PLAYING TIPS

Robin Candy's

the BASIC loader and the first block of code then type **RUN** and start the tape.

Almost all of the pokes routines supply you with infinite lives/energy or the equivalent on that game with one or two exceptions. Should you have any problems with certain routines then write in with a SAE and I will see what I can do. Sadly some of the pokes only work with certain versions of the game. Should you find that a routine doesn't work then check that you have typed it in correctly before writing in. It is a good idea to get a friend to help check the data.

A short foreword by Lloyd Mangram

The Powers That Be decided some weeks ago to give CRASH readers a small present in the form of a pull out Playing Tips Supplement, and handed me the task (thanks guys) of tying Rob Candy down to his brand new word processor (that's technobabble for typewriter with telly attached) to make sure he would get all the material sorted out in time. Lo and behold, I managed it! It was a lot of hard work, I can tell you, and little thanks I'll get for it no doubt, meanwhile Rob (the great) Candy gets all the kudos, praise and financial reward, but that's life all over, isn't it?

Still, I suppose I should accept that Robin has had to put in a tiny bit of effort as well, and we hope you will think it has been worthwhile. Over to Robin Candy...

LM

OF POKES & POKEing

Over the past couple of months or so I've been searching through old files compiling a comprehensive book of pokes and solutions which I'm sure you will all agree is quite large. There have been many times when new CRASH readers have phoned up asking what issue such an such a poke was in or in what issue a certain game solution was printed. This supplement is aimed at providing a quick reference guide to playing games — no longer will you have to search through back issues to find part of the solution for *Dragonator*. So gathered here are a hefty number of solutions and pokes with some additional hints and routines never seen before in CRASH. These include the *Sweevo's World* Editor and *Arc of Yesod* pokes. Of course if you're a newcomer to CRASH much of the information parted within these pages will be totally new. Let me know what you think of it.

Especially for the new readers to CRASH, and maybe some of the older ones, I've detailed how to put the pokes into the Spectrum. To make life easier for you all almost all of the routines can be used without **MERGE** (with the exception of the *Sweevo's World* infinite lives pokes, more of those later).

Once you have decided which routine you wish to use just type it into the computer as seen in these pages. It's then a wise idea to **SAVE** it to tape because you may wish to use it again in the future (the **SAVEing** procedure is detailed in your Spectrum manual). Once you have saved the routine to tape **RUN** it then start your game tape from the beginning. You do not have to type **LOAD** into the computer, the pokes routines will **LOAD** in the game and poke it for you. The exceptions to this are *Sweevo's World* infinite lives pokes (not the screen editor) and the *Wanted: Monty Mole* pokes.

To get the *Sweevo's World* pokes to work you must first of all type **MERGE** and then start the tape from the beginning. When the computer comes back with the **OK** message stop the tape. Now type the pokes in just before the **RANDOMIZE USR** number (the line **EDITing** procedure is detailed in your Spectrum manual). Once you have typed in the pokes you want to use type **RUN** and restart the tape from the place that you stopped it.

In order to get the *Wanted: Monty Mole* pokes working type in the routine and then save it to tape. Once you have saved the routine to tape fast forward the *Wanted: Monty Mole* tape past

THE CRASH PLAYING TIPS SUPPLEMENT

Compiled by Robin Candy

INDEX TO THE PLAYING TIPS SUPPLEMENT

The tips and pokes in this supplement were compiled with the kind help of many people. Those who did the really difficult work are credited after the game title in the index below:

ABU SIMBEL: Pokes, Phil Churchyard
 ARC OF YESOD: Pokes, Keith Walker
 ASTROCLONE: Steve Turner, Andrew Hewson
 ASTRONUT: Pokes, Paul Stephenson
 BATTLE OF THE PLANETS: Pokes, Paul Stephenson
 BRIAN BLOODAXE: Pokes, Keith Walker
 CHIMERA: Pokes, Phil Churchyard
 COMMANDO: Pokes, Keith Walker
 CRITICAL MASS: Pokes, Phil Churchyard
 CYCLONE: Pokes, Paul Stephenson
 CYLU: Pokes, Phil Churchyard
 DEATHSTAR INTERCEPTOR: Pokes, Paul Stephenson
 DRAGONTORC: Steve Turner, Andrew Hewson, Pokes, Keith Walker
 DUN DARACH: Michael Mitchell, Gary Macintosh, Kevin Penton, Keith Walker, Craig Rogers.
 DYNAMITE DAN: Pokes, Keith Walker
 ENIGMA FORCE: Peter Phillips, Graham Needham,
 FACTORY BREAKOUT: Pokes, Paul Stephenson
 FAIRLIGHT: Pokes, Phil Churchyard
 GILLIGAN'S GOLD: Andrew Wood and R Riley. Pokes, Paul Stephenson
 GUNFRIGHT: Pokes, Phil Churchyard
 HYPERACTION: Pokes, Paul Stephenson
 EVERYONE'S A WALLY: David Yardly
 HERBERT'S DUMMY RUN: J Wankling
 MARSPORT: Phil Churchyard, Robin Candy, John McCann.
 Pokes, Phil Churchyard
 NODES OF YESOD: Pokes, Keith Walker
 PYJAMARAMA: Barry Jorden
 QUILL: Pokes, Keith Walker
 SABOTEUR: Pokes, Paul Stephenson
 SHADOWFIRE: Robin Candy
 SKOOL DAZE: Pokes, Paul Stephenson
 STARION: Tim Davidson
 STARQUAKE: Pokes, Keith Walker
 SWEVO'S WORLD: Pokes, Keith Walker. Room editor, Phil Churchyard
 TANK DUEL: Pokes, Paul Stephenson
 TAU CETI: Pokes, Phil Churchyard
 THREE WEEKS IN PARADISE: Mark Peters, Graham Needham
 TIR NA NOG: Robin Candy
 WANTED MONTY MOLE: Pokes, Keith Walker

FAIRLIGHT (The Edge)

The Edge's 3D hit attracted quite a lot of attention from tipsters so here is the solution all in one go.

The first thing to do is to get the crown that is above the doorway. To do this you must stack an assortment of objects in order to climb up; a barrel and two flower pots should do the trick. With the scroll, from the first screen, cross the drawbridge and avoid the monk. Walk around the cave walls with the crown. One of the walls has a hidden door which allows access to a tomb. Inside here move one of the panels on top of the tomb and go down the hole. You will now be in another tomb with the Book of Light. Take this and use the scroll to return. Store the Book somewhere safe.

In one of the rooms with the man-eating plants there is a tower (you need a key which is guarded by a troll to enter the tower). This tower is guarded by three Monks. To get past the first you need the cross and to get past the others you need two potions. The cross is in the throne room which contains a monk; and can be found behind a panel which has to be pushed

to get it. There are three potions one is in the chequered room with two whirlwinds, another is behind two barrels in a side room which is hidden. The third potion is guarded by a monk. Use an hourglass to freeze him and then climb up and get it.

Take the Cross and two of the potions to the tower containing the monks. Kill the first monk with the cross, the other monks can be killed with the potions. You will now be in a room with a trap door above it. Using barrels and books etc climb up through the trap door but before doing this make sure you have the Book of Light with you. Climb up and you will see the Wizard. Get the key from the far end of the room and then give the Wizard the book. He will revert to his true form, an evil monk. Dodge him and climb back down through the trap door. Now proceed to the entrance of the castle and go through it using the key you got from the top of the tower and you will have completed the game.

CRASH TIPS SUPPLEMENT

SHADOWFIRE

Many of our newer readers will have seen the review of *Enigma Force* in CRASH issue 26 but if you were impressed by that it's a likely bet that you will also enjoy *Shadowfire*. Should you get hold of the game, here is one of the many strategies that you can employ to complete it.

Before setting off on your mission make sure you equip your characters properly, the booklet gives a lot of hints on how to do this. Now beam down to the fighter bay (red) and take all members except Sevrina, Syilk and Maul. Move the characters that you have beamed down S twice, then SE and E. At about this point you should be attacked by two to three aliens. Once they have been destroyed get Manto to beam down Sevrina. Go to Sevrina's object screen and get her to pick the lock which is to the south.

Once the lock is picked, using Manto beam Sevrina back to the ship. Now move your three characters S twice, which will take them to a junction with exits leading E, W, N and SW. Take the E route. You should now be attacked by a trooper from NE. Kill him and move NE twice. Moving E from here should take you to just outside a locked door which has a trooper behind — here Sevrina's talents are needed so beam her down to pick the lock. When this is done beam down the other members of the Enigma team to fight the trooper. Once all your characters are beyond the door you will be attacked by two more enemies and these have to be massacred before advancing E. Advance three of the characters that still have a good amount of strength E to attack a Marshal. Send another reasonably fit character W then N once, this will take him into the Robot Armoury. From here take the Rocket launcher, if it is too heavy then wait a while for your character's strength to build up.

By now the Marshal should be dead, if he isn't then attack him with a few more characters until he's really dead. By now all your team should be standing outside a locked door which leads SE. Give the rocket launcher to Maul. If he is too weak then drop it by him. Wait for 5 to 10 minutes for your characters' strength to build up, or for however long you think appropriate. Get Sevrina to pick the lock and advance every character through the door making sure they are all well armed. In this room you will be heavily attacked so before entering make sure your strength is up.

If you survive the onslaught you will realise you are in a room called 'Zoff Security' which has four exits. Get Sevrina to unlock

them all. Using Zark, go through the SE exit. You are now in a room that contains General Zoff, Ambassador Kryxix and the self destruct card. Zoff will try to flee so you must be quick to capture him. Go to Kryxix with Zark and you should get the report that you've found Kryxix and that he follows Zark. Kryxix will only follow Zark because Zark is the translator. Get Kryxix onto the same location as Manto and beam him aboard Enigma, you have now rescued Kryxix. Also in the Fighter Bay is Zoff's second in command, Sky Fortress Captain Churl, he is located in his quarters near the bridge. A time delay device can be found near Churl and if used properly can help capture Zoff.

The reason for not beaming all the characters down at the beginning of the game is it is quicker to move the three characters with more agility than to bother moving all six when some of them are really only any use in a fight.

To capture general Zoff position Manto outside his quarters and drop the transporter beamer. Pick the lock and send someone into Zoff's quarters. Move a character into the same location as Zoff. Zoff will then try to

escape. As soon as he moves onto the same location as Manto, beam him aboard the Enigma. A similar method can be used to capture the enemy soldiers — this saves energy.

The other half of the destruct code can be found on the Bridge but it is unlikely that you will need it because to complete the game you must capture the Zoff 5. This can be done by capturing or killing everyone on board. With a bit of practice at these strategies it shouldn't take long to complete the game.

General tips are: always rest after a good bout of fighting.

Only beam down Maul when you are in a tricky situation because he is slow to keep up with the others.

Throughout the game you will constantly be arming and rearming because your strength goes down. My strategy for this is to go into battle with a heavy weapon and switch to a lighter one as soon as the character shows signs of flagging. It is best to use some games just for mapping and exploring levels (or you can use the *Shadowfire Tuner* if you own a copy) because many rooms seem to serve no specific purpose.

ENIGMA FORCE

The sequel to the ever popular *Shadowfire* may have taken you a while to solve but thanks to some clever CRASH readers here is the solution.

- 1) The first thing to do is equip Syilk with the Fish and two ammo clips.
- 2) Now send Syilk down, then up. Collect the Keycard in here, then return to the start.
- 3) Send Syilk left, up, up, unlock the door with the Keycard, left, left, left. You should now be in an armoury so equip Syilk with a few pieces of ammo.
- 4) On the way to the armoury Syilk should meet the insectoid leader who will then say, 'I have spoken to my Queen. She is loyal to the Emperor'.
- 5) Now move your other characters to the armoury and equip them.
- 6) Now send all your remaining characters left, up, right, right, up, up, right, down and then up. Take the toolkit from this room.
- 7) Send Syilk or Sevrina to hunt Zoff down. When you have found him chase him into a room with only one exit, drop and activate the grenade and leave the room before it detonates. Now search the room in which you killed Zoff and take the Zoffcard.
- 8) Return to the rest of the Enigma Force. Then with the whole crew go right, right, right, up, up, right, down, down, right, down into the armoury. Lock the door behind you.
- 9) Use the Zoffcard and send your crew down to complete the game. If you're wandering what the Fish is used for then activate it and you will find it replenishes your character's energy level.

STARION

Here's the collected wisdom to solve the puzzles in the space action/thinker from Melbourne House. Just follow these tips to find out the answers for all 200 odd anagrams (except the last one which you should work out for yourselves).

BLOCK 1 GRID 1

AD 1858: TELEGRAM - No message for the transatlantic cable
AD 1905: RELATIVITY - Einstein's special theory
AD 1985: STARION - Be present at your birth
AD 1980: RHODESIA - Vanishes into Zimbabwe
AD 1893: ASPRIN - Herman Dresser's Headache cure
AD 1897: DIAMOND - Vicky's celebration lacks sparkle
AD 1957: EEC - Established by the treaty of Rome
AD 1831: ELECTRICITY - Faraday's dynamo output
AD 0001: BIBLE - Book for lunar Xmas on Apollo 8
GRID PASSWORD: REDBREAST

BLOCK 1 GRID 2

AD 1588: ARMADA - Drake bowls out the Spanish
AD 1815: WELLINGTON - Duke gets his feet muddy at Waterloo
AD 0814: EGBERT - Name him king of all England
AD 1883: KRAKATOA - Big bang breaks Indonesian toe
AD 1776: SEAL - Endorse the Declaration of Independence
AD 1587: AXE - Get Mary ahead in Liz's chopping basket
AD 1764: COAL - What's fuel for James' steam engine
AD 1086: PREFACE - Begin the Domesday Book
AD 1965: LEONOV - Weightless walker
GRID PASSWORD: SPACEWALK

BLOCK 1 GRID 3

AD 1924: HITLER - Author of Mein Kampf
AD 1783: BALLAST - Weigh the first balloon
AD 1879: LAMP - Edison said 'Let there be light'
AD 1942: ATOM - Fermi's doing the splits
AD 1547: IVAN - The Terrible Czar
AD 1982: SPECTRUM - Sinclair's colour baby
AD 1901: S - Marconi's signal across the waves
AD 1919: TREATY - Agreement in Versailles
AD 1889: EIFFEL - He towers over the World Exhibition
GRID PASSWORD: ESTABLISH

BLOCK 1 GRID 4

AD 1953: EVEREST - Hilary's lost his mountain
AD 1789: CAKES - The revolting French are hungry
AD 1840: PENNY - Buy the first black stamp
AD 1983: AVON - Thrust two without Blake's engine
AD 1986: HALLEY - Bill's comet
BC 2222: UMBRELLA - Noah's getting wet
AD 1888: RUBBER - Erase Dunlop's pneumatic tyre
AD 1896: AERIAL - Marconi's washing his radio
AD 1565: TOBACCO - John Hawkins is smoking
GRID PASSWORD: PARACHUTE

BLOCK 1 GRID 5

AD 1885: PETROL - Karl Benz's car won't start
BC 0219: ALPS - Hannibal's elephants are here
AD 0982: ERIC - Red man finds green land
AD 2001: ODYSSEY - A space
AD 1949: NATO - An organised treaty in the

North Atlantic

AD 1898: RADIUM - Curried discovery
AD 1959: HAWAII - Grass skirts in the fiftieth state
BC 0035: ASP - Bites Cleopatra in the milky way
AD 1895: GILLETTE - Invents the safety razor
GRID PASSWORD: ORPHANAGE

BLOCK 1 GRID 6

AD 0079: VESUVIUS - She blows her top over Pompeii
BC 0064: NERO - He fiddles while Rome burns
AD 1897: ELECTRON - JJ Thompson's single charge
AD 1869: TABLE - Rest for Mendeleyev's periods
AD 1867: ALASKA - America's bargain from Russia
AD 1944: D - Big Day in Normandy
AD 1999: ECLIPSE - Momentary darkness, just, in Cornwall
AD 1871: RIBBONS - FA cup is undressed
AD 1945: URANIUM - Ingredient of the atom bomb
GRID PASSWORD: ADVENTURE

BLOCK 1 GRID 7

AD 1773: TEA - Getting thirsty at Boston party
AD 1867: NOBEL - Dynamite without ring
AD 1756: CALCUTTA - This black hole is in India
AD 1851: EXHIBIT - Show off great crystals at the palace
AD 1812: CANNON - Overture noise makers
AD 1922: INSULIN - Pancreas gives a hope for diabetics
BC 0163: ROSETTA - Hieroglyphic stone for Ptolemy V
AD 1997: CHINA - Hong Kong takes the slow boat
AD 1042: EDWARD - He confesses to being crowned
GRID PASSWORD: ECCENTRIC

BLOCK 1 GRID 8

AD 1796: NEEDLE - Jenner's cowpox pricker
AD 1912: ICEBERG - Titanic needs a target
AD 1969: EAGLE - Big bird gives a giant leap for mankind
AD 1929: CRASH - Black Tuesday in Wall street
AD 1066: ARROW - One in the eye for Harold
AD 1953: ORB - The Queen shall have a ball
BC 0543: TRIANGLE - Pythagorus has some squares
AD 1492: BAHAMAS - To them he sails the Ocean blue
AD 0004: MANGER - What a messiah — no crib for a bed
GRID PASSWORD: COMBIMATE

BLOCK 1 GRID 9

AD 1911: POLE - Amundsen's southern flag holder
BC 0044: IDES - Caesar beware the fifteenth of March
AD 1805: NELSON - A hardy man dies at Trafalgar
AD 1969: BOOM - Concorde goes supersonic
AD 1900: HYDROGEN - Zepplin's gas
AD 1454: INK - Gutenberg's Bible is too faint
AD 1837: MORSE - Dashed clever telegraph man
AD 1914: ARCHDUKE - Ferdinand shot dead without his title
AD 1682: APPLE - Newton sees the fruits of gravity
GRID PASSWORD: AMPHIBIAN
BLOCK PASSWORD: AEROSPACE

BLOCK 2 GRID 1

AD 1882: SHERLOCK - Detective begins in 'A study in scarlet'
AD 1983: YACHT - Australia's has a winged hull
AD 1894: ARGON - Rayleigh and Ramsay's inert gas

AD 1982: HEART - Barney Clark's is artificial
AD 1971: PENCE - Britain's new pennies
AD 0570: MECCA - Muhammid's birthplace
AD 1880: EXETER - Necktie appears in Oxford college
AD 1962: MISSILE - Crisis in Cuba
BC 0257: EUREKA - 'I have found it' quoth Archimedes
GRID PASSWORD: EMPHYSEMA

BLOCK 2 GRID 2

AD 1665: RATS - Great plague carriers
AD 1666: PUDDING - Sweet lane in the great fire of London
AD 1215: SCROLL - Stationery Magna Carta
AD 1956: AMPEX - First video recording system
AD 1903: ORVILLE - He's right in 'The Flyer'
AD 1484: CLAM - From this Botticelli's Venus is born
AD 1829: OARS - Help Oxford win the boat race
AD 1565: LISA - Leonardo's morning lady
AD 1773: IRON - Metal for Coalbrookdale's bridge
GRID PASSWORD: ACROPOLIS

BLOCK 2 GRID 3

AD 1557: RUDDER - Steer Drake's Golden Hind around the world
AD 1961: PIGS - JFK's fiasco in this Cuban bay
AD 1913: GEIGER - He counts Alpha particles
AD 1602: PENDULUM - Galileo's swinger
AD 1959: SILICON - Integrated circuit is backwards
AD 1876: TELEPHONE - Alexander Graham's has a ring to it
AD 1919: AIRSHIP - Transatlantic first
AD 1932: NEUTRON - No charge
AD 1916: INTERRUPT - Prevent bullet hitting the Baron's propeller
GRID PASSWORD: STRAPPING

BLOCK 2 GRID 4

AD 0035: KISS - Judas shops Jesus with one
AD 1785: EDITOR - 'The Thunderer' needs control
AD 1935: RADAR - Palindromic Radio detection and Ranging
AD 1596: THERMOMETER - Galilei takes temperature
AD 1916: ALCOHOL - Getting prohibitively stopped in America
AD 1834: ANODE - Faraday's positive about electrolysis
AD 1928: MOUSE - Mickey the rodent is born
AD 1933: REICH - Chancellor Hitler proclaims third
AD 1853: DICKENS - Carol's Christmas author
GRID PASSWORD: TRADEMARK

BLOCK 2 GRID 5

AD 1862: LIGHT - Focault can't see its speed
AD 1854: CARDIGAN - General woolly charge of the Light Brigade
BC 0027: AUGUSTUS - Octavian's new identity
AD 1938: BIRO - He makes a point of balls
AD 1820: AMPERE - Andre - Marie's current unit
AD 1815: LAMP - Davy's minor genius
AD 1928: ANTIBIOTIC - Fleming's penicillin is the first
AD 1811: AUSTEN - 'Sense and Sensibility' Jane
AD 1961: VOSTOK - Gagarin's ship
GRID PASSWORD: BALACLAVA

BLOCK 2 GRID 6

BC 0300: EUCLID - His space is geometric
AD 1888: FILM - Moving pictures are made of this
AD 1900: LABOUR - Found working party
AD 1981: WEDDING - Royal couple couple
AD 1744: ANTHEM - 'God save the King' will become ours
AD 0037: NAILS - Carpenter's material for suspension
AD 1747: KITE - Franklin's flying conductor
AD 1948: ORWELL - Big Brother's father

AD 1907: SHELL - Royal Dutch hatches
GRID PASSWORD: **SNOWFLAKE**

BLOCK 2 GRID 7

AD 1834: ENGINE - Babbage's calculating device
AD 1000: ERICSSON - He finds a new land in America
BC 0776: ATHLETE - Olympic contestant starts the Greek calendar
AD 1590: GALILEI - He dropped his balls off the Tower of Pisa
AD 1855: GAS - Fuel for Von Bunsen's device
AD 1954: ATOLL - Hydrogen bikini on a coral island
AD 1936: GOLDS - Owens gets four in Berlin
AD 1963: RUBY - Gem shoots Lee Harvey Oswald
AD 1908: T - Ford's Model
GRID PASSWORD: **AGGREGATE**

BLOCK 2 GRID 8

AD 1941: JET - Whittle powerlessly
AD 1957: SPUTNIK - Orbiting travelling companion
AD 1981: SHUTTLE - Reusable rocket from Badminton
AD 1896: TORCH - Light the modern Olympics
AD 1898: ESCALATOR - Moving stairs in Harrods
AD 1944: IMF - Found Money fund in Bretton woods
AD 1806: ARC - Triumphant symbol in Paris
BC 0417: ELECTRA - Euripedes has a complex
AD 1721: MINISTRY - Walpole in his prime
GRID PASSWORD: **MAJESTIES**

BLOCK 2 GRID 9

AD 1553: MONARCH - Lady Jane's nine day position
AD 1941: OYSTERS - Pearl Harbour's contents
AD 1945: UN - Charter signed in San Francisco
AD 1926: ICI - Imperial chemical industries
AD 1495: PAINT - Material for Da Vinci's last supper
AD 1877: MARS - Schiaparelli finds canals here

AD 1926: ROCKET - Goddard's is liquid fuelled
AD 1974: TAPE - Watergate recording
GRID PASSWORD: **TRANSFORM**
BLOCK PASSWORD: **TWELFTHLY**
FINAL PASSWORD: **AEMSTY** (that's the anagram you have to work out for yourselves)!

SWEEVO'S WORLD EDITOR

This may all look rather daunting! Those who can't face typing it in might opt for the cassette version (see offer, plug, plug)! However, the end result is rewarding as it allows you to create your own personalised *Sweevo's World* game.

There are four programs to the *Sweevo's World* room editor but if you own a tape then you will only need two of them, only microdrivers need three.

Type in the **editor** program and save it to tape for future use. Then run it and edit the screens. When you are satisfied with your edited screens save the code out as detailed in the editor's instruction below. To play *Sweevo's World* with your new screens you must type in the **tape load** program (save it to tape for future use). Then start your *Sweevo's World* tape from the beginning. Once that has loaded you are prompted to load in the saved data created by the editor, and once has loaded the altered game starts.

Microdrive users must first type in the **ROM** program and run it. This program

checks to see if your Interface I is compatible — if you are told that it isn't then you will have to use tape. If your interface I is compatible then the next step is to type in and **RUN** the **Save Sweevo** program (use a cartridge with nothing on it because the program automatically formats it). This program saves *Sweevo's World* to microdrive in a form that allows the screen data to be loaded into the editor. Now type in and run the **editor** program (you can save it to microdrive). Once you have done this you can edit the screens. Save your created data to microdrive. To play the game load the file off microdrive called **Sweevo**, this loads in the data etc and starts the game for you.

The editor itself allows you to alter the appearance of any room in the game, you can change its colour, move objects and generally alter everything in a room. Once you have got the editor up and running you can do the following things:

1-7: these keys alter the ink colour of a room
G: gets a room from memory and displays it ready for editing. You must follow G with a

number between 0 and 255

W: writes the screen you are editing back into memory

C: clears the room of objects except the brownies and other special objects

X: lets you change the exits of a room. Once pressed an exit starts to flash press **Y** accept that exit or **N** to destroy it. Space exits this mode.

E: this actually lets you edit the screen. A flashing cursor appears which can be guided around with **Q**, **A**, **N**, **M** or a Kempston joystick. To place an object press enter or the fire button left and right then cycle through the possible objects that you can put on that screen, enter selects that object and draws it where the cursor is.

Pressing **O** on this screen moves an object such as a can or a brownie to the position of your cursor. Press space to exit this screen. **S**: saves the game data to tape. If you have a compatible interface I you are also given the option to save the data to microdrive.

L: this is the same as above except it deals with loading data.

DRAGONTORC (of Avalon)

Here's the complete solution to Steve Turner's massive arcade/adventure on the Hewson label.

The best single hint for this game is befriend the elves, they are the key to bring down Morag the Shapeshifter. The first two levels are fairly easy so I shall only skip through them.

On the first level find a **Bow and Arrow** and using the **Servant spell** give it to one of the elves, you should receive a **Sickle** (or **Scythe** if you prefer) in return. With the **Sickle** cut down the **Herb** in one of the locations, this should give you an **Energise spell**. Under a slab in the first level there should be a **Jewel**, trade this with an elf to get a **message** which gives a clue as to what you have to do later on in the game. Also on the first level there is a **Missile spell** in the pool — this is useful in the Lost Vaults. Take the **Message** to the other stone slab on the first level using the **Servant spell** and this should open up a passageway down to the next level, the Lost Vaults. Leave **Merlyn's Seal** in the Henge before descending the passage way.

VAULTS OF LOCRIIS

Like the first level this is fairly simple to solve but progress is continually hampered by the **Skelebones** and later on by the **Spiders**. So it is a good idea to travel around the Vaults just zapping **Skelebones** with your **Missile spell** to clear the way before you start solving the puzzles. To get out of the Lost Vaults you must collect the letters **X**, **I** and **T** place these on top of the letter **E** so as to spell **EXIT** and that takes you to another level, a **Cube** is then revealed which you just touch to return to the Stone Circle.

The main problem in the Vaults is finding the location of the letter **I** (the other two letters are easy to find; one is in a dead **Skelebone** and the other is in a pile of rubbish). Go to the room with the stool and fireball in it and move the **Servant** over the stool; this will change it into a chest. Open all the other chests in the vault and you should have two keys. One of these opens the chest by the fireball. Open this chest and the fireball should change into the **half-moon** and inside the chest is the letter **I**. Also in one of the other chests is the **Leyrod spell** which is important for the next stage of the game. With the **Halfmoon** and the **Leyrod spell**, return to the Stone Circle via the **Cube**. Check pools etc for other spells before leaving.

WEBWOOD

Presuming that you have got out of the Vaults of Locris and are now in **Weird-henge**; use the **Leyrod spell** to reveal **Leycubes** in the Henge. These cubes take you to different locations in the game. Follow the route of the **Yellow Cube**, this should take you to the area of the **Blasted Forest**. Now use the **Leyrod** in the Henge of this area and again take the route via the **Yellow Cube** which will take you to **Webwood**. Make sure you have got **Merlyn's Seal** when in this area. First of all find the stick — should a spider bite you then it is possible to stop the energy drain by using the **Heal spell** (found in the Vaults of Locris). Now move the stone with the stick and take the axe which lies beneath. Use **Merlyn's Seal** to move the flagstone, go down the hole. You should now be in **Merlyn's cave**. Read the **Message** that is in a chest, this can be unlocked using **Merlyn's Seal**. Leave the **Message Scroll** and the **Halfmoon** (this was obtained from Locris). Use the **Servant spell** on the table in the adjacent room and take the **Milk** and the **Warrior Gem**. Go down the exit and axe the stump. Find a log and put

the **Milk** near it to reveal a **Hedgehog**, take this. Go back to the axed stump and use the **Hedgehog** on it to reveal a **Key**. With the **Key** and **Merlyn's Seal** go back down into **Merlyn's cave** and unlock the locked door with the key. Open the chest inside that room with **Merlyn's Seal** to find **Halgor's Seal**. Take this and the **Halfmoon** and proceed to **Halgor's sanctuary**.

HALGOR'S SANCTUARY

In **Halgor's Sanctuary** go and find the **Energy Herb**, take this. Now find the dead **Skelebone** and search it to get the **Divining Rod**. With the **Divining Rod** search the leaves and pools to receive the **Bane Jewel** and the **Crystal of Anti-thought**. Use the **Halgor's Seal** to open the tombstone and go down. Once you have descended read the message and leave everything here except **Halgor's Seal** and go through the door. Touch the **Seal** on the three **Spiders** before they kill you, take the three spells that appear once the **Spiders** have been killed. Use the **Return spell** to get into **Halgor's tomb room**. Now search the tomb for the door key to get out. Leave with **Halfmoon** and go to **Witchwood** to find **Sanctuary** and the key to the **Locris Vaults**.

You should now be in **Witchwood**. Find the message that says *Batswing, witchleaf, frogleg will reveal*, and then collect the **Bat**, the **Herb** and the **Frog** (it's in a pool). Now put these into the cauldron and get the **Wand** that floats out.

Go next door and use the **Wand** to move the flagstone, take the **Elf Gem** and the **Spell**. Give the elf that wanders around the woods the **Gem** in return for the other half of the **Moon Key**. Now construct the whole key and take the **Full Moon**. Deactivate the **Magic Sword** with the **Wand** and take it. Now with the **Magic Sword** cut down the sapling to make a **Magic Broom** with which to sweep the leaves. You should then find a second large stone and a message. *What full moon reveals take it with steel*, this means use the **Moon** on the stone but don't go without the **Moon** or **Magic Sword**. Before you go, move the other flagstone in the woods for the **Light spell**. Now proceed to **Sanctuary**.

You can kill the goblins with the **Missile spell** and protect yourself against the **Demon's** missiles with **Mantle**. If you walk into the **Cursed Scroll** you are transported to a doorless room. Use the **Leyrod** to reveal the exit. Uncurse the **Scroll** with the **Sword** to get the message *The Vault of Locris is opened with Sunkey*, this is the object you are looking for. One of the goblins has the **Sunkey** and another has a green chest key

which opens three chests. In dark rooms use the **Light spell**. In one of these rooms is a **Cursed Wand**, use the **Sword** on this to take the curse off which then gives you the message *I can find what I hid where it is blackest*. Now use the **Sword** on the **Magic Spiders** to gain some more spells. Unlock a green chest with the green key to get the message *One leads to a gate through the other locate*. This is meant to be read in conjunction with the message you get on the **Locate spell** which you receive when you destroy the winged demon.

Look for two doors side by side — one has an **Exit Cube** in it — then you must use **Locate** inside it to find a green chest which is unlocked by using the green key. Take the **Cursed Key** which has a message from inside the chest. The message is *One lost, one in ruins, one in hell, one cursed*, this gives you clues to the whereabouts of each of the **Crowns**. It also gives you the order in which to destroy them. To get to the two doors side by side two keys must be found. One is *where it is blackest*, ie, in a dark room. Use the **Light spell** to light the room and search the room with the **Wand**. The key is on the back wall under a stone carving. Also search the tomb with the **Servant** for the **Wall spell** and kill the **Wraith** with the **Bane spell**. Use the door key to open the locked door by the goblins and inside is a green chest which is opened with the green key. Leave the old door key and take the one that you have just got out of the chest. Now proceed through a dark room and open the locked door, at the other side, with the door key. Go through this door and you should be in the room with the doors side by side.

Use the **Fullmoon** and the **Sunkey** to reveal the **Exit Cube** and leave with the **Sunkey** and **Cursed Key**. Now go back to the **Vaults of Locris**.

VAULTS OF LOCRIIS

Once inside the **Vaults of Locris**, open the locked door with the **Sunkey**. Now search the tomb with the **Servant spell** and you will find the **Undo spell**. In the next room avoid the fireballs and use **Bane** to kill the nearby wraith. The doorway to the room with the **Crown** in it is cursed. So use the **Undo spell** to remove the curse, otherwise as soon as you enter the room you will automatically be transported to a room which used to have **Spiders**. Once you have removed a curse (a moon symbol appears), use the **Undo spell** to release the **Crown** and take it. Now use the **Return spell** and place the **Crown** on the **Anvil** and destroy it with the **Crystal of anti-thought**. You can take the gold remnants for trading with elves.

DREAMDOWNS

Now that you have destroyed the first Crown of Dragontorc proceed to Dreamdowns. If the dwarves are bothering you lead the elf into them and they will be killed, alternatively they can be destroyed using the **Warrior spell**.

Look for the **Squirrel**. Once you have got him use him to search the leaves for you to reveal a **Stone** and a **Torch**. Now light the Torch on the camp fire and take a **Bow** to the elf. The elf in return gives you a **Nut**. If you give this to the Squirrel he will crack it open and reveal the key that is inside, take this. Now enter the ruins with the elf.

Inside the ruins open the chest with the key and take the **Snake Symbol**. Use the Snake Symbol to move the flagstone, take the **Demon spell** that lies underneath. Now go out of the ruins and use the Snake Symbol to move the flagstone on the woods to reveal an entrance. Go down the entrance with the Snake Symbol and the **Lit Torch**.

Go through the first door you meet and turn off the **Snake Generator** with the Torch (place the Torch on the Snake Symbol that is on the wall). Now kill any snakes that are still about with the Snake Symbol. Open any locked doors with it and kill any snakes with the **Lit Torch**. Open the locked chest with the Snake Symbol (leave the Torch on the floor just in case you get attacked by snakes. Take the **Crown Symbol** from the chest, if there is no Crown but another snake symbol then put the two snake symbols together to make a Crown Symbol. Beware of the axe and fireball room it is advised that you use the **Slow** or **Unseen spells** if necessary. Search the tomb with the **Crown Symbol** to reveal a **Crown** and a **Message**. The message *When 4 are gone smite anvil with stone* means use the **Crystal of anti-thought** when four of the Crowns are destroyed. Use the **Snake Symbol** on the other Snake Symbol to reveal the exit or use the **Return spell**. Place the Crown on the Anvil to destroy it.

TROLLSTONES

With two crowns destroyed you should now travel to Trollstones. It is best to use the **Warrior spell** on the deadly yellow imps to kill them before trying to solve any of the puzzles. It is also helpful to have the **Lit Torch** and you must have the **Demon spell**.

Search the leaves using the **Servant spell** to get the **Bane Gem**. If you catch the Bird the flies around then you will get the message *Set a thief*. Search the **Stump** for the **Coin** and put it in the water. Jump into the pool to go to Hellsmouth.

HELLSMOUTH

Hellsmouth is inhabited by bats that can be killed using the **Missile spell** and you can kill the snakes using the **Torch**. Find the **Axe** and use this to smash the **Eggs** (place the torch on the floor to kill the snakes), now take the chest key. Look for the chest and open this with the key to get the **Crown Symbol**. Now here comes a tricky bit — place the Crown Symbol on the Cursed Key while avoiding the balls of red fire. Either **Unseen** or **Slow spells** can help here. Now take the key and use it to open the locked door. When the Demon appears use the **Demon spell** to destroy it — *Set a thief to catch a thief*. Take the Crown. Kill the eyes with **Bane** and place the Crown Symbol on the stone to reveal the exit or use the **Return spell**. Place the Crown on the Anvil to destroy it.

CURSED CRYPT

The Cursed Crypt is the last place you will have to go to get a Crown to destroy. To get there go to Torhenge. The woods are uninhabited but a goblin patrol has found a chest there. Use the **Mantle spell** to protect yourself from the Demon's spells.

Find the **Rabbit** and place him down the hole to get the key. Now find the chest which you should unlock using the key you just obtained. Take the **Ankh Symbol** from the chest and go back and get the **Rabbit**. Find the single hole and place the Rabbit down it, avoid the snake. Take the spell from the hole. Now take the Rabbit to the **Carrots** to reveal the flagstone. Use the **Ankh** to move it. Go down the hole with the **Cursed Key** and the **Ankh Symbol**. The Torch is useful.

The underground is inhabited by wraiths that can be destroyed using the **Bane spell**. In the room with the **Ankh Symbol** on the wall put your Ankh Symbol on the wall to stop the Skelebones appearing. The symbol changes and falls to the floor, take it. Do the same process of matching symbols in another room to stop the Skelebones appearing. This will also make a **Crown Symbol**, take this. Match the Crown Symbol with the Crown Symbol on the wall to reveal the exit.

The **Cursed Key** opens many of the locked doors in the Cursed Crypt. Beware of the invisible snakes that become visible when they touch you, use the **Heal spell** if they bite or **Mantle** to protect yourself from them. Take the small blue key and open the blue chests to get a spell and a doorway. Using the doorway open the locked door that leads to a room with 3 wraiths in it. Use **Bane** to kill the wraiths and use the doorway to open the door at the other end of the room. Keep the **Bane spell** on and search the tombs for spells. Search the tombs with the **Crown Symbol** to get the Crown but avoid the Crown that drops. Take the Crown to the Anvil and destroy it. Now place the **Crystal of anti-thought** on top of the **Magic** to get the message *Now crystal can tame 5 legged Morag's Bane*. Take the **Crystal** to the Cursed Crypt and tame the **Hand** with it (just touch the Hand with the Crystal of anti-thought). Leave the **Gem** behind and take the Hand.

WYRMWOOD

With four of the Crowns destroyed you are ready for the final showdown with Morag so proceed to Wyrwood the realm of the shapeshifter. This area is inhabited by any evil creature that Morag has summoned to her cause.

Search all the woods, pools leaves etc with the **Servant spell** to get spells and **Elf Gems**. Find the elves and give the Gems to

them and you will get a **Torch**, key and **Missile spell** in return. Use the key to open the chest and get the **Detect spell**. **Light the Torch** on the goblin fire and use it to kill the snakes. Beware of the **Flying Cube** that transports you back to the stone circle. You must decoy it otherwise it will be waiting for you. Use the goblin's key to open the chest to get a **Bow** and a doorway. Give the Bow to the last elf. Open the locked door with the doorway key (beware of the cube and remember to kill the snake). Kill at least one of the goblins inside the citadel to persuade the elves to follow you. Lead the elves into the goblins to preserve your missiles, the elves will kill the goblins for you. Unlock the next locked door with the doorway key and lead the elves through but beware of the magic balls. Unlock the next door with the same key, kill the bat, avoid the magic ball and unlock the door on the left. Two of the rooms on the citadel have invisible goblins guarding chests use the detect spell to show them. The elves still can't see the goblins so you will have to lead them together to destroy them. Take the key and open both of the chests. Take the **Pentagram Symbol** and the **Undo spell** from inside the chests. In a room there is a **Pentagram Symbol** on the floor — place your symbol on top of it to reveal a **Decoy Cube** that takes you outside the citadel. Leave the Symbol and key here.

Beware of the Demon who takes away Morag's ability to open doors. Use the **Mantle spell** to protect yourself and the **Missile spell** to destroy it. Demons can sometimes kill elves and vice versa. The way to Morag is past a room with a flashing imp in it — don't touch it otherwise you will be transported back outside the citadel. Lead the elves into the final complex. Try to destroy the skelebones and demons yourself because they might kill the elves. Find the pool to replenish your energy. Find the green key and put it on the floor, now put the **Lit Torch** near it and snakes will come out. Kill the snakes with the Torch. Now use **Undo** on the key and open the chest with it. Take the white key from the chest but leave the **Symbol** there for later. Unlock the locked door with the white key and lead the goblins away from Morag's protection so that the elves can deal with them. Beware of the invisible spider, kill him with the **Missile spell** or with an elf. Now you should be in Morag's room.

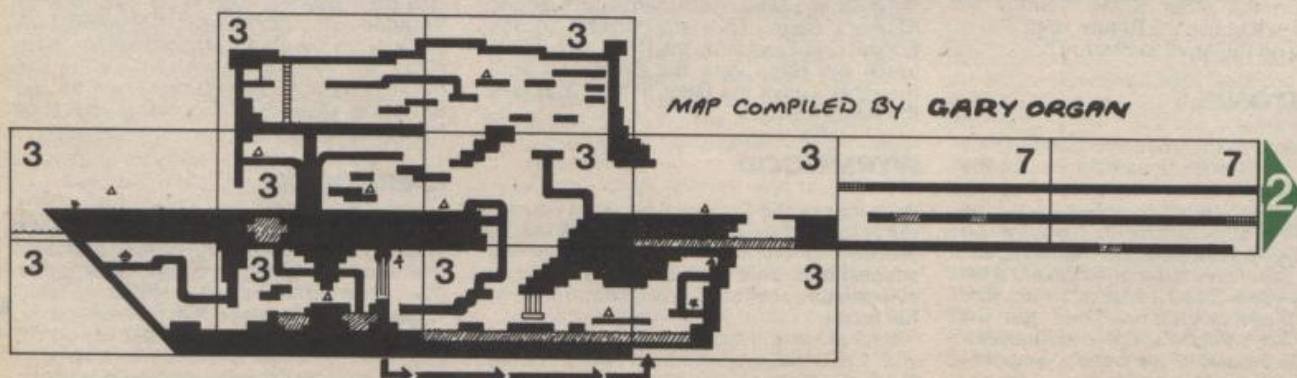

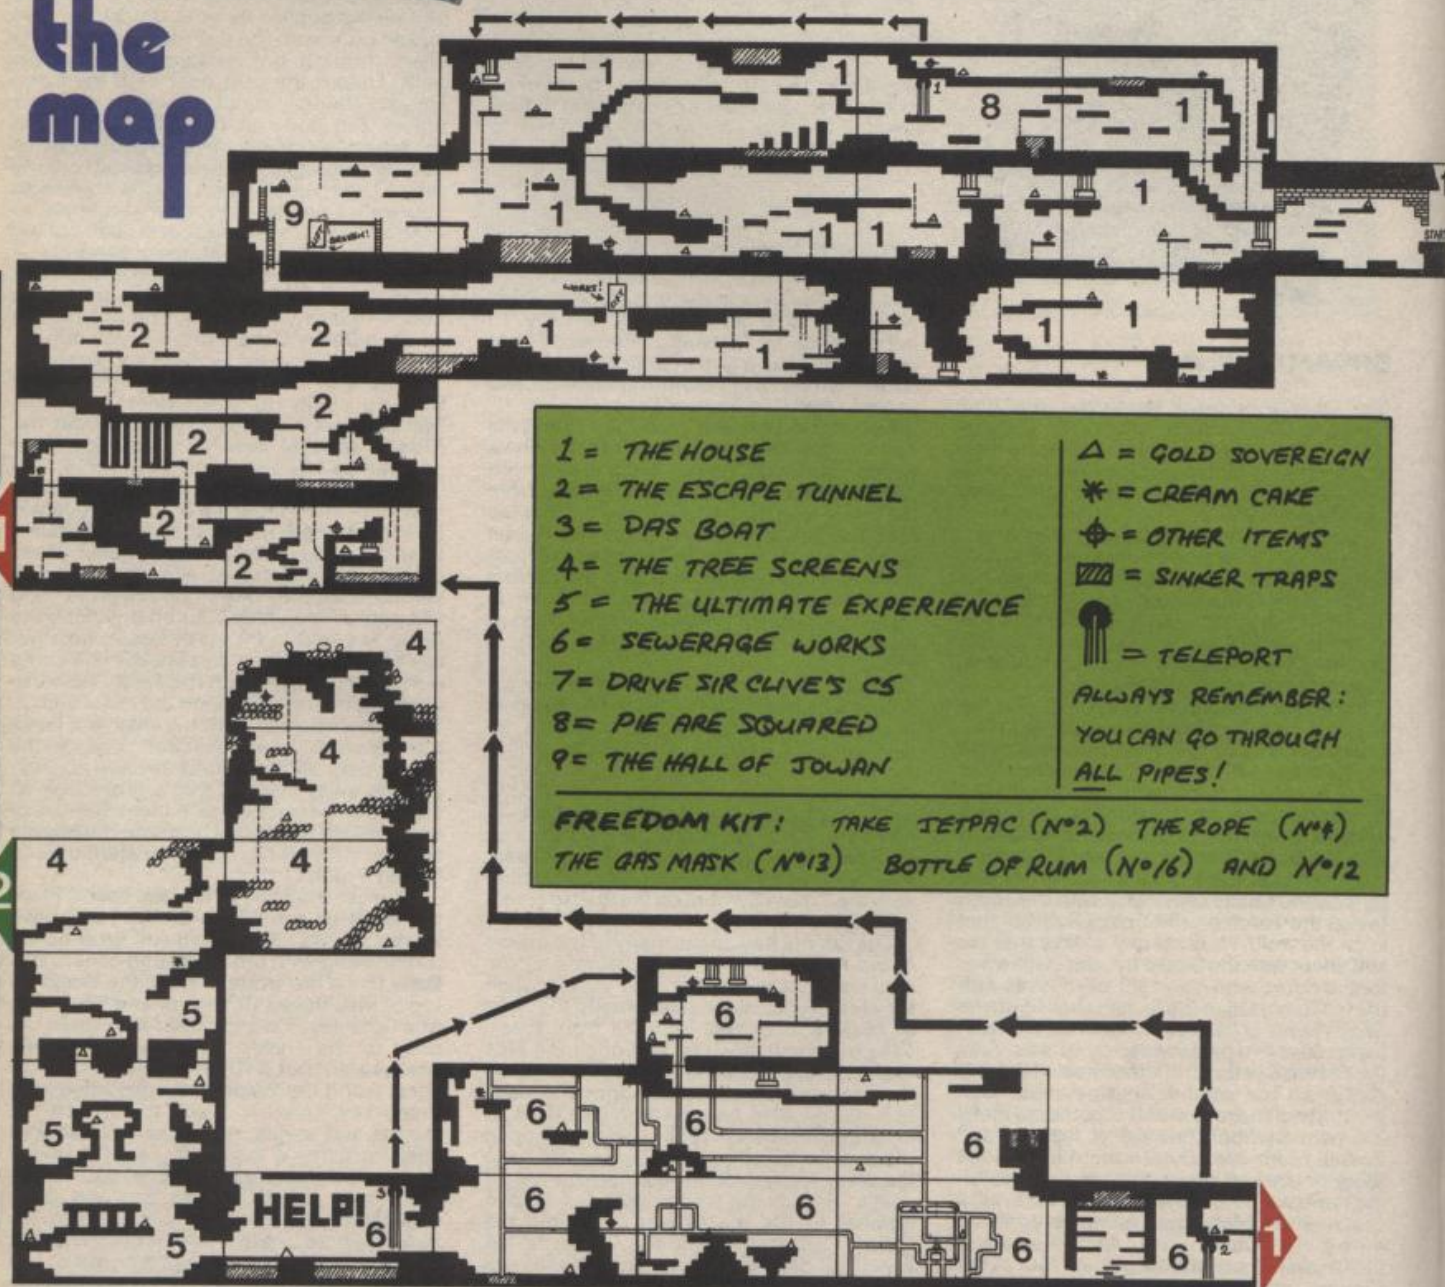

Here use the **Slow** or **Unseen spells**. Place the **Hand** on top of the **Crown** just above Morag's head. The Crown will drop down, take it along with the **Wand** and go left. Use **Bane** to kill the wraiths. Place the **Wand** on top of the **Fireball Generator** and it will turn to a doorway. Take the doorway key. Open the door to the snake room and kill all the snakes with the **Lit Torch**. In this room find a chest using the **Wand** and open it with the green key. Use the **Wand** to turn off the snakes and magic, now take the **Mindkey spell** from inside the chest. Take the **Wand**, **Crown** and **Pentagram Symbol** back to the room with the **Exit Cube** and the other **Pentagram Symbol**. Leave the **Pentagram Symbol** there. Open the next door with the **Mindkey spell**. Use the small yellow key from the invisible goblin room to open the chest but beware — axes fly out. Use the **Wand** to switch the axes off. Now take the **Pentagram Symbol** from inside the chest. Place one symbol on top of the cube and missiles fly out. Place another one on and the cube reappears. Go down the cube taking the **Crown**.

CAIRNDOOM

You will now be at Cairndoom which is the final set of locations. Open the doors with the **Mindkey spell**. Deal with the goblin, dwarf and demon guards using the **Missile spell** and **Warrior spell** then look for a room with a **Giant Stone** in it. Use **Mindkey** on this Stone and Merlyn is revealed. Now give Merlyn the last Crown to end the game.

MARSPORT

The first in the *SIEGE OF EARTH* trilogy has you controlling Commander John Kepler Marsh in a bid to get the plans from the doomed Martian city. Having trouble getting them are you? Then fret no longer because detailed below are the instructions that John took to complete his mission.

- 1) Get the Gun permit from sector g level E.
- 2) Put the Gun permit in the key locker in sector d level D.
- 3) Get the Gun from the locker.
- 4) Collect the Baking Tin, Water and the Flour from sectors a, d and c of level D. Put them in a Factor unit to make a Cake.
- 5) Put the Cake in the Bakery Key slot in sector f level D.
- 6) Get the Dough from the Bakery.
- 7) Take the Up tube from sector f level D to Level A.
- 8) Get the first key to m-central from the Director room.
- 9) In able to go South from sector c level E you must put the Dust bomb in the refuse chute.
- 10) Get the Gauze from sector h level J and the Charcoal from sector g level D.
- 11) Combine these two items in a Factor unit to make a Gas mask.
- 12) Go West from sector c level I. Leave the Gas mask in the locker once the dust bomb has exploded.
- 13) Get the Cornet and the Ice pack from the Ice cream room in sector a level I.
- 14) Put the Cornet in the Key slot of the Music room in sector a level F.
- 15) Get the Earth map from the Map room in sector g level I.
- 16) Put the Earth map in the Key slot to the Soil depot on sector e level G.
- 17) Put the Ice pack in the key slot of the Hot room on sector c level G.
- 18) Get the Geranium from the Hot room.
- 19) Put the Geranium in the Key slot to the Plant room on sector h level J.
- 20) Collect the Sun chart from the Map room in sector g Level I, the Glass from sector h and the frame from sector e. Combine them in a Factor unit to make the Eyeshields.
- 21) Take the Up tube from sector a level G to Level A.
- 22) Now that you have the Eyeshields it is safe to enter the Astronomy in sector b level A.
- 23) After the Nova bomb has detonated put the Eyeshields in the locker.
- 24) Take the Down tube from sector i Level A to Level B.
- 25) Put the Dough from the Bakery into the key slot by the Bankers on sector e level b.
- 26) Once inside the Bank take the second key to m-central.
- 27) Get the Dais from the Oratory on sector i level B and the Lute from the previously opened Music room.
- 28) Combine the Lute and the Dais to make the Lead suit.
- 29) Go East from sector a level B and after the Radiation bomb has gone off put the Lead suit in the locker.
- 30) Take the down tube from sector c level B to level J.
- 31) Get the Boots and the Earmuffs from Safety room on sector c level J.
- 32) Put the Boots in the Key slot to the Chemists which is situated on sector i level D.
- 33) Get the Machine from sector e level B.
- 34) Go West from sector a level G through the Danger room.
- 35) To deactivate the bomb and open the locked door just put the bomb into the Key slot.
- 36) Go North from sector b level G but only if you have the Earmuffs.
- 37) After the Sonic bomb has exploded put the Earmuffs in the locker.
- 38) Take the Up tube from sector f level G to Level C.
- 39) Get the Steps from sector b level C.
- 40) Combine Empty tank, from sector a level A, and the Oxygen from the Chemists to make an Air tank.
- 41) Go East from sector a level C.
- 42) After the Air runs out put the Tank in the locker.
- 43) Take the Down tube from sector g level C to level F.
- 44) Enter the Games room in sector g Level F.
- 45) Combine the Steps and the Calculator to make the Snakes and Ladders games.
- 46) Put the Game in the Key slot.
- 47) Take the Down tube from sector c level F to level H.
- 48) Take all three keys to m-central (the first is in the Director room, the second is in the Bankers room and the third is in sector g level F).
- 49) Put key one in the key slot inside the control the room on sector a level H.
- 50) Put key two in the left hand key position outside m-central on sector h level H.
- 51) Put key three in the right hand key slot and enter m-central.

Stage 1 is now complete and all restricted doors are now open.

► MARSPORT

Stage 2

- 1) Go to the sanctum to get the clue *I'm the sentry; 5 pairs for entry; city through, 5 screens each two.*
- 2) Get the Mars map and put it in the key slot of the Bar (Marsbar, see).
- 3) Get the tea from the Bar.
- 4) Go to sector d level G and get the insect.
- 5) Get the syringe from the Chemist (open it with a pair of boots) on sector c level D.
- 6) Get the point from the Oratory sector i, level B.
- 7) Combine the above four items to make the antidote.
- 8) With the antidote go east from sector e level c and enter the danger room. When until the countdown has finished and then put the antidote in the locker for future use.
- 9) Get the clue from the vidtex unit on sector h level C. *One monkey says why the other two can't.*
- 10) Make another eyeshield and get another pair of earmuffs.
- 11) Combine the earmuffs and the eyeshield to make the Y token.
- 12) Get the valium from the chemist and go north from sector b level B.
- 13) Enter the danger room and wait until the nerve bomb has done off. Put the valium in the locker for future use.
- 14) Get the topee from sector f level B.
- 15) Get the kettle from sector f level F.
- 16) Put the kettle in the key slot of the boiler room on sector i, level J.
- 17) Get the helmet from the boiler room.
- 18) Combine the helmet and the topee to make the power booster.
- 19) Combine the power booster and your gun to make a hypergun, you can now kill the Sept Warlords.
- 20) Get the clue from the Vidtex unit on sector f level B. *One is holy with skill after church.*
- 21) Get the strainer from the bar on sector c level F.
- 22) Get the sunchart from the map room.
- 23) Combine the sunchart and the strainer to make the N token.
- 24) Go west from sector d level E and kill the Warlord.
- 25) Now go and get the clue from the Vidtex unit on sector f level E. *One says nothing, the other says it all.*
- 26) Get the mute from the music room.
- 27) Get the manifesto from the oratory.
- 28) Combine the mute and the manifesto to make the E token.
- 29) Go to sector i level D and get the clue from the Vidtex unit. *One draws near and throws away.*
- 30) Get the charcoal from sector g level D.
- 31) Get the projector from the oratory.
- 32) Combine the charcoal and the projector to make the T token.
- 33) Go west from sector g level I and kill the Warlord.
- 34) Get the clue from the Vidtex unit on sector d level I. *One is easy and full of aplomb.*
- 35) Make another cake and another lead suit.
- 36) Combine the cake and the lead suit to make the R token.
- 37) Combine the E, N, T, R, Y tokens to make the key.
- 38) Put the key in the key slot in the sanctum sector e level H.
- 39) Go west out of the sanctum.

Stage 3

Do not collect the plans straight away because you will not have enough time to escape if you do, but instead follow these tips.

- 1) Get the clue from the Vidtex on sector d level j. *7 from 10 makes you a bighead.*
- 2) Collect the E codex from sector i level J.
- 3) Get codex D from sector d level I.
- 4) Get the G codex from sector i level H.
- 5) Get codex B from sector g level G.
- 6) Get the T codex from sector e level F.
- 7) Get the U codex from sector f level E.
- 8) Get the W codex from sector e level D.
- 9) Get the I codex from sector h level C.
- 10) Get the H codex from sector g level B.
- 11) Get the N codex from sector i level A.
- 12) Now get the codex's from levels B, I, G, H, E, A, D and put them in a factor unit.
- 13) You will now get a message HD6 GUNW.
- 14) Go to the map reference HD6.
- 15) Face West (make sure your gun is fully charged) and fire your gun at the wall.
- 16) The screen will flash.
- 17) Now go to the main few and you will see an Up tube.
- 18) Get the plans.
- 19) Go Up the tube and escape from Marsport through the Spacefield door. That's it!

ZOIDS

HELLRUNNERS — Patrol individual city networks
SLITHERZOIDS — Carry supplies around city networks
SPINEBACKS — Based inside city domes unless alerted to danger — then they attack intruders
SERPENTS — Patrol valleys looking for Blue Zoids
REDHORN & MAMMOTH — Roam valleys unless alerted by beacons Networks are numbered.

ASTROCLONE

Hewson's *Astroclone* saw *Dragonarc* programmer Steve Turner returning to more of a space theme, mixing arcade with his now well known 3D routines. He generously gave me some tips for the game. Just to liven up the reading material they are done in story form so even if you don't own the game hopefully you'll enjoy the tale.

TECHNIBO ANDROID WORKS

After a short but deadly struggle the Astroclone assault ships fought their way through to their first target, the Technibo Android Works. The ruins left behind were once the robotic droid manufacturing plant of the Sei. The craft slowly, gently, docked with the alien satellite; Manipulating the transporter controls the first Clone beamed down, laser on stand by. The base defences sprang to life; these consisted of spider-like droids who, though they were unarmed, were deadly if they caught hold of a Clone with their mechanical grapples. One spider droid possessed a spanner which, when inserted into a terminal, shorted out other terminals one by one, shutting down the launch systems. That put a spanner in the works, the Clones' mind simultaneously mused.

The Clone manoeuvred throughout the base and stumbled across a room guarded by several droids inside which he found the **Graviton Device**, a radio-like object. Once the Clone had obtained this, through precision use of his laser pack, he was able to retrieve a sonic key from a grill in the floor through which it had fallen. This key was used to open an **Isocase** (for the uninitiated this is a curious device which can hold many objects that are several times its outward shape). Searching through the box, the Clone discovered a **Transmat Card** which, after much experimentation, was found to operate the **Beam Point** from Technibo when used in the correct terminal.

While journeying through the base several enemy turrets were discovered but these proved no match for the Clones weaponry and fast reactions.

Eventually the lower level was penetrated and a message discovered informing of an invisible pass carried by a droid. Once the droid, behind a locked door, had been eliminated a **Visiray** that lay beside the message revealed the pass. To open the door a **Securipass** formerly owned by another droid was inserted into the security panel. Also in the locked room was a different kind of message.

On reading, it transpired to be from another time, detailing how the Sei assault force perished in Synchron HQ. This last, desperate message explained how they had left six more messages hidden in Synchron HQ. The Clone returned to the ship with the HQ pass, which had been revealed by the Visiray, to battle the Seiddab in order to find Synchron HQ.

ALTOS

Fierce resistance was met in the Quadrant Command base. A deadly laser battle erupted between the assault Clones and the defending Securidroids. Deep within a

complex of crystals caves enemy snappers lay in wait, quietly dropping on unsuspecting Clones as they entered. Progress was halted by two warp devices that, when touched, transported the Astroclone to a terminal room where Securidroids waited, guns activated. The multi-mind of the Astroclones computed that an object of sufficient mass dropped on the warp fields would deactivate them. A rock proved to be the object required.

The Astroclones cautiously explored. On entering a large cavern three armoured mine-droids attacked. Defence was futile. Laser fire glanced off their hardened exoskeletons. The Clone darted into a nearby chamber where a force field almost drained him of life. As the pursuing droids entered, the Clone braced himself for attack. Positioning himself behind the force field he waited. In order to eliminate their target the droids crossed the force field, with devastating effects. More of the same type of droids were found and dispatched in a similar way. As one of the droids evaporated into the field, a thermal lance was left behind.

Stumbling on a locked security door, the Astroclones pondered the problem. The answer lay in the message in Synchron. If only it could be found. In an attempt to remove a crystal attached to the floor of a cave, the Clone used a thermal lance. To his surprise the crystal shattered revealing a **Sonic Key**, that had formed as a perfect crystal having lain undisturbed for two millennia. The key opened another Isocase. On further examination this case was found to contain a destruct program which could be loaded into the launch computer and the base shut down. Another terminal gave no result. What was its program? Perhaps the answer was in Synchron.

FRONTIOS AND SPECTROS

Two more bases were isolated. Frontios Galactic Outpost had proved to be virtually defenceless. A locked door proved to be a problem until it was short circuited with a computer. This was charged up by smashing a terminal with a hammer. An Astroclone found shrouded death in some alien caves hidden behind a door. There, two thousand years ago, the Sei had first encountered the malevolent snake-like Kri; ending their civilisation. In the narrow tunnels Kri pods erupted. The young Kri were deadly if touched but as yet unable to send the fatal mindbolts that the adults used as their means of attack. The Clone squeezed past. After a deadly encounter with many snappers a wire was found. This was used to fish a transmit card from an old burrow. The wire also proved useful in

shorting out the last terminal, shutting the base down. Strange signs were found in two of the rooms.

On Spectros the **Move Maintenance** droids were quickly despatched with few losses. A **Destruct Device** when held in the hand proved able to demolish any droid in the base and it was used to great effect, so the Astroclones proceeded with minimal difficulty. A detector was used to find three craftily hidden artifacts, an **Isocase**, its **Sonic Key** and a **Pass**. The Isocase contained the **Acron Device**, the only weapon capable of destroying the Kri which up until then had wrought many casualties on the invading party.

The pass opened two doors. Behind one a very small unmovable object sat heavily guarded by a terminal issuing bolts of pure energy. Many rooms were guarded by that ultimate class of droids, the **Battle Cyborg**, floating on their antigrav pads they were a deadly opponent causing many losses. In two rooms energy balls blossomed out of nowhere. There, invisible creation devices when shot with lasers, revealed two more securipasses. Behind the locked doors code cards and a wire were found. The cards deactivated the strange defence terminal, the wire shorted the launch terminal revealing the exit beamer.

SYNCHRON HQ

At last the Sei headquarters had been found; it was here that the six messages were hidden by the last of the Sei in their final, desperate attempt to fight off the Kri.

Synchron HQ was defended by **Spherical Sentinel Droids**. Luckily for the Clone force these were of an earlier class without the dreaded phased beam weaponry of later Cyborg models. Still, resistance was tough

but eventually the droids succumbed to the powerful Clone laser fire. Locked doors were encountered but a small **Utility Robot** when powered with a battery proved able to control these and all the beamers on the base.

The control room was cleared of droids, not an easy task but one that resulted in few losses for the Clones. One owned a Sonic Key which opened an Isocase containing a cassette with magnetic recoding tape in it. On the tape was a C64 program captured twenty years before from an Earth computer museum. Wondering what a Llama was, he inserted the program into a drive.

The launch computer promptly freaked out.

The HQ pass gave access to a beam room which the robot activated. The Clone beamed down to a crystal mine guarded by deadly laser-beaming Mine Droids. Many Clones were lost in this battle before the mine was cleared. But the effort was worth it because two messages were found down tunnels, and another two by using an **Auto-grab** to fish behind a rock and in a hole. A message on the ceiling had to be shot down. The final message required blasting out from a heap of rock. Explosives were placed and the detonator pushed. A code card 'Alpha' was also revealed. At last, all six messages were carefully pieced together — here was the information the Clones needed in order to complete the mission!

But first Termina had to be taken.

TERMINA

Termina — the largest known computer complex in the galaxy. Now only a few machines survived there, the remnants of a once proud outpost. The Clone warriors had

discovered the base early on in the mission but, unable to defeat the snake-like Kri, had sealed the base off with a large cordon of ships. Now with the Acron Device surely success was imminent?

Dormant for over 2000 years, few of the Kri pods had hatched. Waving the Acron Device before him, the first Clone entered. Only to be shortly despatched with a mindbolt.

Another Clone entered, this time with the Termina Pass. Picking up the Acron Device he grimly assaulted the Kri, waving the weapon before him, sweeping the Kri aside, even their pods shrivelled as they were hit by the deadly instrument.

Seeing a key below a floor grill the Clone searched for a wire to fish it out. To take the wire he smashed a laser disc and cut it. An energy ball, when placed with another, deactivated it, revealing an Isocase. Opening the case with the key the **ID Device** was found. Once activated by a terminal, a beamer was revealed. At the same time a **Beam-up point** was revealed in a room which mysteriously drained energy.

Beaming down, the Clone found, to his horror, a trap — an **Energy Plate** which was programmed to kill if the user did not identify himself. The ID device opened a wall safe and a key was found. This opened another safe which was guarded by an energy ball. This safe protected a **Securipass**. The ID device pacified a sentinel droid, enabling the Clone to activate the pass by placing it on the lower part of the droid. Behind a locked door another sentinel droid 'stamped' the pass. Finally, the highest security level was accessible.

Fierce sentinel droids guarded the high security level. Wave after wave attacked, casualties were high. Only after a second ship of Clones was the base finally cleared. The ID device was able to open a wall safe containing a key pad which opened yet another safe. The Sonic Key in this case opened an Isocase, which was revealed when the ID device was placed on an energy ball generator. The Isocase contained a pass in code. Once the code was fed into the decoder program it was revealed that the code was the pass to the final pass, **Ultron**.

When a credit card was inserted in to the tea machine it jammed and had to be booted in order to get a cup of tea. The Clone returned to the upper level where he accidentally spilled the tea on the terminal, it promptly deactivated. Now the bomb could be fetched and assembled.

The final assault had begun.

ULTRON — The Final Base

Using the Hypograv lift from Automata, the **Neutron Mass** in Spectros was obtained. The **Visiray** from Technibo revealed two Isocases on Frontios hidden in caves marked with a triangle sign, the mark of the Imperium. One of the Isocases had to be opened by brute force using a hammer, inside a Sonic Key was found which opened the other Isocase. In the other case an **Activator** was found. The Alpha Card was addressed to Altos and when it was inserted into the surviving terminal a message was

revealed, the location of a room that contained a **Securipass**.

Once the Clone had arrived at the location described, it took much groping about before the pass was found, near the door. The pass opened the locked door in the crystal caves, where the **Reciprocata** was hidden. The Neutron Mass was then placed in the Reciprocata and activated with the activator.

Ultron was heavily defended. Many ships were lost in the assault before the last of the Sei cruisers had been blown from the void. Taking the Ultron Mass and the Acron Device, the first warrior descended. Many Kri which guarded the upper level were vanquished with the Acron Device. On investigation of the upper level, a carefully hidden lever was discovered. On insertion into a wall socket, power was turned off and a missing component replaced in an electronic circuit panel. A beamer was activated in another room.

On beaming down, the Clone found several uncorrupted robots. Suspended for 2000 years, the Clones' presence triggered age old defence mechanisms and the robots sprang to life. In moments the Clone was amidst a droid battle. Joining forces with the smaller uncorrupted Sentinel droids, he fought successfully against the Battle Cyborgs. With the fight over and the remnants of the Paradroids (as their battle cohort was known) strewn across the deck, a high lever was pushed using a laser bolt, and a beamer to the upper level thus activated.

The Clone retrieved the Ultron pass to open a blocking door and there he met his deadliest challenge. In a small corridor three energy fields that destroyed everything on contact were moving towards him. Rather than face the field with his laser, the Clone lured the fields to the end of the corridor, sidestepping into an adjoining room just before contact was made. Running along the corridor into a heavily guarded room, he found a lever that deactivated the deadly energy trap. Ship after ship of Clones made the descent to take on the Battle Cyborgs who had a military prowess rating of 999. Few Clones survived.

A Sonic Key, hidden in a laser turret, opened a wall safe containing a **Deactor**. This, when activated with a battery, was able to deactivate the remaining defences of the base. The Sonic Key also proved to be the pass for a heavily guarded Isocase. This contained a **Securipass**. A keypad, once deactivated, opened many wallsafes containing code cards. Also found was a Password program which had to be debugged with the toolkit designed to do the job before the password was given. The correct codes were inserted into a terminal that was in the room to which the **Securipass** had given access. The terminal issued the final pass.

The bomb was brought to the final room and the door opened with the final pass. The bomb automatically activated when it was placed on the warp cubes, destroying them utterly. The mission completed, the remaining Clones relaxed. The Sei no longer posed a threat to the Human race, for the time being at least.

THE WALLY WEEK QUARTET

'Quartet' is a slight misnomer, since currently there are five Wally Week games from Mikro-Gen. However, *Automania*, the first of the five, is a platform-style arcade game and doesn't need the kind of tips presented here for the other four. They come in order of release.

PYJAMARAMA

Listed below in an easy-to-understand manner is the entire solution to the now ageing *Pyjamarama*.

To get the key to wind the alarm clock and wake up Wally, you must go to the moon. The screen after the moon has a magnetic lock which you must break by getting the magnet.

1) Get the bucket and fill it with water from the tap in the bathroom.

2) Get the plant pot and the bucket filled with water to the room that has the venus fly traps and the BP can. The fly traps are now immobilized and you can collect the BP can, leaving the bucket of water.

3) Next, to fill the BP can collect the triangle key from the third floor, from the lift room. It should be near the rocket. Together with key and can go out of the first floor from the lift room and go out of the first door you come to walking right. The BP can is now filled with petrol from the fuel pump.

4) On the moon there are aliens; the only way to get past them is to have a full laser gun. Now this is hard! a) exchange the pound for the penny. b) the penny gets you into the toilet. c) get the hammer from the toilet, go to the lift room and exchange the hammer for the fire extinguisher. d) leave lift room via door 3. Go out of the next room via door furthest right, climb the tea chests and go out of the window. Now walk right and you will appear in a room with a still fire. The fire extinguisher lets you past the fire. Walk right past the fire and after you have fallen down, you must immediately walk left and collect the square key. Walking left, go out of this room or a huge ball will kill you. With the square key you can now get into the snooker room — get the laser gun and exit.

e) Now go into the lift room and make sure you have the triangle key and laser gun. Go out of the lift room via exit 1. Now walk out of the first door you come to when walking right. You should now be in the room with the fuel pump. Walk out of the door on the right and immediately jump onto the third tea chest and onto the table. Get the battery, and the laser gun should now be full. f) leave the battery where you found it and go through the down exit. g) now, with the full laser gun and the full petrol can, go into the lift room and exit via No 3 door. You then get into the rocket and arrive at the moon. The aliens allow you to pass because you have a full laser gun and you can now get the key to wind up Wally's alarm clock but first you must have the magnet so follow these tips.

5) To get the scissors get the ignition keys then slide down the banister to get the crash helmet. When you have got the crash helmet get the library ticket and exchange this for the library book. The combination of the crash helmet and the library book will allow you to get the scissors.

6) Now, with that done you now have to put the HELP button ON, which makes a tea chest appear in the room with the box key.

7) You now have to go to the room with the box key and balloon in it (making sure you've still got the scissors) and touch the balloon (sometimes you have to go back round and put the HELP back ON). The balloon will take Wally up, so all you have to do now is jump along and get the box key.

8) Go to the kitchen and you can now swap the box key for the magnet.

9) Right now that you have done all that the rest is simple (?) Go to the moon, where you have previously left a full laser gun, walk

into the next room and jump at the magnetic lock and the bars guarding the clock key will disappear. Collect the clock key and make your way back to the clock avoiding the various little nasties. Touch the clock and you've completed the game (though you may not receive 100%). To gain extra percent marks pick up and drop objects that aren't needed to finish the game.

EVERYONE'S A WALLY

The second in the Wally problem solving games is much trickier to crack because of the other characters continually getting in your way. Anyway if you're still having problems just read on to solve them.

To mend the fountain get the Monkey Nuts from the Bakers using Wilma. You can now enter the Zoo, take the Monkey Wrench from the Zoo and drop it somewhere convenient. Now find Dick the plumber and go find the Plunger. Get the Monkey Wrench and take Dick to the fountain (making sure that he has got both the Wrench and the Plunger). Jump up on the fountain and jump at the statue on top, this should mend it. Once the fountain has been mended then get Wally, the empty bucket and the sand. Take Wally to the fountain and the bucket should fill up. Once this is done take Wally to the cement mixer and pick up the Cement, find the Trowel. With the Trowel and Cement go to the location with the bricks in it, walk passed them and the wall should be built.

To get the letter B

1) Change to Wilma and get book 1 and book 2.

2) Change book 1 at library at the first table for the Jump Leads and change book 2 at the library for the Bunsen Burner.

3) Now get book 3 and change it at the library for the letter B.

To get the letter K

1) Change to Wilma and get the Monkey Nuts from the Bakers.

2) Now enter the Zoo with the Monkey Nuts and get the Monkey Wrench. Drop this somewhere convenient.

3) Change to Dick and go and find the Plunger. Collect the Monkey Wrench.

4) With Dick mend the fountain by jumping at the statue on top of it, you must have the Monkey Wrench and the Plunger.

5) Change to Wally. Now go and get the Empty Bucket and the Sand.

6) Fill the Bucket at the fountain then go and pick up the Cement from the screen that contains the cement mixer.

7) Take the Trowel and the Cement to the screen with the bricks in it and walk past them. The wall will now be built.

8) Now change to Harry and get the fuse wire and blown fuse, this should rewire the fuse.

9) Get the good Insulator, get the Screwdriver and go to one of the telephone boxes. Enter this and play the asteroids game until you here the bleep sound. Once you have heard this go to the screen with the pylon in it. You can now mend the pylon because all the bolts of lightning move around the entire screen (mend the pylon by swapping the Good Insulator for the bad one).

10) Change to Tom and go and get the Flat Battery from the fork lift truck. Drop the Flat Battery somewhere convenient.

11) Change to Harry get the Flat Battery and with the Jump Leads go to the Bee Pee station.

12) Once you are here recharge the Flat Battery on the green battery in there, drop the now recharged battery somewhere where you will be able to retrieve it later.

13) Change back to Tom get the Battery and put it back in the truck. Change to Wally and get on the truck, then climb onto the wall to get the letter K.

To get the letter A

1) Change to Tom and get the Oil Can. Take this to the trolley in the supermarket and oil it.

2) Now change to Harry, jump on the trolley and then onto counter to collect the letter A.

CRASH TIPS SUPPLEMENT

To get the letter E

- 1) To mend the hook you have to be Wally, get the Super Glue and the Broken Hook and take them to the workshop.
- 2) Put the Hook on top of the bench and walk under the Vice with the Super Glue then, take the Hook which should now say 'hook working'.
- 3) Take the Hook to the crane.
- 4) Now change to Wilma and get the Parcel and Stamp, go to the post office and walk to the far end of this screen to stamp the parcel. You can now go and exchange the Stamped Parcel for the letter E.

To get the letter R

- 1) Wear the Gas Mask and go behind the shark, in the sewer, and into the cave.
- 2) Go to the far end of the screen and collect the letter R.

To mend the gas pipe and complete the game

You must be Dick and have the Gas Mask. Go to the cave and collect the Leaking Gas Pipe (beware of the shark thingy). When you are out of the cave, go and find the Chewing Gum, put the the Pipe on top of the bench in the work shed and go and find the Patch. Take the Patch and the Chewing Gum and walk under the bench with the leaking pipe on it. Collect the now Repaired Pipe. Get the Gasmask and take the Pipe back to the cave. This gets rid of the sparkles in the cave and the flame from the motorway.

Now that you have all the letters of the code take them to the bank in the correct order to spell the word **BREAK**. Each person in the game should take their own letter. B should be taken by Wilma, R by Tom, E by Dick, A by Harry and K by Wally to get the final graphic display.

HERBERT'S DUMMY RUN

This is the first game in which Herbert is the star but don't let that put you off because there is plenty of fun to be had.

- 1) First of all get the box key and get the honey pot.
- 2) Now go to the room that the game starts in and jump up on to the box. This will spring you up to where you can exchange the honey pot for the teddy.
- 3) Get the rope. Now with the rope and the teddy go to the arcade room with the dalesks in it.
- 4) The teddy will go and open the right hand side door; you can now go through this. Jump at the rope in the next room and it should extend into a room with a rubber duck; collect this.
- 5) Load the pop gun (with the cork) and go to the castle.
- 6) Exchange the pop gun for the flag and with the rubber duck go to the seaside screen. You can now collect the pebbles to load the catapult.
- 7) Now get the torch and the bulb; this will mend the torch.
- 8) Go to the dark room with the bulb and this will enable you to see. Shoot all the ducks and a couple of rolls of caps should be dropped. Put these somewhere convenient.
- 8) Get the A brick and the chocolate 10p and go to the screen with the till.

- 11) Climb on top of the brick and walk past the till with the chocolate 10p, this should now be exchanged for a real 10p.

- 12) Take the 10p and the bomb and then go to the room with the 10p slot on the door and jump at it. You will now be in a Blitz game, and when this is completed you will receive a cannonball.

- 13) With this and the rolls of caps go to the room with the cannon and walk through it. The cannonball will be launched and a hole in the wall will be made.

- 14) Pass through this hole and get the space hopper.

- 15) Then go back up to get the tennis racket, put the space hopper in a convenient place.

- 16) Next go into the Breakout room and complete the game. Once the Breakout game is completed you should receive a glove.

- 17) Get the space hopper and with the glove go to Level 1 where there is a room with a hand guarding a door. You must now jump into the room behind the hand (the hand will no longer harm you because you have the glove).

- 18) You will be in a room with Wally and Wilma at the top of an escalator. As you have the space hopper you will be able to jump very high. This means that you can now jump up and switch the escalator on and be reunited with Wally and Wilma to complete the game.

THREE WEEKS IN PARADISE

The latest in the Wally quintet has you running around trying to rescue your beloved Wilma and Herbert from the Wally eating cannibals

To Rescue Wilma

First of all get the Mint from the sign outside the Trading Post then get Wilma's Handbag from the beach, to get to the beach go through the picture in the room that contains the table. As long as you have the Handbag in your possession the crocodile will not harm you. Go to the screen with the Ice Cube in it and press the Action key. Now pick up the Hole and go right until you are just past the crocodile, now drop the Handbag. Take the Gold Fish Bowl and the Hole to the Wishing well screen, stand at the far left of the screen and press the Action key. Go left into the new screen and take the Skeleton key, the spider will not move as long as you have the Bowl.

Go through the picture again and into the sea, pass over the locker and the door will open. Take the Spinach and drop it in a convenient place. Go back to the room with the picture in it and get the stuffing from underneath the table, go to the room with the big bird in it. Take the Egg but don't drop the stuffing while you are in the same room as the big bird. With the Egg and the Spinach proceed to the room that contains the sign 'Old Faithful', now pull the rope and run to the water. Jump up the geyser. Jump into the nest and swap the Spinach for the Bow and Arrows. Now drop down and drop the Egg. Go to the screen that contains Wilma and shoot the native with the Bow and Arrows.

Proceed to the screen with the well in it and jump down. Go to the centre of the well and press the Action key. Take the bottle and climb out of the screen by going to the right of the screen and keeping the Action key depressed. With the Bottle and the Corkscrew return to the crocodile screen. Get the Bottle and the Corkscrew past the crocodile one at a time by using the Handbag. Standing over the Coconut with both of the objects press the Action key. Take the Bottle of Oil and the Blunt axe to the screen with the hut and the car. Pass over the front wheel of the key and press the Action key. With the Sharp axe return to the screen with Wilma and cut her down by pressing the Action key.

To rescue Herbert

First of all get the Deaux Sticks from the crocodile room using the Action key, light the fire in the anvil room. Take the bellows from the top of the well, then pass over the fire and press the Action key. Get the Hot Ashes and take them to the room with the Totem pole in it. Now pass over the white man and press the Action key. Should you have the bellows the cloud will move away from you, so make sure you are standing to the right of it. When the cloud reaches the hut collect the Shell. Now take the Shell down the well and press the Action just as the drip touches. Once that has been down take the Billy Can to the Geyser, pull the rope, and run to the water to fill the can.

Go and find the Flipflops and take them along with the full Billy Can to the beach. Just as you pass the crab press the Action key. Now collect the Claw and take it to the right hand side of the room that contains Herbert. Whilst keeping the Action key depressed walk into the lion. Take the Thorn, with this and full Sea Shell walk to the middle of the cauldron and press the Action key.

To escape

Just go back to the beach via the picture, in the room with the table, and you will have finished the game with 100%.

TIR NA NOG

Definitely a golden oldie this one, don't miss it if you enjoyed the likes of *Marsport* and *Dun Darach*.

NUADA'S SWORD

First of all find some **Bones** (these are in most caves). Once that has been done get the **Feather** out of **Stormcave** and go to **Badhelm**. Walking around this area you will eventually find a hedge with an entrance into it, go through this and walk onto **Dun Dhomnuil**. Get the **Honeycomb** and return to **Badhelm**. Find the door marked with a B and enter this (you will be allowed to do this because you possess the Honeycomb). You will now be in **Baldrig's Shrine**. If you drop the Feather at the Shrine you will receive an **Oak Leaf** in return. Return to **Dun Dhomnuil** and enter the door marked X with the bones. You will now meet the King Dhomnuil. Drop the Oak Leaf here and you will receive **Nuada's Sword** in return.

DAGDA'S CAULDRON

First of all get the **Daisy** which is near the waterfall in **Glasmarch**. Now proceed to the **Slige Warrens** and find the invisible door (it is on the side of the building near the portal), this is the back door to **Caerdach Calum**. Just go and pick up the **Cauldron**, you won't get killed by **Nathair**.

THE STONE OF FAL

Get the **Book** from the water cave, then go and get the **Ice** from the **Ice Cave** (the Water cave is in **Glasmarch** while the Ice cave is in **Tir Clachan**). With the Ice go to the **Slige Warrens** and enter the door that is marked with a snowflake, take the **Sting**. Now enter the door in **Tir Clachan** that is marked with a sting. You are now in **An Lin**. Go West then take the second turning to the North, then the first turning to the West, then go North, now go East and then North. You should now be in a dead end. Pick up the **Halbeard** and go to **Sgorr Brag** (in the same complex). Once here drop the Halbeard and you will receive the **Stone of Fal** in return.

LUGH'S SPEAR

Pick up the **Ring** in the **Lava Flats** and go to the cave marked with a **Ring symbol**. Enter this cave and take the **Antlers**. Now proceed to the **Forest of Cern**. Pick up the **Pin** and enter Cern's cave. If you drop the Antlers in here you will receive a **Harp** as a gift. This enables you to walk through the Sidhe in the forest without being harmed. If you follow the Sidhe he will disappear through an invisible door, follow him through this (you must have the **Pin**). Walk through the tunnel and at the end of it you will find **Lugh's Spear**.

TO FINISH THE GAME

Take all the parts of the **Seal** to the altar at the start of the game. Now go and find one of the **Spades** (one is in **Stormbase**). Face the cross in **Stormbase** and walk North nine paces. Drop the spade here and you will find **Calum's Hammer**. Now return to the start of the game. Presuming that you have dropped all the parts of the seal here, you should get the message **OGAM** appearing on the Altar (this is a language which you use to translate the Scrolls in the library), drop **Calum's Hammer** on top of the parts of the Seal to finish the game.

DUN DARACH

Once again you play the mythical Celtic hero **Cuchulainn** in *Dun Darach* by Gargoyle Games. It is full of the **Follis/Carter** puzzles and puns we've come to expect from this pair. For the few who do not know it, you're out to rescue your friend, the charioteer **Loeg**, from the clutches of the beautiful and evil sorceress, **Skar**. The action takes place in the city of **Dun Darach**.

To find **Teth** you must first go to the **Old Quarter** and buy or steal a **statue**. Now take this to the **Soke** or **Ratha de** and follow the rat that wanders the streets. In **Claw Lane** the rat will disappear — for a few seconds stand on the spot where it disappeared and press Enter; you will now be in **Darach Down**. Inside **Darach Down** is **Teth**. Give **Teth** the statue and in return he will give you the **d-key**; this unlocks the door in the castle.

Dainn can be found behind an invisible door in **Park Lane**. Give **Dainn** a **lyre** and in return he will give you the shield **Midir**. Take this to the room **Hail Midir** and place it on the table in there and you should receive the **m-key**. The **m-key** opens an invisible door on **Cross Street**.

Buy a **Mole Skin** from the **Skinner** and give this to **Bren** in return for a **Map**. Now earn enough money to buy the **Platinum** and give this to **Bren** for another map and the message 'Galacia is far'. Give this map to **Ryde** in return for the shield **Belinus**. Take this to the **Hail Belinus** room and drop it on

the table in there to receive a clue.

Open the invisible door in **Cross Street**, which is opposite room 55, with the **m-key**. Inside is the **Telestone**, take this.

Now go and buy a spell from the **Magick Store**. Deposit your key on the counter and offer the **Telestone**, this will reveal the location of **Skar**. Now go and find **Skar** (keep using the **Telestone** so that you can easily track her down) and offer her the spell when she is near, this will

by using the methods detailed later below. Take the **Pearl** and give it to **Skar**, who in return will give you a **Scroll**. Go to the **Castle** with the **Scroll**, any other object and the **d-key**.

Open the first locked door with the **d-key** and go through into a room with 3 revolving wheels (a combination lock). On one of the tables is a script with the clue **3ks 4keys, WITH LOVE**. This is a clue to the combination of the lock. If you give the 3 thieves a **Philtre** each you get scripts with messages on them, take the first letter of each of these messages and you end up with **DPE**, this is the combination to the locked door.

Keeping the **Scroll** (the one from **Skar**), drop your other objects on the tables so as to stop the wheels at **DPE**. Now, with the **Scroll**, go through the door. You will now be in a room with a message **8 ROWS AND BAR FOR KEY FIND SKAR** and 8 other doors. Only one of the doors will lead to another row (row B) the rest take you outside of that room. To decide which door to go through you must solve the clue **2**25**, which means 2 to the power of 25. This gives you the answer **33554432**. Counting from the left, go through the third door into the next row and then through the third door from the left again and so on until you have been through all 8 rows. Now use the **Scroll** to unlock the locked door.

make her visible. If you have a **thieves' licence**, go and steal the **Pearl** from the **Strongroom**; if you don't have a **thieves' licence** then get some money and buy one, either by honest means or

Go through this and you will be in another room with a combination lock. Drop objects on the tables to stop the combination at **OAK**. Now go through the locked door with the **i-key** which is lying just outside the locked door and offer **Loeg** the **i-key**. He will be freed and will give you another **i-key** in exchange. To finish the game go to **Claw Lane** and open the locked door which leads from **Dun Darach** and you will see the marvellous end effect — well an end effect anyway!

Some of the clues given in *Dun Darach* are a bit obscure but if you are still mystified as to their meaning then read on.

ART IN ORDER — Go round all the deposit rooms writing down their numbers and the letter on the wall inside the building. Once you have done this, write down the numbers with their corresponding letters and a message will evolve, **BY ALCHEMIST COUNTER PT IS KEY**. This refers to an invisible door that is by the Alchemist's counter, it can be unlocked with Platinum. Inside is the shield Parthol.

RATS ARE VAIN — this refers to the statue of the rat needed to free Teth. In the original version of *Dun Darach* (there are two) there was a mirror but this was changed to a pearl to avoid confusion.

SKARS A PEARL — this is referring to the fact that the pearl can be traded with Skar.
GODS SEE ALL — this refers to the Telestone.

To gain as much money as you wish go to the gambling houses in **Iomain**. Now drop all your money on table B and press 6 to return to the menu. Save the game then return back to where you were. Keep gambling and saving the game when you win and reloading a saved game when you lose. This way you can easily build up enough money to purchase anything you want.

To speed up the interest rate, bank some of your money and then carry out some of the other tips while it is day (signified by the torches being out) — press 6 and then 1. This will take you to the menu and then back into the game. When you re-enter the game the torches flicker on and you will collect interest for the whole day. Using this method it is possible to get your 1% interest twice a day.

The solutions to the galleries are as follows:

The gallery on the northern part of **Herne Hill** should have these items dropped in it: an **arrow** (from the Fletcher in **King Street**); an **adze** (from the Carpenter in **Oak Road**); a **hoe** (from the Farmer in the **Parade**) and a **needle** (from the Draper in **Long Lane**).

The gallery on the southern

part of **Herne Hill** should have these items dropped in it: **lead** (from the Alchemist in **Cross Street**); a **last** (from the Cobblers in **Long Lane**); a **sting** (from the Apothecary in **Heath Road**) and **hemlock** (from the Apothecary in **Market Street**).

The gallery in **Stone Road** should have these items dropped in it: a **hammer** (from the Carpenter in **Bird Street**); a **barrel** (from the Cooper in **Long Lane**); **dry salt** (from the Salter in **Oak Road**) and a **broad axe** (from the Armoury in **Long Lane**).

The last gallery in **Marsh Street** should have these objects dropped in it: a **rue** (from the Herbalist in **Bird Street**); a **pile** (from the Herald in **Amber Way**); a **razor** (from the Barber in **New Street**) and a **foil** (from the Sword smith in **Oak Road**). Remember Pita likes jewellery!

TANK DUEL (Realtime)

```
2 CLEAR 65505
5 PRINT AT 10,5; "START TANK

```

THE QUILL

Pokes for The Quill? Yes this month we have some pokes to alter the adventure utility so that data can be saved and retrieved from microdrives. The program is designed to work with version C02 or B. When you opt to either save, load or verify a database you will be asked whether you wish to save data to microdrive or tape. Should a file of the same name be present on your microdrive you will be asked whether or not you wish to erase it. The copyright symbol returns you to BASIC, a warm start can be executed by typing RANDOMIZE USR 24700. This is necessary should you forget to put a cartridge in the drive. The first program should be saved onto microdrive with SAVE "M";1; "QUILL" LINE 20. This makes the program auto run from line 20 so that The Quill is loaded from microdrive. It is also saved when you save an adventure but this time it is saved so that it auto runs from line 10, so the adventure can be loaded from tape.

```
10 CLEAR VAL "24999": LOAD
  "" CODE RANDOMIZE USR
  "25063"
```

```
20 CLEAR VAL "24699": LOAD "
  M";1; "QUILL C" CODE:
  RANDOMIZE USR VAL "58000"
```

```
5 REM quill d - Version C02
