# Freescape's back with an exclusive game to Home Computer Club Members

*Walk through the castle in a real  
3D moving landscape.*

When it comes to moving perspective, Freescape is the gaming system that leaves the others in the starting gate. If you haven't seen Freescape yet you're in for a real treat. Suddenly your computer screen becomes a window into realistic scenes that move in perfect perspective according to distance and your angle of vision.

*Castle Master* is the fourth Freescape adventure we've offered and it's certainly the fastest with more atmosphere and detail than ever before.

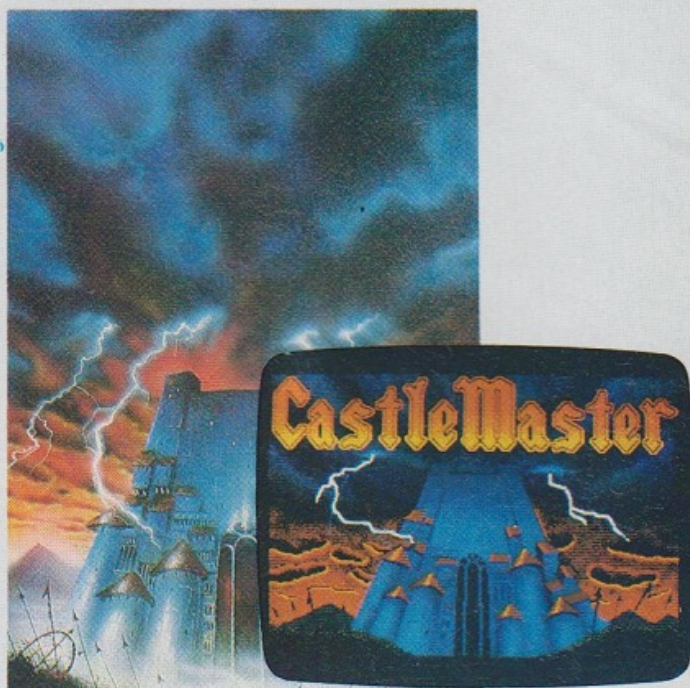

You take on the role of a noble Crusader on a quest to destroy the evil spirits that lurk inside a castle and free the prince and princess who have been held prisoner by these dark forces.

This moving 3D graphic adventure comes complete with incredible sound effects; from the tapping of footsteps, squeaking doors and lightning bolts to the crash of drawbridges falling and bats squealing.

From the opening scenes to the final conclusion, it's a giant 3D adventure in first person perspective.

Start off approaching the Castle Eternity from a distance; as you move closer its walls and turrets loom closer. Then cross the shark-infested moat to gain entry.

From there you enter the catacomb of rooms, courtyards and stables that hide dark secrets.

On the way you must collect the magic keys that will open the way deeper and deeper into the castle.

Each room has objects and doors that must be investigated. These invariably lead to more corridors and passageways. Armed only with a sling you must do battle with evil spirits, demons, rats and bats.

As a special bonus, we're also offering *Castle Master II - The Crypt*. Remember this bonus game is available only to Home Computer Club members. It can't be bought in the shops.

**GHOSTBUSTERS II.**

**The blockbuster sequel to one of the biggest-selling games ever**

**See the movie – then play it!**

Yes, this is your chance to become a Ghostbuster and emulate the actions of Spengler and Venkman as they ectoblast their way through some of the spookiest spirits around.

Start by lowering a Ghostbuster into the sewer for a sample of slime. Keep those spirits at bay by zapping them with the ghost-busting gun. In level two the Statue of Liberty comes to life to zap flying ghosts and ghouls with the flame from her torch. You've got to collect the falling ectoplasm to keep her fighting!

Level three is a straightforward shoot out between the Ghostbusters and the two villains out to do in the judge who ordered their demise.

Finally there is the climactic scene at the museum as the Ghostbusters fight to prevent the spirits from calling up the evil power that will lead to a ghostly takeover of the Earth.

# Tread the fine line between illusion and reality

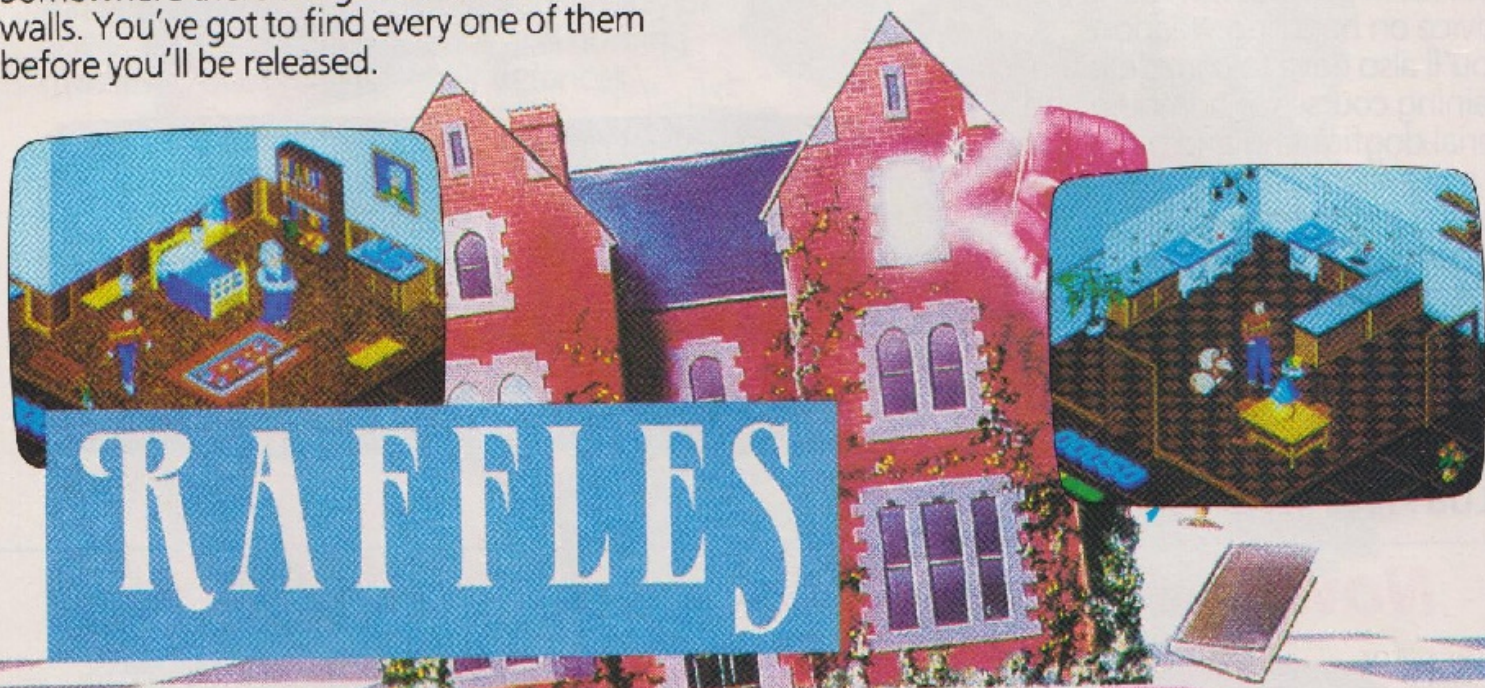

## Explore a 3D house to find the gems.

We bet you'll be amazed when you see the incredible detail resplendent in the graphics of this amazing treasure hunt game. With the most realistic recreation of the inside of a house ever seen on a computer and its challenging puzzles, *Raffles* is sheer delight. The plot is simple. As a thief who's broken into the house, you must explore the many rooms that are packed with objects and detail. Somewhere there are gems hidden within the walls. You've got to find every one of them before you'll be released.

But there's more. As well as the treasures there are traps and terrors lurking within the passageways such as savage mice and carnivorous canaries!

Once you've found a gem you must take it to Lady Crutcher on the first floor. Only when all the gems have been recovered will she open the door to let you out.

# Fly the advanced fighter that's invisible to radar

## Designed by an ex-fighter pilot!

*Project Stealth Fighter* puts you in the cockpit for a unique flying experience. You fly alone into the heart of the enemy's defences with nothing to save you but your flying skills, the most advanced air weaponry there is, and a plane that absorbs off radar signals to leave it virtually undetectable. A 120-page flight manual gives you a thorough briefing on the controls as well as flying techniques, courses in combat flying and advice on handling weapons. You'll also have to complete the training course for bombing and aerial dogfighting and participate in a pre-flight briefing. Only after you've absorbed and remembered the mass of training material will you be ready for a stealth mission to trouble spots over North Africa or Eastern Europe.

# Now the famous Michael Jackson movie comes to the computer screen

Join the world Superstar entertainer in his adventures to rescue the children captured by Mr Big. Just like the original movie, this

computer game adaptation features Michael recreating all his celluloid exploits. Only this time, he's under your control. Start Michael off on his journey as he searches the city for essential items and disguises to keep him one step ahead of his pursuers. Once he's equipped, it's on to level two and the search for the power orbs necessary for him to turn into a super-fast Stratos car and escape to where the captured children are being held. There it's straight into a shoot-out with the police and the rescue of the three children. But not before Mr Big has made off with one of the young prisoners. Quick as a flash push open the fire-button, Michael changes into a robot, to fight the laser cannons and troopers protecting Mr Big. Once the laser cannon is destroyed Michael can turn into a robot ship and blast off. Just like the film!

# Four levels of warring worlds

## Fighters against fiendish foes.

Is it the breathtaking graphics or the super-fast combat action that makes *Forgotten Worlds* an addictive shoot-em-up par excellence? There's no time to think as you join the two super warriors fighting against evil demons in an attempt to rescue the world from the clutches of Emperor Bios.

Start the action on level one battling through a bleak cityscape to the entrance of an underground complex. Robot guards bar the way. Get past them and you'll be met with a maze of gas pipes. One false move and you'll be fried. Any second you'll come up against the first of many demons. Use your supply of lasers, canons, napalm bombs and homing missiles to blast through their defences.

Extra weaponry is earned by gaining extra points.

On to the Dust World of level two where deadly dust dragons lurk protected by gun emplacements. Hitting the dragon in the heart destroys it. Blasting other parts of its body makes it madder.

Through to the hi-tech fortress of level three and the shrine of the God of War. There's only one way to destroy him and you'd better figure it out quickly.

Finally comes the battle in the kingdom of Bios. Snakes, maggots and sinister monks all conspire to take your lives. Defeat them and you earn the right to vanquish Bios himself.

**Two of the roughest, toughest cinema hits come to your computer screen!**

**Join the two top crime-busters on their exciting exploits.**

Just like Batman – The Movie, this rollicking movie spin-off from Ocean is lifted straight from the script of the film. So you'll follow Batman on each of the five stages of his fight against the Joker with gameplay and graphics closely modelled on the actual film footage and reproducing exactly the mood, excitement and danger.

With its astounding mix of 3D graphics and incredible

animated perspective, *The Untouchables* is being acclaimed by reviewers as one of the best film spin-offs ever. This incredible multi-event game recaptures the action of the movie in which Government man Elliott Ness and his hand-picked band of crimefighters go up against Al Capone himself.

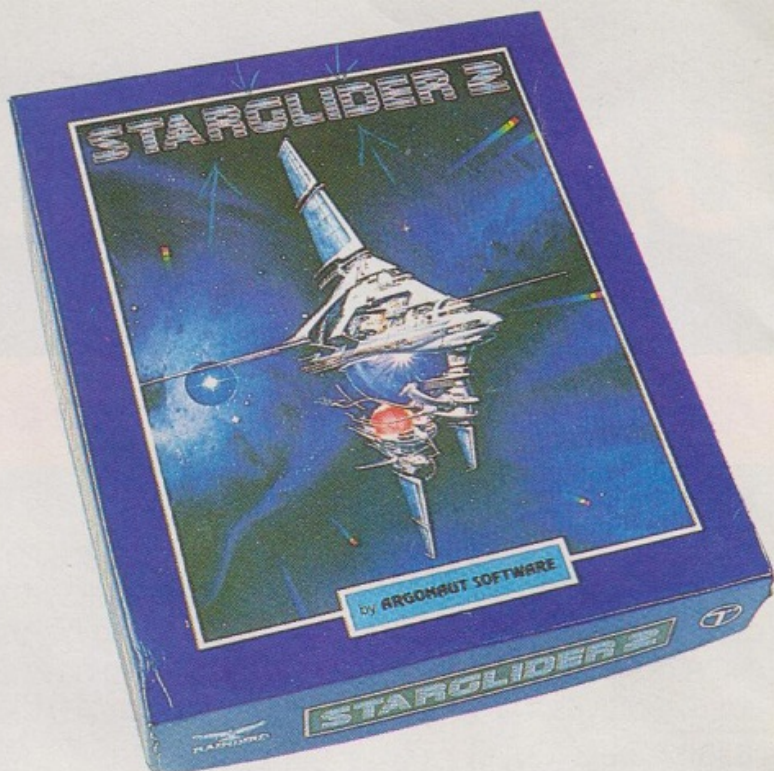

With its soundtrack of famous tunes from the period, and the incredible attention to detail, *The Untouchables* adds up to an arresting game of gang-busting.

**Upwards and onwards with one of the best 3D space experiences**

It's back again and better than ever! Argonaut Software has refined and improved its great Starglider space odyssey with a new version that's bigger and better than before.

Now the animated 3D graphics are faster and smoother with incredibly responsive controls that let you see the consequences of each pitch, roll, and loop.

Once again you're out in the cosmos flying among the planets and moons that make up the solar system. Throughout the star system is a network of tunnels. From the cockpit of your Icarus starfighter you'll encounter weird aliens, and the Starglider fleet. Taking up the controls you'll fly through tunnels, around planets, stopping at service depots for repairs and supplies. Throughout the flight, you'll have astounding 3D views of a patchwork landscape with authentic light shading and 3D perspective.

As the Icarus responds to your touch on the controls, the incredible out-of-ship view changes in exact relation to the movement of the craft.

# The ultimate collection of five of Epyx's greatest hits

No we couldn't quite believe it either. No less than five fantastic examples of the best of Epyx's incredible catalogue. We've offered all these titles individually in the past. If you don't already know, Epyx is one of the US's most famous software houses celebrated for its incredible sporting simulations.

Now is your chance to grab them all in one attractive compilation that will give you hours of first-class sporting fun.

There's 4X4 Off-Road Racing, The Games Winter Edition, California Games, Street Sports Basketball, and Impossible Mission II.

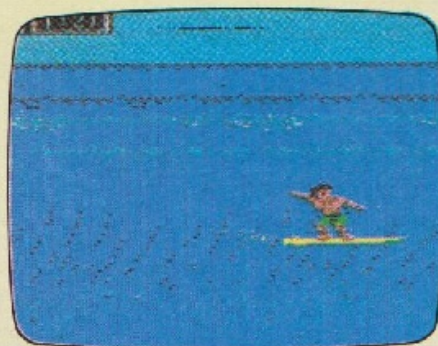

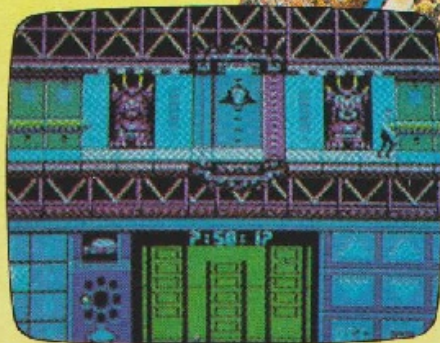

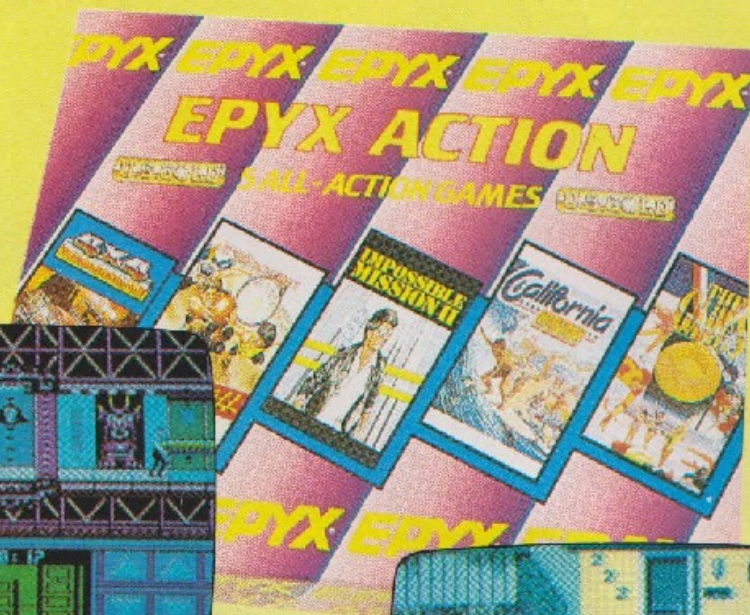

In Impossible Mission II you're the secret agent who has to try to save the world from the evil Elvin Atomblinder and who has to penetrate his stronghold, get past guardian robots and search dozens of objects in dozens of rooms for the code to neutralise the mad scientist's missiles.

Street Sports Basketball is the great and gritty basketball simulation played in a parking lot, playground, the suburbs and a back alley. Assemble your team from the hottest star players in the neighbourhood. It's up to you to make the right moves.

In 4X4 Off Road Racing there are terrific tumbles on the toughest of terrains! Bounce over some of the most hostile country an off-road racer can face. The action starts when you choose your course. Swelter in the heat of Death Valley, slide over the mudflats of Georgia, challenge the icy terrain of Michigan in winter, or take on the boulder-strewn Baja.

California Games is a challenge of skills for up to eight players who can win trophies in each event or compete for the top championship prize in roller skating, BMX'ing, Foot Bagging and Frisbee throwing.

The Games is the perfect simulation of the top winter Olympic events: figure skating, downhill skiing, cross country skiing, ski jump and slalom.

# Hard Drivin'

**Tengen's incredible coin-op simulation comes to your computer**

**Any more realistic and you'd need a licence!**

Just when you thought driving games had reached their peak, along comes *Hard Drivin'* to re-write the book on state-of-the-art simulations. It really does seem that you're at the steering wheel of an ultra-fast sports car looking through an expanse of windshield at a landscape and roadway that flashes by in perfect moving perspective.

Every now and again other road traffic appears. Some are fast cars. Others are slower moving trucks. You've got to thread your way through the traffic without losing time. Miss a gear, misjudge a turn and crash. That shattered windshield tells you it's all over.

**The shoot-em-up that leaves the rest for dead!**

**A pitch battle to stop alien domination of Earth.**

At last the tremendous Thalamus shoot-em-up *Sanxion* has been re-written especially for the Spectrum. Why not experience the delights of this number one Commodore game for yourself?

As a *Sanxion* pilot you've received your orders to patrol one of the ten world sectors. If you survive all the patrols in this sector you are promoted to *Sanxion* Class I and go on to do battle against the alien's secondary attack system.

A dual-window scrolling screen presents you with both overhead and forward displays. The overhead scanner is vital to monitor the position of the opposing forces. Waves of aliens will attack from the front. If they get behind your craft watch out! They'll wheel around and come back at you while you're dealing with a fresh attack! The trick is to duck down, let them overshoot, and then blast them as they move in front.

The weaponry starts with a single laser cannon progressing to greater fire-power each time your ship collects a special icon.

# Ocean's coin-op sensation that sets a new combat challenge

## Safety catches off for action!

*Cabal* is the game that's had the coin-op commandos shoving in their money as fast as they can. This is the fighting simulation that starts you off with a low-powered single-shot repeating rifle. The trick is to earn more points and increase weaponry until you can load up with automatic machine guns and grenades to really let loose on the enemy gunships, tanks and submarines.

A bombed-out street looks innocent enough. Until those bad boys start taking pot shots at you. Quickly line up the cross hairs of your weapon and fire back. If you're on target they'll be zapped and you'll soon move on to different and more complicated screens. These show scenes of different cityscapes each with its own assortment of baddies and terrain. Blow up the buildings and trucks, take cover behind barrels and walls.

You must capture extra weaponry such as grenades and bazookas, gaining points for the baddies, helicopters, tanks, trucks and buildings you hit.

There are five levels, each with four stages. At the end of the fourth stage you'll meet an extra-tough baddie for the final showdown.

# Gun-toting fun with a real difference – complete with free demo games.

Gives shoot-em-ups a whole new dimension!

Now you can really let your trigger finger do the stalking! With the *Magnum Light Gun* your combat and shoot-em-ups take on a new reality as you take aim, draw a bead, squeeze the trigger and – blast! There goes another nasty.

It's all done with phased light beams that respond to the level of brightness being emitted from a point on the screen. The light gun detects the area of the screen you're pointing at. Pressing the trigger sends a signal to your computer just like the firing button on a joystick or pressing a key on the keyboard.

It's completely silent and because there are no moving parts it's a model of reliability.

As special added-value, the gun pack includes six games designed to be used with the gun. One of the games is the classic arcade combat mission Operation Wolf. Now see how this popular shoot-em-up gets

an extra boost of reality with the light gun. Watch for those terrorists as they pop up to do you damage. Then squeeze a pulse of light and watch them bite the dust.

Just think. No more wiggling your joystick or fiddling with the keyboard. The *Magnum Light Gun* is just waiting to make your day!
