, much to the amusement of Yorkshire, who are watching the game from a desk on the other side of the office.

Scenes such as that could become everyday events in your home if you program your 16K Spectrum with **Cricket** by Hugh Williams of Droitwich, Worcestershire. It is the best cricket program we have seen. The screen display shows the team on the field, the path of the ball, and even a fielder catching the ball. You decide when and where to hit the ball and see how many runs you can score. Any player who fails to score will leave the field literally as a duck.

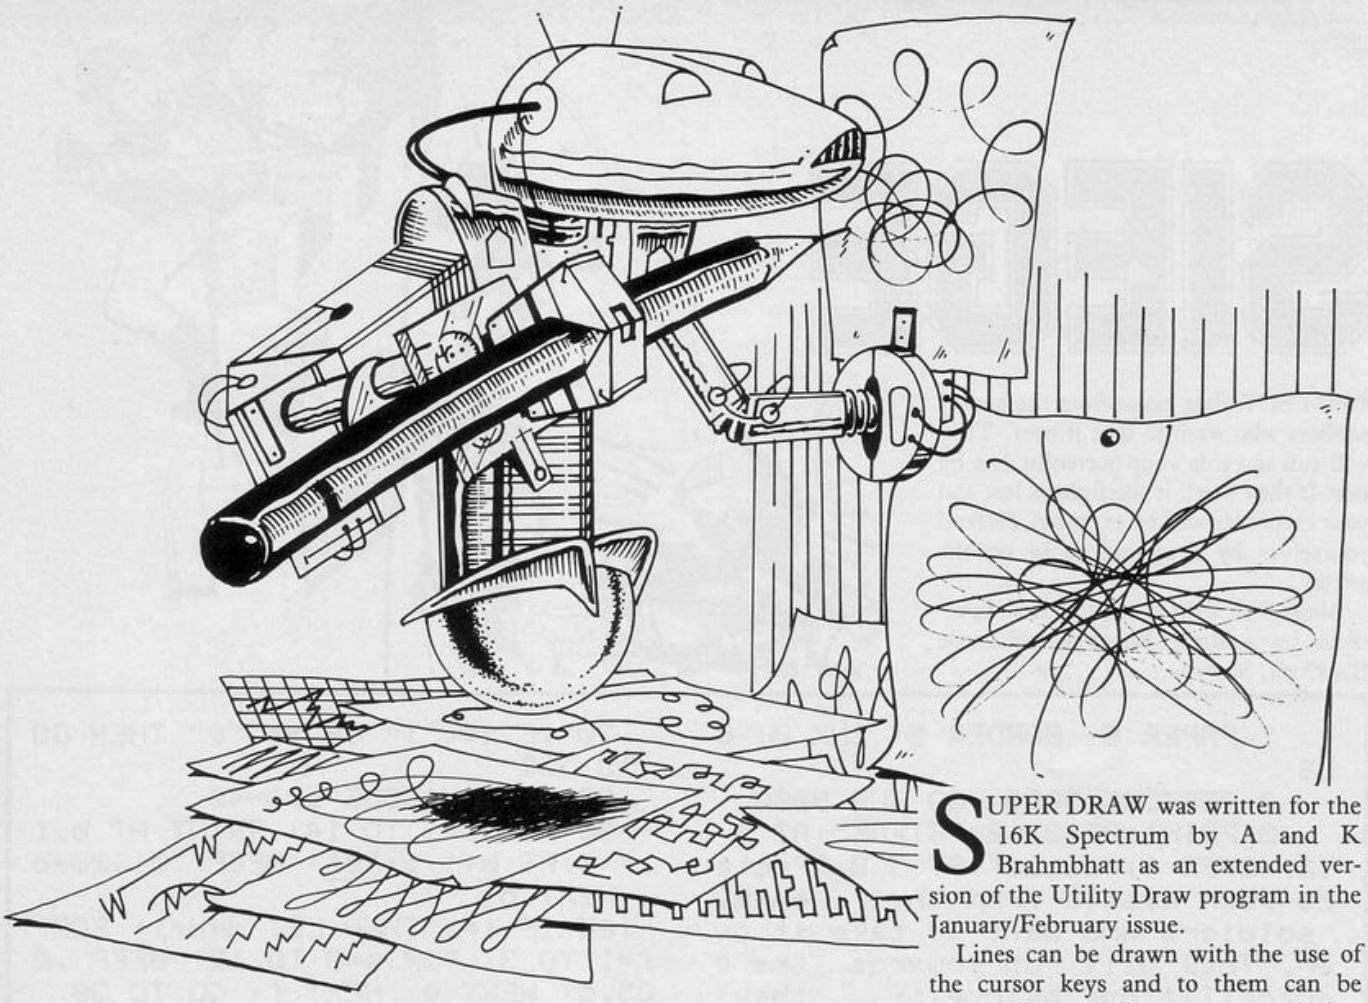
CATCHER

YOU, THE CATCHER, have to catch as many balls—inverse Os—as possible before you run out of energy. Moving quickly makes catching the balls easy but it also means that you soon exhaust your energy supplies. Bonus energy is added once you have caught nine balls.

Catcher was written for the 16K ZX-81 by John Howie of Currie, Edinburgh.



SUPER DRAW

SUPER DRAW was written for the 16K Spectrum by A and K Brahmbhatt as an extended version of the Utility Draw program in the January/February issue.

Lines can be drawn with the use of the cursor keys and to them can be added diagonal lines, curves, circles, triangles and squares.

The writers believe it has a multitude of applications, including drawing maps and designing plans. Full instructions are included within the program.

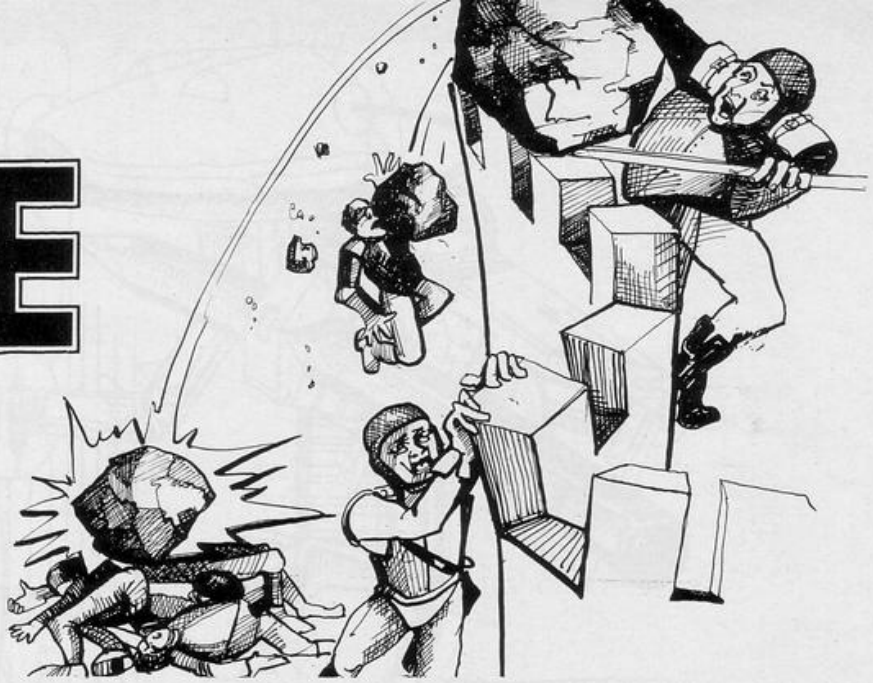
SIEGE



PROTECT your castle from the enemy soldiers who want to take it over. They will run towards your portcullis one by one. If they reach it the fight is lost and your comrades will be executed. Defend yourselves by dropping rocks on the enemy.

Siege was written for the 16K Spectrum by Andrew Burnham of Little Bookham, Surrey.

HOOP-LA

THE OBJECT of **Hoop-La** is to encircle 16 randomly-drawn asterisks. The hoops are thrown with the keys 1 to 0. How far they travel depends on how long the keys are held down. Their path can be bent to the left by pressing any key on the left of the keyboard and to the right by pressing any key on the right of the keyboard.

Double points are scored if you can bounce a hoop against the top of the screen before encircling an asterisk.

The program was written for the 16K Spectrum by Arthur Douglass of London E4.

CHARACTER ENLARGER

THIS SHORT program for the 16K ZX-81 will enlarge letters and some characters to six times their normal size. Characters which it is unable to enlarge will be rejected automatically. The program asks for the letter to be enlarged and the X and Y co-ordinates of its top left-hand corner. Entering the co-ordinates 5 and 5 will lead to your letter being printed at the top left of the screen.

Character Enlarger was written by Paul Baylis of Grey College, Durham.

LIGHT CYCLES

LIGHT CYCLES is a game for two players based on the cycle race in Tron. One player takes the blue cycle, the other the red cycle. Your aim is to outlive your opponent and, if possible, to make him crash either into the wall or the trail of either of the light cycles. Full instructions are given.

The program was written for the 16K Spectrum by Andrew Hardwick of Goring-by-Sea, West Sussex.

OWNERS of 1K ZX-81s are making it clear that there is no program for the 16K ZX-81 or the Spectrum which cannot be adapted in some way to run on the smaller machines.

R Watts of Worthing, Sussex has written a **Frogger** program for the 1K machine. Your frog must cross four lines of traffic before hopping into an empty frog home.

```

STEVEN LAWTHER of Witton Gilbert, County Durham has written **Mini Map** for the 1K ZX-81. It will produce a map of England, Scotland and Wales on the screen. It is useful on its own for geography or as a routine in a larger program on a 16K machine.

Graphics instructions are, as usual, in lower-case letters in brackets.

```

SPIRODRAW

CHOOSE THE SIZE of a big circle, a small circle, and a pen. The pattern produced by putting the pen in the small circle and rolling it round in the large circle will be produced on-screen.

Spirodraw was written for the 16K Spectrum by R Wright of Liss, Hampshire.

DEFE

DEFENDER is a fairly traditional games concept, finding a place in most arcades between the Frogger and Pacman machines, but this version by J M Levers of Gloucester is sufficiently professional to stand out in any company. An introduction with a user-defined character set and flashing titles sets the tone for a slick, well-crafted routine. You are skimming the surface of a mountainous planet, encountering oncoming waves of trigger-happy ships. Your choice of eight difficulty levels determines your chance of success. Gain height with the shift key, descend with the Z and fire your disintegrator beam with M. You are shown a running score, high score, the

NDER

number of ships you have to spare, and a neat display marks the end of the game.

Good sound effects, good explosions and a moving mountainous background complete this quality offering which occupies about 16.1K of the larger Spectrum. (48K Spectrum). Graphics notes:

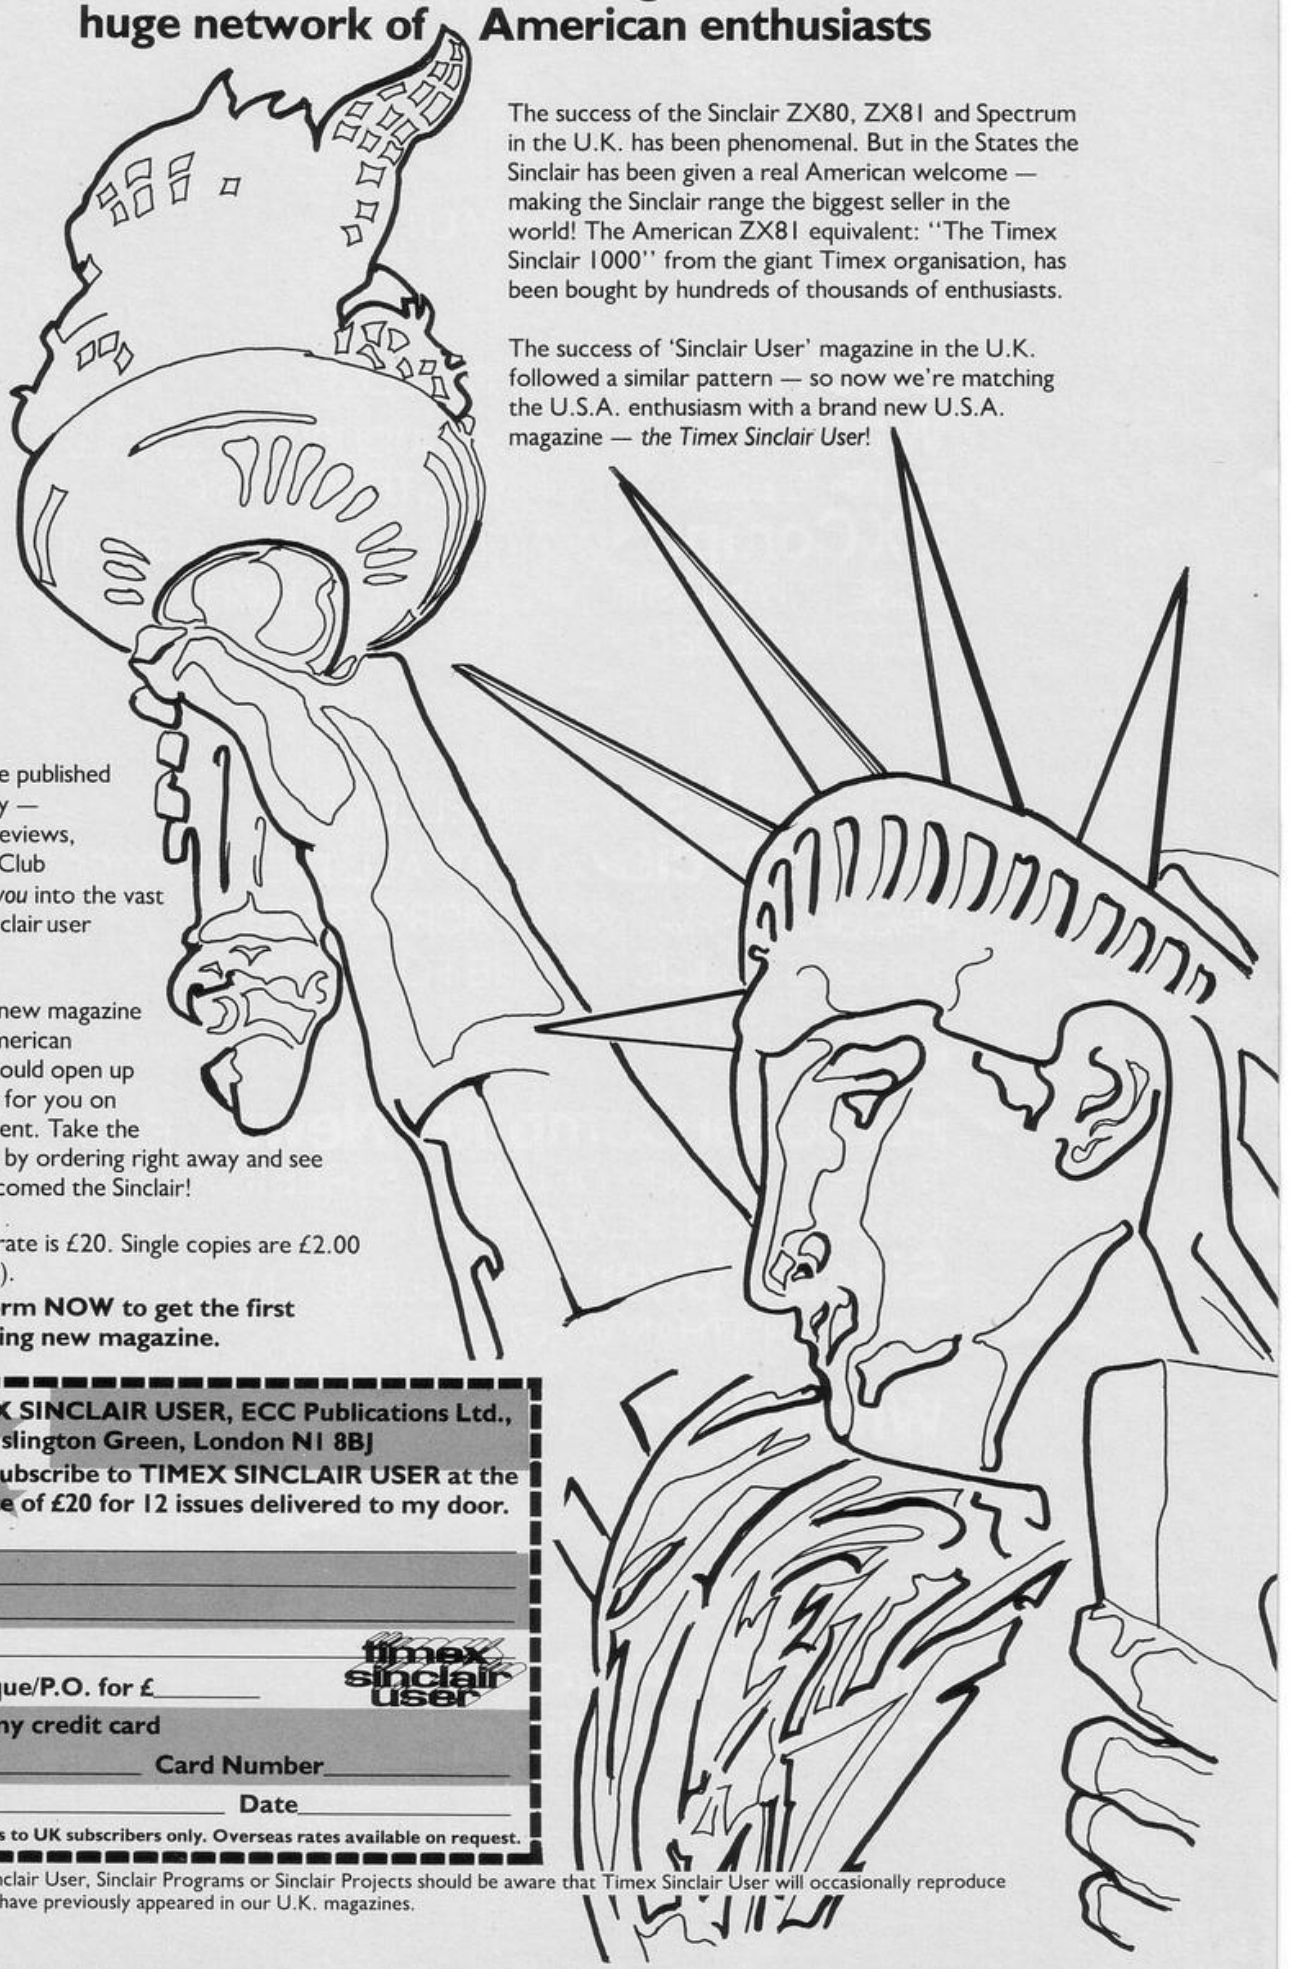
Now you can take a new

AMERICAN look at your Sinclair!

With the new Timex Sinclair User magazine to link YOU into a huge network of American enthusiasts



The success of the Sinclair ZX80, ZX81 and Spectrum in the U.K. has been phenomenal. But in the States the Sinclair has been given a real American welcome — making the Sinclair range the biggest seller in the world! The American ZX81 equivalent: "The Timex Sinclair 1000" from the giant Timex organisation, has been bought by hundreds of thousands of enthusiasts.

The success of 'Sinclair User' magazine in the U.K. followed a similar pattern — so now we're matching the U.S.A. enthusiasm with a brand new U.S.A. magazine — *the Timex Sinclair User*!

The first issue will be published in the U.S.A. in May — packed with news, reviews, programs and User Club information to link *you* into the vast American Timex Sinclair user network.

Remember, this is a new magazine written from the American viewpoint — but it could open up whole new horizons for you on your Sinclair enjoyment. Take the new, American view by ordering right away and see how the U.S.A. welcomed the Sinclair!

Annual subscription rate is £20. Single copies are £2.00 each (including P & P).

Fill in the order form NOW to get the first issues of this exciting new magazine.

Send to: TIMEX SINCLAIR USER, ECC Publications Ltd., 30-31 Islington Green, London N1 8BJ

Yes, I want to subscribe to TIMEX SINCLAIR USER at the special U.K. rate of £20 for 12 issues delivered to my door.

THE THOUGHT PROCESSOR

MiCROL©

SERIOUS SPECTRUM SOFTWARE only £9.95 each!

USE AND LEARN

Your perfect Spectrum starter Kit. 25 original BASIC programs you can use immediately, PLUS 118 page manual to help you get the most from your 16 or 48K Spectrum. 25 programs include: Music Composer, World Atlas, Computer Term Glossary, Screen Designer, Star Maps – PLUS games and powerful routines to use in your own programs: graph-drawing, text-editing, sorting, searching and much more. 118 page manual includes detailed description of programming techniques, full listings of all programs, and articles to develop your own program-writing skills.

"Excellent" A.R. West, Surrey. "First-time loading, user-friendly, superb documentation" J.E. Mann, Leeds.

THE DATABASE

Whether you want to update mailing lists, manage customer accounts, or simply produce an index of your record collection, THE DATABASE makes it easy and enjoyable. A breakthrough in power *and* practicality, THE DATABASE allows you to store information on any subject in the way *you* want, and gives you a full range of commands to display, update, sort, search and print – even perform calculations. Massive storage capacity: 1,000 lines in memory at a time, over 7,000 names and addresses on a single C90 cassette. See for yourself why THE DATABASE is the most advanced 48K Spectrum database available – far more powerful *and* practical than Sinclair's VU-FILE and all other "competitors".

THE SPREADSHEET

Based closely on Visicalc, the world's best-selling program, THE SPREADSHEET turns your 48K Spectrum into a "super-Calculator" that helps you solve all kinds of number-based problems quickly and easily. Hundreds of applications in business, engineering and science – and just as versatile for home finance management. Invaluable in education too, helping develop maths ability and confidence. In power, flexibility and ease of use, THE SPREADSHEET outperforms all other Spectrum spreadsheets – including Sinclair's VU-CALC. See for yourself, with the security of MiCROL'S 14 day money-back Guarantee.

THE WORD PROCESSOR

The only full feature, professionally-written word processor for 48K Spectrums. Use it to produce memos, letters, reports – THE WORD PROCESSOR has the features you need, including flexible editing, justification, centering, and automatic "word wrap". Simplicity itself to use, THE WORD PROCESSOR uses the same "what you see is what you get" principle as word processors costing hundreds of pounds more. 20,000 character storage capability for real-work applications, and it's easily adapted to work with full size printers. Once again, MiCROL sets the standard in serious Spectrum software.

To order: (UK Orders Only). Simply complete the coupon, and FREEPOST with your cheque, made payable to MiCROL (UK Mail Order). All products normally available from stock and despatched by return. Credit Card Orders: By phone 9-5.30 Mon to Fri. stating name and address, Card No. and item(s) required.

Bursting with great new comic strips . . . exciting stories . . . astounding facts . . . . big prizes . . . competitions . . . fascinating quizzes . . . star personalities.
And that's just the start of Britain's newest, brightest, most fun-packed comic ever!

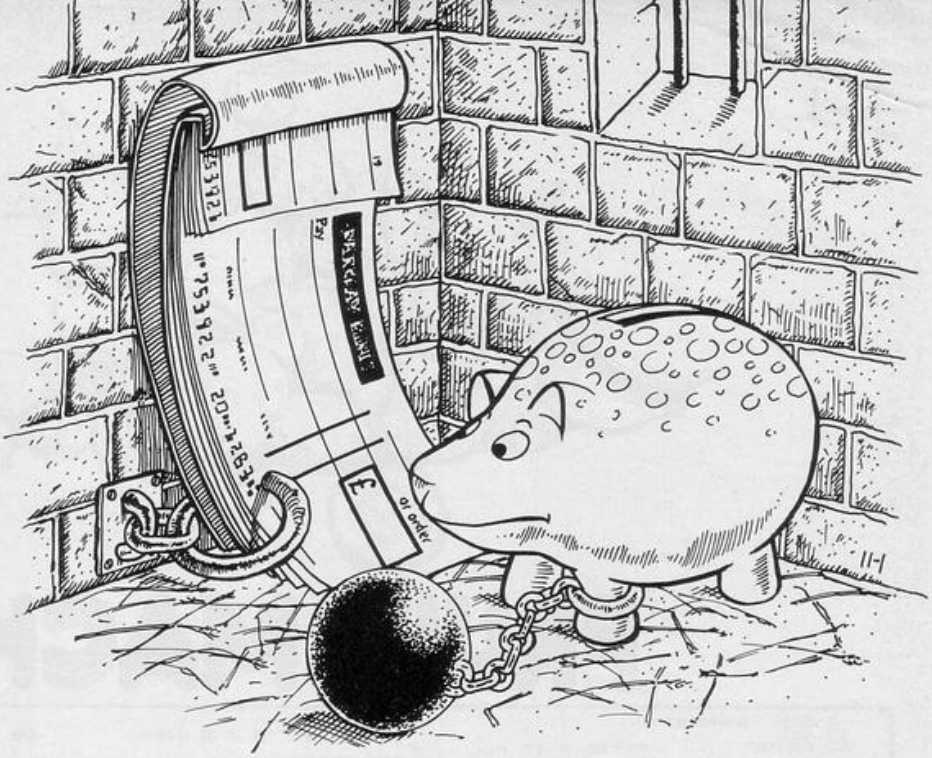
LOAD RUNNER

It's the only comic for the age of the computer –
it puts the rest back with the dinosaurs!

JUNE 23rd

and every fortnight . . . order your copy NOW.

PERSONAL FINANCE



PERSONAL FINANCE allows 16K and 48K Spectrum users to keep track of their financial situations with an effective but relatively simple program. Once it is entered you are given five options—entering, saving or displaying data, saving the file, or preparing a statement. Entries will be arranged in date order and a statement of income and expenditure can be obtained at any point.

The program was written by Paul Weir of Shirley, Southampton.

CHARLES GIERSH of Woodthorpe, Nottingham has written a program which simulates the working of a **Fruit Machine** on the 16K ZX-81. Unlike many similar programs it is not impossible to win fairly frequently, although the 50 pence Jackpot can prove elusive.

FRUIT MACHINE

BEWARE — the highly-intelligent **Giant Worms** are after your money and if they steal it all you will die. Shoot them before they can reach the gold. One worm contains the brains for the whole operation. Shoot at that worm with key 0 and both worms die. Shoot at the other and nothing will happen.

Giant Worms was written for the 16K ZX-81 by E Mitchelmore of Kingswear, South Devon.

MONSTERS

THE OBJECT of **Monsters** is to move your man from the bottom level to the middle of the top level by means of ladders. The monsters descend from the top level and, should they hit your man, a life is lost.

Scoring is calculated by the amount of oxygen remaining when the man reaches the centre of the top layer. The game includes full instructions. Monsters was written for the 16K Spectrum by Darren Girard of Colchester, Essex.

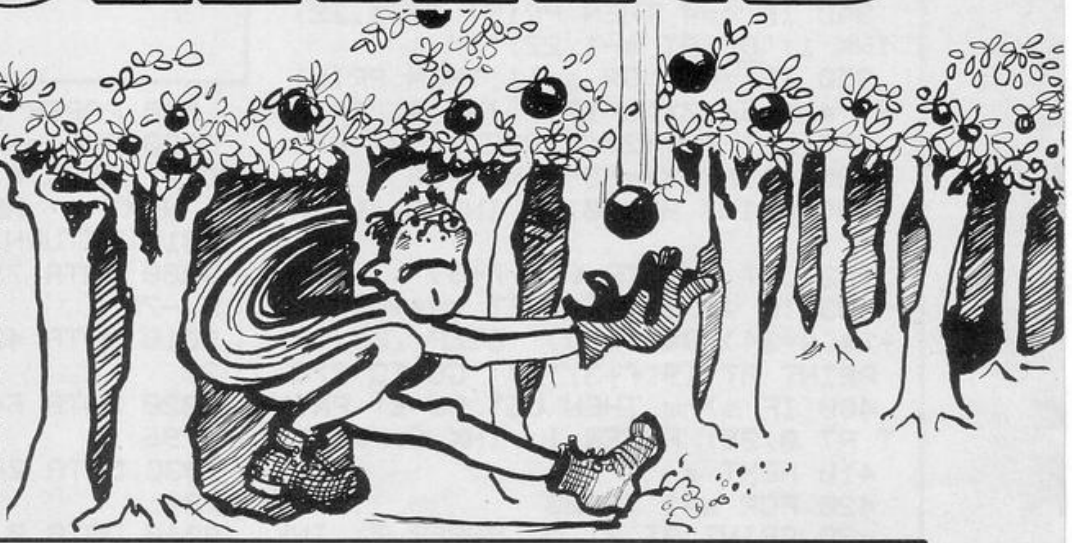
WHEN RUN, **Maze Maker,** written by J D Webster of Wetherby, West Yorkshire will produce a random maze. The routine could usefully be added to many games programs. In each maze there will be a possible route from A$ (2, 15) to the bottom of the screen. The program takes two minutes to run, so be prepared to wait for your maze. (16K ZX-81).

MAZE MAKER

ORCHARD



ANGUS LAVERY of Todmorden, Lancashire has written **Orchard** for the 16K Spectrum dealing with hardship and exploitation. You are the high-tech fruit catcher and your boss has threatened to dismiss you if you drop any item of fruit.

The small reward you earn per fruit means that you can often be sacked having earned less than £1. Can you beat the built-in high wage of £5?

GOLFER

WHATEVER the weather, a game of golf is always possible with **Golfer,** written by Mark Ansdell of Tonbridge, Kent for the 16K Spectrum. You and the golf course are shown on the screen and once you have entered the angle and strength of your shot, the trajectory of the ball is also marked.

You are allowed only one shot at each hole, making it possible to complete the game without once holing-out. With experience the game becomes easier, thus offering the satisfaction of a hole in one.

BREAKOUT

DAVID THICKET of Doncaster, Yorkshire has written a version of **Breakout** for the 1K ZX-81. Move your bat with cursor keys 5 and 8. Bounce the ball against the wall to destroy all the bricks.

ERRORS AND MISHAPS

TWO PRINTING ERRORS occurred in our last issue. Line 60 of **Pilot** contained a variable which was not clear because it had been inked-in so that it might have been interpreted as a 9 or a g. It was, in fact, an "a".

The last item of data was omitted from line 9210 of **Demolition.** The line should have ended with a 6.

Play in the big league — with only the best, newest programs!

We've searched for brilliant new program sources throughout the U.K. and North America to find an exciting collection of new games — and business programs — many of which cannot be bought by mail order from any other source!

Every month, we'll be adding to our catalogue to bring you the best of new games, new business, educational and household software. And the good news is — **we're specialising in programs for your Sinclair!**

With our special new deal — you just CAN'T GO WRONG.

* A free offer every month [this time it's a free blank C20 cassette with every two games ordered]
* A money-back guarantee if you're not entirely satisfied with your purchase — that's how confident we are about the quality and value!

All you have to do is look at our first HOT selection, then order quickly to be among the first to own these games of skill, intelligence and excitement [fast delivery is another of our specialities — so you could be using these new programs SOON].

FREE BLANK C20 COMPUTER CASSETTE WITH EVERY TWO CASSETTES YOU ORDER!

Remember there's no limit to the number of free cassettes you receive if your order justifies them — so why not get together with friends or user group members and share the freebies?

GUARANTEE

Order with complete confidence. If you are not entirely satisfied with the quality of your purchase return it to us within 7 days and we will provide a replacement.

GREAT VALUE! TREMENDOUS SELECTION! PLUS A FREE OFFER EVERY TIME!

Fill in the order form right away — we're guaranteeing fast delivery, quality and satisfaction [after all, we want you to come back for more!]

The Software Workshop, Yew Tree, Selborne, Hants GU34 3JP

Hardware or software lying around, unused?

From the August issue of *Sinclair Programs,* you can advertise it through our new classified section.
By placing a classified advertisement, you will reach over 150,000 Sinclair-using readers, and so exchange your goods for cash.
And it will cost you only £5 for up to 30 words!
Please write your advertisement in the boxes below, one word per box. Underline words required in bold type. Your name, address and/or telephone number should be included *Please print in block capitals.*
Note—this service is open only to private advertisers. The advertisement will appear in the earliest possible issue.

Name:.....

Address: .....

..... Tel: .....

Have you included the fee of £5?

Conditions
The Advertisement Manager reserves the right to alter, reject or suspend an advertisement without assigning any reason. Advertisements are accepted subject to approval of copy and to the right of the Advertisement Manager to alter, reject or cancel any order without explanation. The Proprietors are not liable for any loss from any cause whatsoever, nor do they accept liability for printers' errors. The Advertisers shall indemnify the Publishers in respect of any claim, cost and expenses arising out of any libellous or malicious matter or untrue statement in any advertisement published for the advertisers, or any infringement of copyright, patent or design therein. The placing of any order will be deemed to be an acceptance of these conditions.

MAIL ORDER ADVERTISING

British Code of Advertising Practice

Advertisements in this publication are required to conform to the British Code of Advertising Practice. In respect of mail order advertisements where money is paid in advance, the code requires advertisers to fulfil orders within 28 days, unless a longer delivery period is stated. Where goods are returned undamaged within seven days, the purchaser's money must be refunded. Please retain proof of postage/despatch, as this may be needed.

Mail Order Protection Scheme

If you order goods from Mail Order advertisements in this magazine and pay by post in advance of delivery, *Sinclair User* will consider you for compensation if the Advertiser should become insolvent or bankrupt, provided:

(1) You have not received the goods or had your money returned; and

(2) You write to the Publisher of *Sinclair User* summarizing the situation not earlier than 28 days from the day you sent your order and not later than two months from that day.

Please do not wait until the last moment to inform us. When you do write, we will tell you how to make your claim and what evidence of payment is required.

We guarantee to meet claims from readers in accordance with the above procedure as soon as possible after the Advertiser has been declared bankrupt or insolvent (up to a limit of £4,250 per annum for any one Advertiser so affected and up to £10,000 per annum in respect of all insolvent Advertisers. Claims may be paid for higher amounts, or when the above procedure has not been complied with at the discretion of *Sinclair User*, but we do not guarantee to do so in view of the need to set some limit to this commitment and to learn quickly of readers' difficulties).

This guarantee covers only advance payment sent in direct response to an advertisement in this magazine (not, for example, payment made in response to catalogues etc, received as a result of answering such advertisements). Classified advertisements are excluded.

BARGAIN-HUNTERS READ *THIS!*

Whatever your model of Sinclair computer—you can get HOURS of fun, intellectual satisfaction and education for just 95p per month!

A bargain?
That's **Sinclair Programs** magazine—the fat, glossy magazine that's PACKED with original, tested programs for you to load and run.

With **Sinclair Programs** every month you can build the library of programs that suits your mood: in recent issues we have challenged our readers with programs to test their skill at Sharpshooter or Laser Cannon . . . jolt their brain cells with Quadratic Equation or Monster Maths . . . or take a practical turn with their own word processor program or graphic generator.

That is just a fraction of what you get from **Sinclair Programs**. Each month we have 40 programs for owners of ZX80s, ZX81s and Spectrums. But make sure you don't have to hunt TOO far for your bargains—**Sinclair Programs** always sells out quickly, so order yours TODAY from your newsagent, or fill in the form below and we will send it direct to you, every month.

Mail to: ECC Publications Limited, 30-31 Islington Green, London N1 8BJ Yes — I'd like to subscribe to **Sinclair Programs** (12 issues — price £13.20) I enclose a cheque for £ ____ Please charge my credit card Card: name ____ Number ____ Address ____ Name ____ Date ____ Signature ____

EAST LONDON EXCLUSIVE

ZX81 RAM-PACKS FLAP

and when RAM packs flap, programs crash because of edgy connectors (so children! keep off!).
Now East London Robotics offer a unique product:-

TRADE IN YOUR ZX 81.

Introducing the **MAXIMEM ZX81**. A ZX81 with 32k or 64k RAM fitted INSIDE the case (children come back!)
MAXIMEM ZX81 – the most affordable 32 or 64k micro in the world.

EAST LONDON ROBOTICS

MAXIMEM ZX81

32k-£39 PLUS ONE USED 1k ZX81

64k-£59 PLUS ONE USED 1k ZX81

The MAXIMEM 32 and 64k is a modified ZX81 and not just a RAM pack. We give a six month guarantee on the computer, regardless of the age of your trade-in ZX81. The extra memory uses only a quarter of the power consumption of a 16k plug-in memory, and does not interfere with any standard add-ons, such as printers, RS232 or other interfaces.

Trade in your ZX81 by post or over the counter at our premises. (Phone first to check current delivery). Trade-in ZX81s must be clean and in working order. Send and receive the computer only, without manuals, power supplies etc.

EAST LONDON ROBOTICS

SPECTRUM 48-£23

32k MEMORY EXTENSION

Plug the chip-set (Issue 2) or circuit board (Issue 1 £35) into the sockets provided by Sinclair and you have a standard 48k Spectrum, fully compatible with all Sinclair add-ons and very low in power consumption. No soldering is required. Fitting and removal are easy. The SP48 carries our full warranty and is upgradable on a part-exchange basis to the SP80.

SPECTRUM 80-£46

PAGED 64k MEMORY EXTENSION

Fitting, power consumption and add-on compatibility are identical to the SP48 (Issue 1 version £50). It can be used as a standard 48k, but software instructions can switch to a second page of 32k. Although not recommended for the complete beginner, the SP80 is of tremendous benefit to the serious user.

Fit and Test Service: At our premises £3
By registered post £7

STOP PRESS
TRICKSTICK TEAM IN TRAINING
A Company team of four ready to take on all comers. Fabulous prizes for successful challengers.

ZX SLOWLOADER £10

Loads ZX81 tapes into your Spectrum. A recent letter describes it best.

Dear Sir, Just a line about your excellent Slowloader.
I bought it because I was nearing the completion of a project which uses practically everything in 16k RAM including a string array (DIM 629,7) which took 4 hours hard graft to bash in. I really did not fancy doing it all again.
SLOWLOADER twice found a tape-loading error. So I SAVEd again onto a short, high-quality tape – and this time it went straight in. Two minutes to take out the SLOW and FAST lines, 10 to renumber the PEEKs and POKEs, 20 to add some colour and a few BEEPs, and the thing was ready to SAVE again. What a little masterpiece!

All products on this order form are in stock at the time of going to press.

Same day dispatch for phoned Access and Visa orders.

To East London Robotics Ltd. Please send by return (tick items required).
