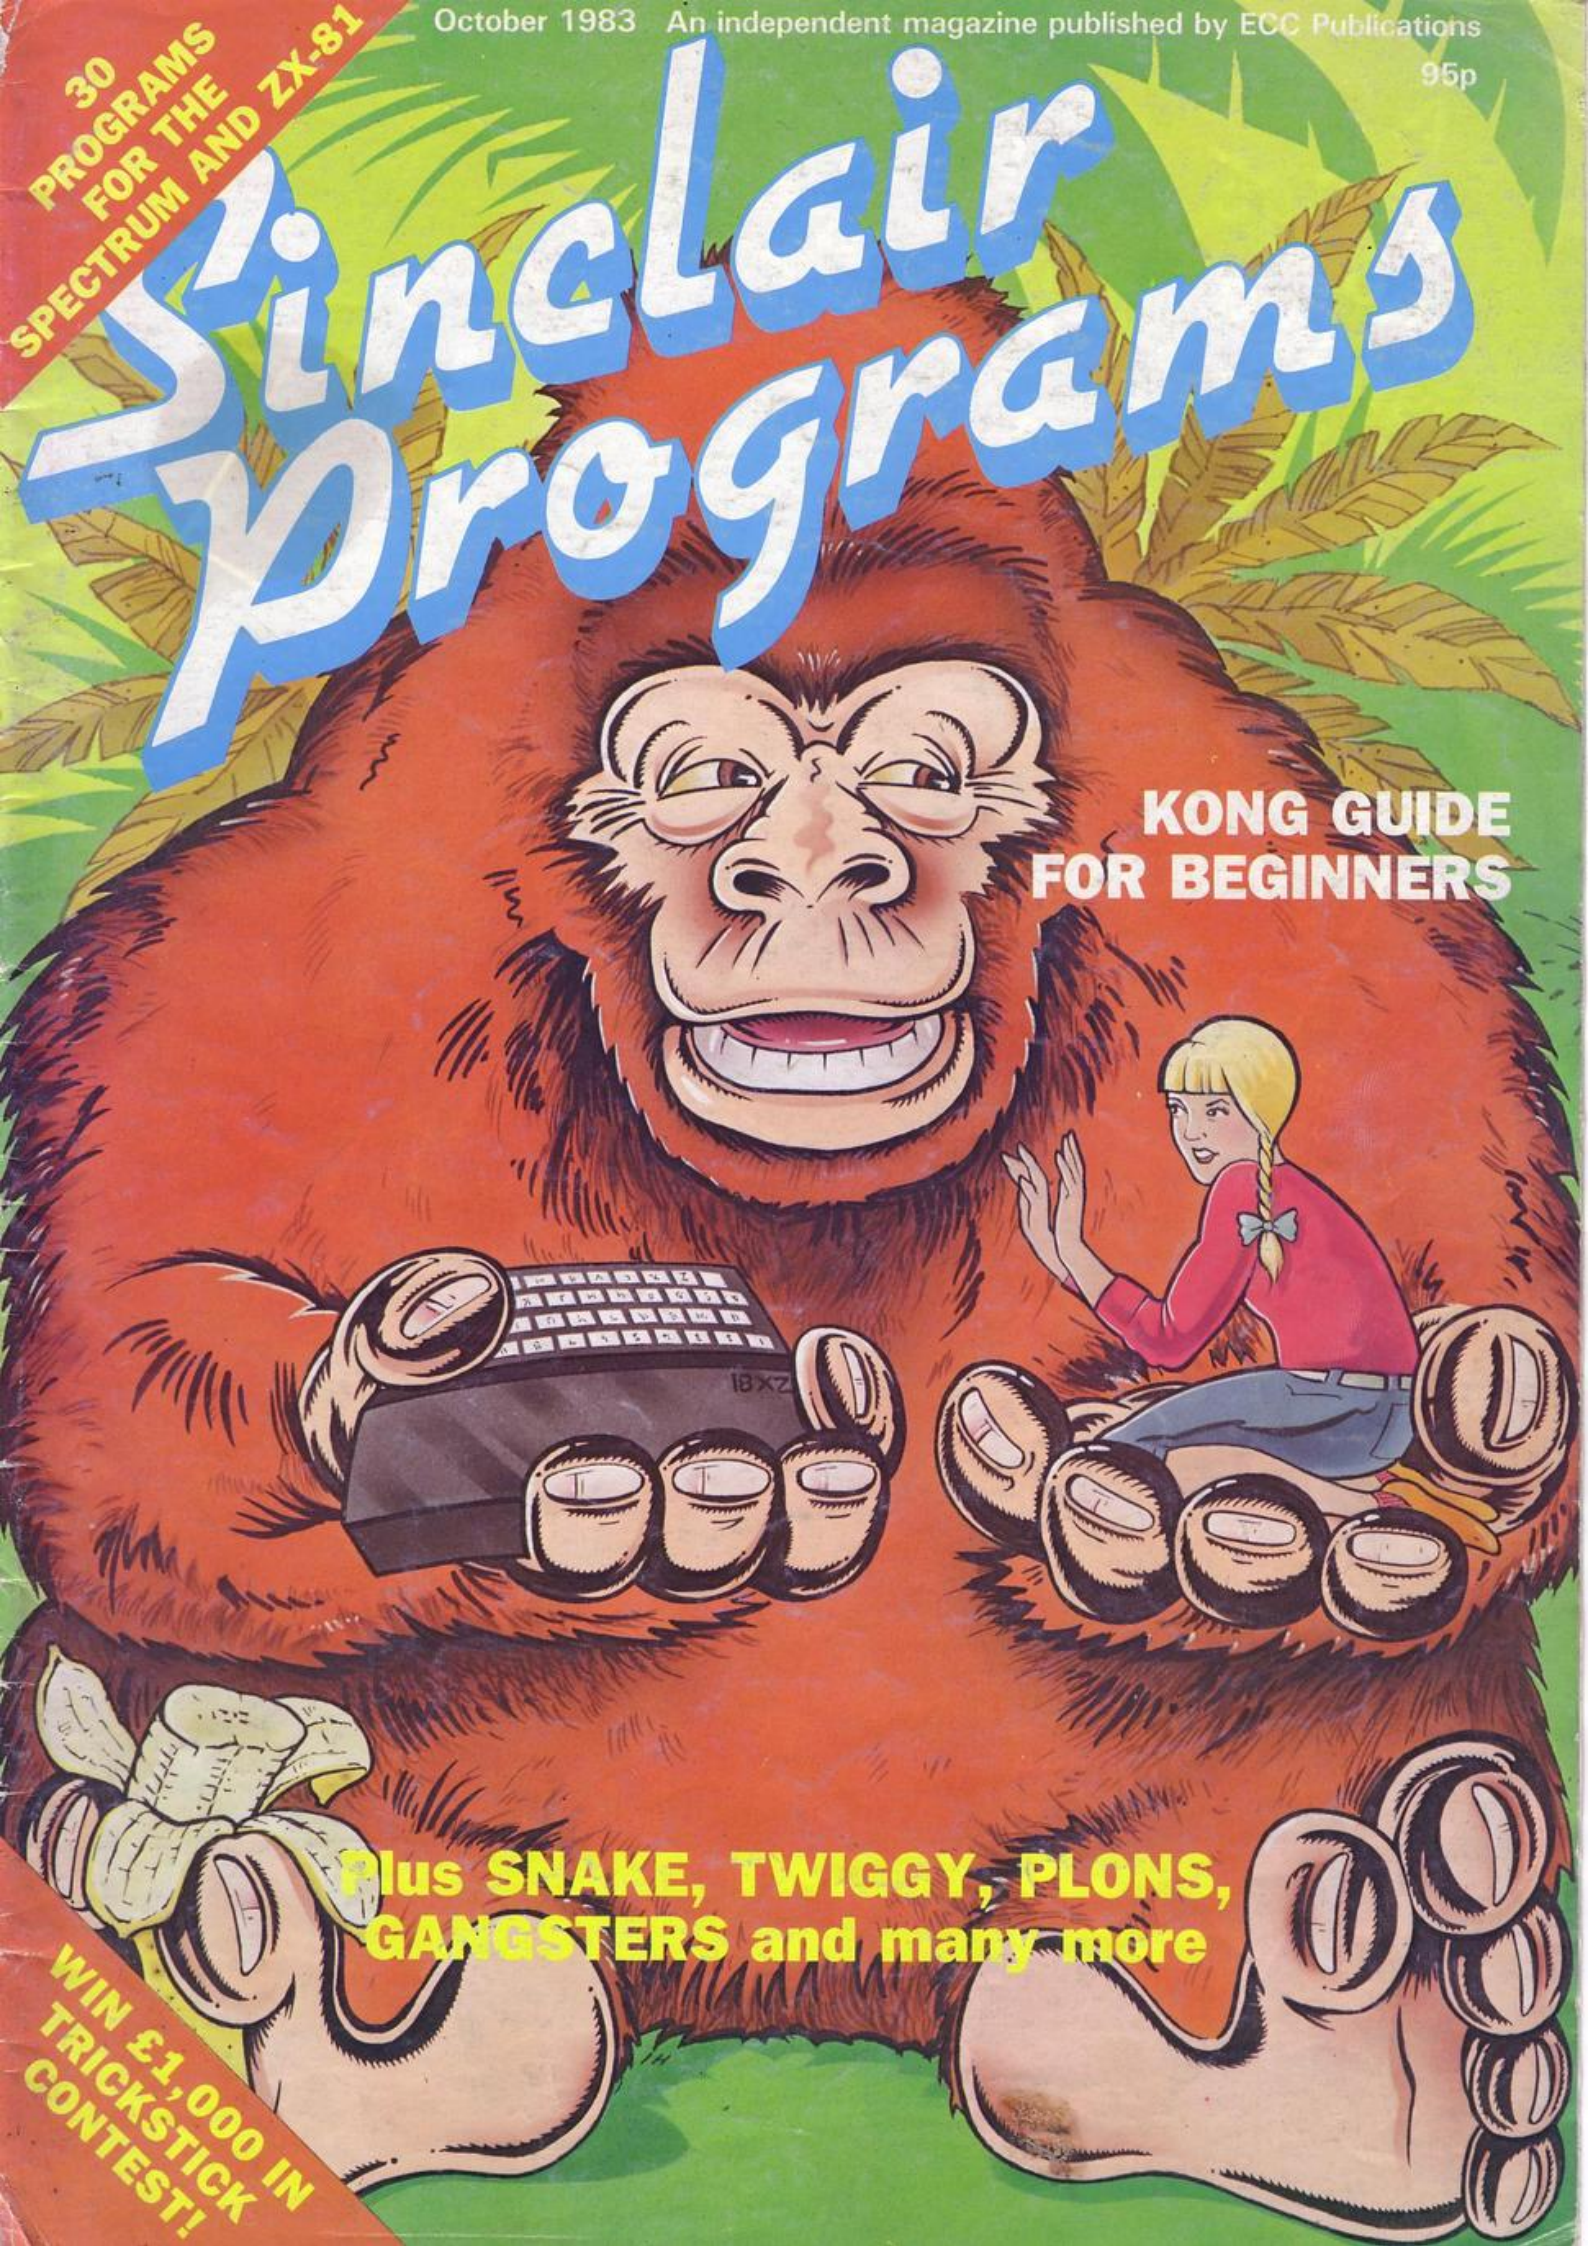
30 PROGRAMS FOR THE SPECTRUM AND ZX-81

Sinclair Programs

KONG GUIDE FOR BEGINNERS



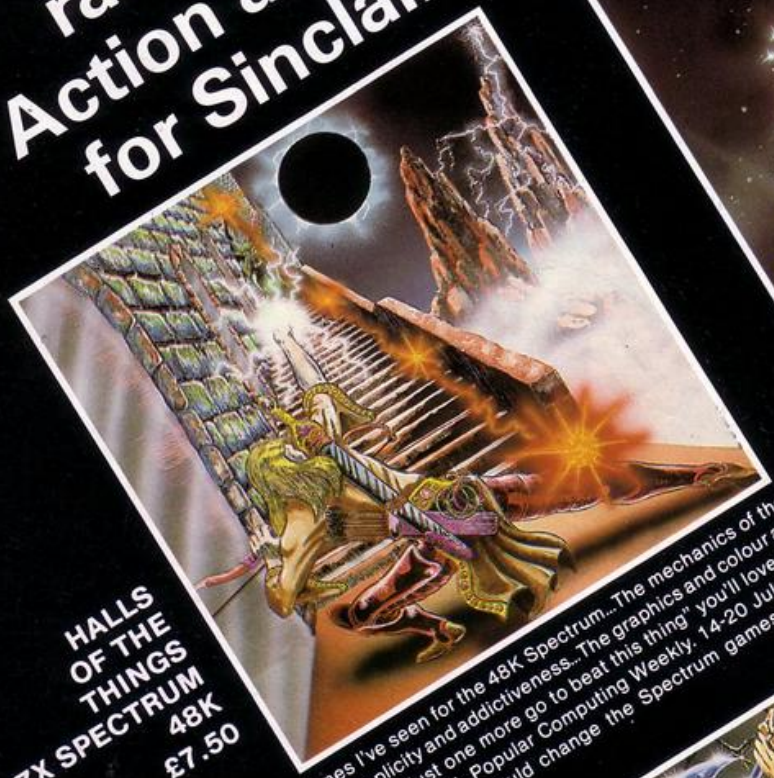
Plus SNAKE, TWIGGY, PLONS, GANGSTERS and many more

WIN £1,000 IN TRICKSTICK CONTEST!

A new and exciting range of Arcade Action and Adventures for Sinclair Computers

COSMIC GUERILLA
ZX SPECTRUM
16K OR 48K
£5.50

Bring your Spectrum to life with the fastest, meanest and most colourful arcade action around. Your task is to zap the relentless waves of alien attackers as they obliterate the force field protecting your supply of ion laser cannons.
KEMPSTON JOYSTICK COMPATIBLE
"Incredibly addictive...highly recommended"
...ZX Computing (Aug/Sept 1983).



HALLS OF THE THINGS
ZX SPECTRUM
48K
£7.50

The first ever arcade adventure!
"Spectacular...One of the best arcade games I've seen for the 48K Spectrum...The mechanics of the game are superb, finely balanced between simplicity and addictiveness...The graphics and colour are superb...If you enjoy sitting up until 4am having "just one more go to beat this thing" you'll love this game - I CAN'T RECOMMEND IT HIGHLY ENOUGH"...Popular Computing Weekly. 14-20 July.1983.
"Excellent and dangerously addictive...a game which could change the Spectrum games scene overnight"...Sinclair User (August 1983).

THE DUNGEON MASTER
ZX SPECTRUM
48K
£7.50

The first adventure to enter into the true spirit of traditional role-playing games.
"Excellent entertainment"...Sinclair User (June 1983).
"Highly recommended for its versatility, originality and quality. Definately well worth obtaining"
...ZX Computing (Aug/Sept 1983).

MERCHANT OF VENUS
ZX81 16K
£5.50

A stunning real-time graphics simulation putting you in control of a leviathan space freighter plus a complex economic scenario combine to produce an exciting game to test your skill and head for business!

Sinclair User £4.50 . . . "*Well written and useful machine code utility*" . . . Your Computer
ZX81 Games Pack. "*Brilliant*" . . . Interface. "*Excellent*" . . . All written in 100% machine code to run in 1K
Four great arcade games plus a challenging adventure.
ZX81 Monitor and Disassembler £7.50. "*Well written and useful machine code utility*"
Written any good software? Send it to us for a valuation and details of our excellent royalties scheme.
Trade & Export terms are available on request including details of our introductory dealer pack.
Please send SAE for our latest catalogue and details of our forthcoming software.
Catalogue FREE with every order.
P&P included. Please add £0.50 per item for overseas orders.
Please make cheques/PO's payable to:

To help with entering graphics characters we have adapted a system of writing the characters for the ZX-81. We indicate inverse characters by the letter i and graphics by g, so that an inverse letter W is shown as iW and the graphics character on key 6 is denoted by g6.
Spaces are shown by sp and inverse spaces are isp. If some occur together, for instance a row of six spaces, they are shown by 6★sp and where there is a combination of characters each one is divided by a colon, thus sp:isp:6★g6 means a space followed by an inverse space and then six characters on the 6 key.
Where whole words are written in inverse letters they appear in the listings as lower-case letters.
In the Spectrum listings, letters to be entered in graphics mode are underlined, while other graphics instructions are underlined and take the form shown above, with the addition that inverse graphics characters are represented by the letters "ig".

Play in the big league — with only the best, newest programs!

We've searched for brilliant new program sources throughout the U.K. and North America to find an exciting collection of new games — and business programs — many of which cannot be bought by mail order from any other source!

Every month, we'll be adding to our catalogue to bring you the best of new games, new business, educational and household software. And the good news is — **we're specialising in programs for your Sinclair!**

With our special new deal — you just CAN'T GO WRONG.

* A free offer every month [this time it's a free blank C20 cassette with every two games ordered]
* A money-back guarantee if you're not entirely satisfied with your purchase — that's how confident we are about the quality and value!

All you have to do is look at our first HOT selection, then order quickly to be among the first to own these games of skill, intelligence and excitement [fast delivery is another of our specialities — so you could be using these new programs SOON].

FREE BLANK C20 COMPUTER CASSETTE WITH EVERY TWO CASSETTES YOU ORDER!

Remember there's no limit to the number of free cassettes you receive if your order justifies them — so why not get together with friends or user group members and share the freebies?

GUARANTEE

Order with complete confidence. If you are not entirely satisfied with the quality of your purchase return it to us within 7 days and we will provide a replacement.

GREAT VALUE! TREMENDOUS SELECTION! PLUS A FREE OFFER EVERY TIME!

Fill in the order form right away — we're guaranteeing fast delivery, quality and satisfaction [after all, we want you to come back for more!]

The Software Workshop, Yew Tree, Selborne, Hants GU34 3JP

Here's a whole NEW selection of the latest games, the best-value software for your ZX-81 or Spectrum.

ZX81 Software

1-01 Stock Market — £3.95
Buy and sell your way to millions! 16K RAM

1-02 Football League — £3.95
First division fun for the soccer enthusiast. 16K RAM

1-03 Test Match — £3.95
Match your wits alongside the superstars. 16K RAM

1-11 Arcade Action — £4.95
Overtaker/Missile Man/Space Fighter/ Pilot/Greedy Gobbler/Extra Terrestrial. 1K

1-12 Avenger — £4.95
Avoid missiles and bombs to become the ruler. 16K RAM

1-13 Protector — £4.95
Defend your own ship from oncoming attackers. 16K RAM

1-21 Football Manager — £5.95
Manage your team through a hectic league season! 16K RAM

1-31 Comp-U-Share — £9.95
Investment management program for unit trusts, shares and loan stocks. Complete documentation included. 16K RAM

1-32 Comp-U-Tax — £9.95
Accurate personal income tax calculator for 82/83 tax year. Full documentation included. 16K RAM

Spectrum Software

2-12 Avenger — £4.95
(See 1-12 under ZX81). 48K RAM

2-13 Sentinel — £4.95
Guard your mother ship against alien attacks. 48K RAM

2-14 Meteor Storm — £4.95
Spectrum version of the ever-popular arcade game. 16K or 48K RAM

2-15 Star Trek — £4.95
Popular space program brought to life by excellent graphics. 48K RAM

2-21 Frogger — £5.95
Manoeuvre the frog across the road avoiding heavy traffic. 48K RAM

2-22 Crazy Balloons — £5.95
Guide the balloons round the maze without bursting. 48K RAM

2-23 Arcadia — £5.95
The expert's version of the popular 'Invaders' game. 16K or 48K RAM

2-24 Golf — £5.95
The finest of golf handicap games. 48K RAM

2-25 Test Match — £5.95
More exciting than the real thing! 48K RAM

2-26 Derby Day — £5.95
This favourite has to be a winner. 48K RAM

Any Spectrum

MAGIC WORM

£4.95

Accept the challenge of guiding Magic Worm on his journey to the secret cavern. Use your skill and nerve to overcome the many obstacles you will meet along the way. Complete the dangerous journey into the cavern and overcome the final challenge of the bottomless pit and the game is yours!

Please send cheques/P.O.'s/cash to

LYNDENHURST LIMITED,
38 ASHLEY ROAD, LONDON N19 3AF

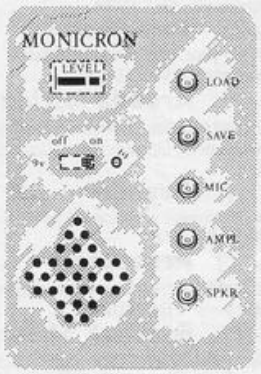
Overseas orders £5.95 per cassette.

AT LAST....

From MACQUILLAN ELECTRONICS Comes

MONICRON

THE ONLY INDISPENSABLE ADD-ON FOR
SINCLAIR ZX81 & SPECTRUM



LOAD programs first time every-time via ***VU LEVEL METER***.

SAVE via isolating push-button.

RECORD speech by built-in ***MIC***.

AMPLIFY Spectrum 'Squeak' by built-in ***AMP.**** & ***SPEAKER***.

RESET crashed programs with power ***ON-OFF*** switch.

MONITOR tape contents.

CUE program start etc.

ALL FUNCTIONS *WITHOUT* DISTURBING A SINGLE PLUG!

Saves time, temper & worn sockets! ***ONLY £14·95*** plus £1·00 p+p

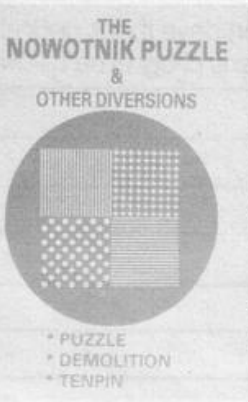
From MACQUILLAN ELECTRONICS
72 MERE ROAD, WIGSTON, LEICESTER.

*ZX81 model has tape 'remote' switch – state model when ordering.

GAMES AND PUZZLES

16K SINCLAIR ZX81

You are a Knight of Camelot, searching for Merlin's lost treasure. On your way you will discover the Witches' Tower, rescue a Princess held by the wicked Wizard of Trill. **£4.95**



The computer breaks and shuffles a two by two coloured square, whilst you watch the moves it makes. You must then unscramble it to re-assemble the original squares. Machine coded. **£4.95**

For the ZX81, three adventures – black and white text. Magic Mountain, Pharaoh's Tomb, Greedy Gulch. Superb value for money. **£5.00**

The tape of the book. 9 1K programs and 10 for 16K including Ski run, Alzan, Jaws and Wumpus. **£5.00**
Book available separately **£5.95**

The traditional game with superb screen presentation. Score points by making the two ends add to a multiple of five or three. The first one to reach 72 points wins. **£4.95**

Send SAE for full list.

Prices include postage (outside Europe add £1.00 per item). *Access and Visa cards welcome*

LETTERS

I HAVE recently bought your August edition and when my mum brought it home I snatched it from her bag and quickly set up my Spectrum and switched on. As my eyes whizzed through the contents they fixed on one particular program, Specvaders. Without wasting a second I pressed RUN and ENTERed it. Would it work? Five minutes later I had my verdict. What a great game; I must write to *Sinclair Programs* and tell them my views. Congratulations to Tim Shaw, author of Specvaders.

Ian Simkins,
Stockport,
Greater Manchester.

Cricket

IN the July issue of *Sinclair Programs* the program Cricket has a serious disadvantage. Key 8 can only be useful on an average of one in five balls whereas key 5 can be useful on average for four in five balls, so it is policy to keep the finger down on 5. What is needed is a signal to tell you when key 8 is needed. Then when you play you have to wait for the last possible moment before missing a key so as not to miss the signal. That brings an element of skill into the game.

To equate the duration of the signal to the choice of skill level it is necessary to change all the 'ds' in lines 12 to 17 because another variable 'd' appears later in the program.

I suggest the following alterations:—

ds in lines 12 to 17 changed to ls
Line 135 IF n=10 and y=16 THEN PRINT AT 13, 17; "*": PAUSE 7*(4-6)+10: PRINT AT 13, 17; " "

A Ferguson,
Middlesbrough.

Worm game

IN *Sinclair Programs* March/April, 1983 edition The Worm Game says that the best score was 150,490. I have scored 151,105, which would be a new record and I completed stage 7 successfully.

Stephen Harris,
Chilwell,
Nottingham.

Labyrinth

I AM WRITING to inform you of a few errors in the program Labyrinth listed in the August edition of *Sinclair Programs*. On running the program it is seen that when looking west or south a mirror image of the correct view of the image is seen — i.e., the left-hand side of the image appears on the right and vice versa. That is corrected by altering the following lines from:

560 IF a(x+d,y-1)= THEN GO SUB (i*10)+2110: GO TO 580
580 IF a(x+d,y+1)=1 THEN GO SUB (i*10)+2110: GO TO 600
830 IF a(x-1,y+d)=1 THEN GO SUB (i*10)+2060: GO TO 850
850 IF a (x+1,y+d)=1 THEN GO SUB (i*10)+2110: GO TO 870

560 IF a(x+d,y+d1)=1 THEN GO SUB (i*10)+2060: GO TO 580
580 IF a(x+d,y-d1)=1 THEN GO SUB (i*10)+2110: GO TO 600
830 IF a(x-d1,y+d)=1 THEN GO SUB (i*10)+2060: GO TO 850
850 IF a(x+d1,y+d)=1 THEN GO SUB (i*10)+2110: GO TO 870

I should also like to know if you pay anything in addition to the £10 paid for the copyright of programs published in the magazine.

D C Hill,
Stourbridge,
W. Midlands.

● *Thank you for your improvements to Labyrinth. On the question of payment the only extra amount we pay is the £20 for Program of the Month.*

ERRORS AND MISHAPS

THE END of line 700 was omitted from **Invaders**—August, page 8. It should have read:
700 PRINT AT 4,0; "32*sp)"

Labyrinth—August, page 30—was labelled wrongly as a 16K Spectrum program. It uses over 12K and is only suitable for the 48K machine. On the 48K machine the "£" signs in lines 1100, 1110 and 4050 should be altered to the hash sign "#".

Poker-August, page 35— was difficult to read in places.

Lines 3000 to 3045 read:
3000 DIM n(13): DIM e(4): DIM r(9): LET r(1)=-1: LET s=0
3002 FOR i=1 TO 5: LET n(v(i))=n(v(i))+1: LET e(t(i))=e(t(i))+1: NEXT i
3005 FOR i=1 TO 13
3010 IF n(i)=2 THEN LET r(1)=r(1)+1
3020 IF n(i)=3 THEN LET r(2)=1
3025 IF n(i)=4 THEN LET r(6)=1
3030 NEXT i
3040 FOR i=1 TO 13
3045 IF n(i)<>1 THEN GOTO 3060

Lines 1704 to 2502 read
1704 NEXT m: GOSUB 1050
1705 NEXT i: RETURN
2000 DIM j(5): LET 1=1
2001 RETURN
2500 FOR i=1 TO 5: IF j(i)=0 THEN GOTO 2502
2501 LET f=7: LET p=3*i-2: LET x=i-1: GOSUB 500: GOSUB 559
2502 NEXT i

VARIOUS NUMBERS appear on the screen. Running over a number will add it to your score. Your brightly-coloured snake is controlled with the usual cursor keys. Do not run over your tail or hit the edges of the playing area.

As the game progresses your snake becomes longer, making your path more circuitous.

Snake was written for the 16K Spectrum by John Williamson of Moreton Morrell, Warwickshire.

FROGGER

MBROCKLESS of Rushall, Wiltshire responded to our request for more machine code programs with this **Frogger** program for the 16K ZX-81. The rules are as normal; move your frog with the cursor keys, around the lorries, on to the logs and into a frog home at the top of the screen. Machine code controls the movement of the lorries and logs, making them substantially faster than in a Basic program.

Line 1 should contain 79 zeros and line 2 should contain 29. Start the program by entering RUN 2000 to transfer the machine code from lines 2000 onwards into lines one and two.

```
  1 REM 00000000000

A NEW ATOMIC power generator being tested has suddenly gone critical and started to **Overload.** The only way to stop it exploding is to catch the radioactive isotopes in a lead container. If you touch the highly-radioactive lining of the reactor your lead container will melt and one of your three lives will be lost. You gain 1,000 points for each isotope you catch but lose 10 for each square of the lining the isotope melts.

The game was written for the 16K and 48K Spectrum by Daniel Negus of Rednal, Birmingham.

PHOENIX ATTACK

THREE TYPES of alien appear on your screen—a large ship, an orbiting alien and a descending alien. Move your laser base left with 5 and right with 8. Fire with 1. You gain 50 points for every orbiting alien destroyed, 100 points for every descending alien destroyed, and you lose 50 points for every descending alien which reaches the ground. Each time the orbiting alien succeeds in crossing the screen it will begin again, slightly lower.

Once it is three-quarters of the way down the screen you will run out of time. The game will also end if a descending alien lands on your base.

The ship can be hit only when an asterisk appears in the top left-hand corner of the screen. That means that your super laser is ready for its one shot of the game. The ship can be destroyed only by hitting the graphic A beneath it by pressing 0.

Phoenix Attack was written for the 16K ZX-81 by S McQuillan of Belfast, whose highest score so far is 12,200.

BARGAIN-HUNTERS READ *THIS!*

Whatever your model of Sinclair computer—you can get HOURS of fun, intellectual satisfaction and education for just 95p per month!

A bargain?
That's **Sinclair Programs** magazine—the fat, glossy magazine that's PACKED with original, tested programs for you to load and run.

With **Sinclair Programs** every month you can build the library of programs that suits your mood: in recent issues we have challenged our readers with programs to test their skill at Sharpshooter or Laser Cannon . . . jolt their brain cells with Quadratic Equation or Monster Maths . . . or take a practical turn with their own word processor program or graphic generator.

That is just a fraction of what you get from **Sinclair Programs**. Each month we have 40 programs for owners of ZX80s, ZX81s and Spectrums. But make sure you don't have to hunt TOO far for your bargains—**Sinclair Programs** always sells out quickly, so order yours TODAY from your newsagent, or fill in the form below and we will send it direct to you, every month.

Mail to: ECC Publications Limited, 196–200 Balls Pond Road, London N1 4AQ Yes — I'd like to subscribe to **Sinclair Programs** (12 issues — price £13.20) I enclose a cheque for £ ____ Please charge my credit card Card: name ____ Number ____ Address ____ Name ____ Date ____ Signature ____

NB This offer applies to UK subscribers only. Overseas rates available on request

TEST YOUR GAMES SKILLS AND WIN £1,000

£2,000 TO BE WON IN TRICKSTICK CHAMPIONSHIP

EAST LONDON ROBOTICS

East London Robotics in association with Sinclair Programs announces the first Trickstick contest. We are looking for the person who can achieve the highest scores with the new joystick system. The people to achieve the 32 highest scores will take part in the finals in February.

Prizes: 1st—£1,000
2nd—£500
Two runners up £250

For full details fill in the coupon and send it to East London Robotics, No 11 Gate, Royal Albert Dock, London E16.

The Trickstick is compatible with any software that can be controlled by the Kempston joystick. As well as direction the player has control over the speed of movement and turn. Up to eight people can play at once. The first contest will be played as singles but future championships will include team events.

Please send full details of the Trickstick championship to

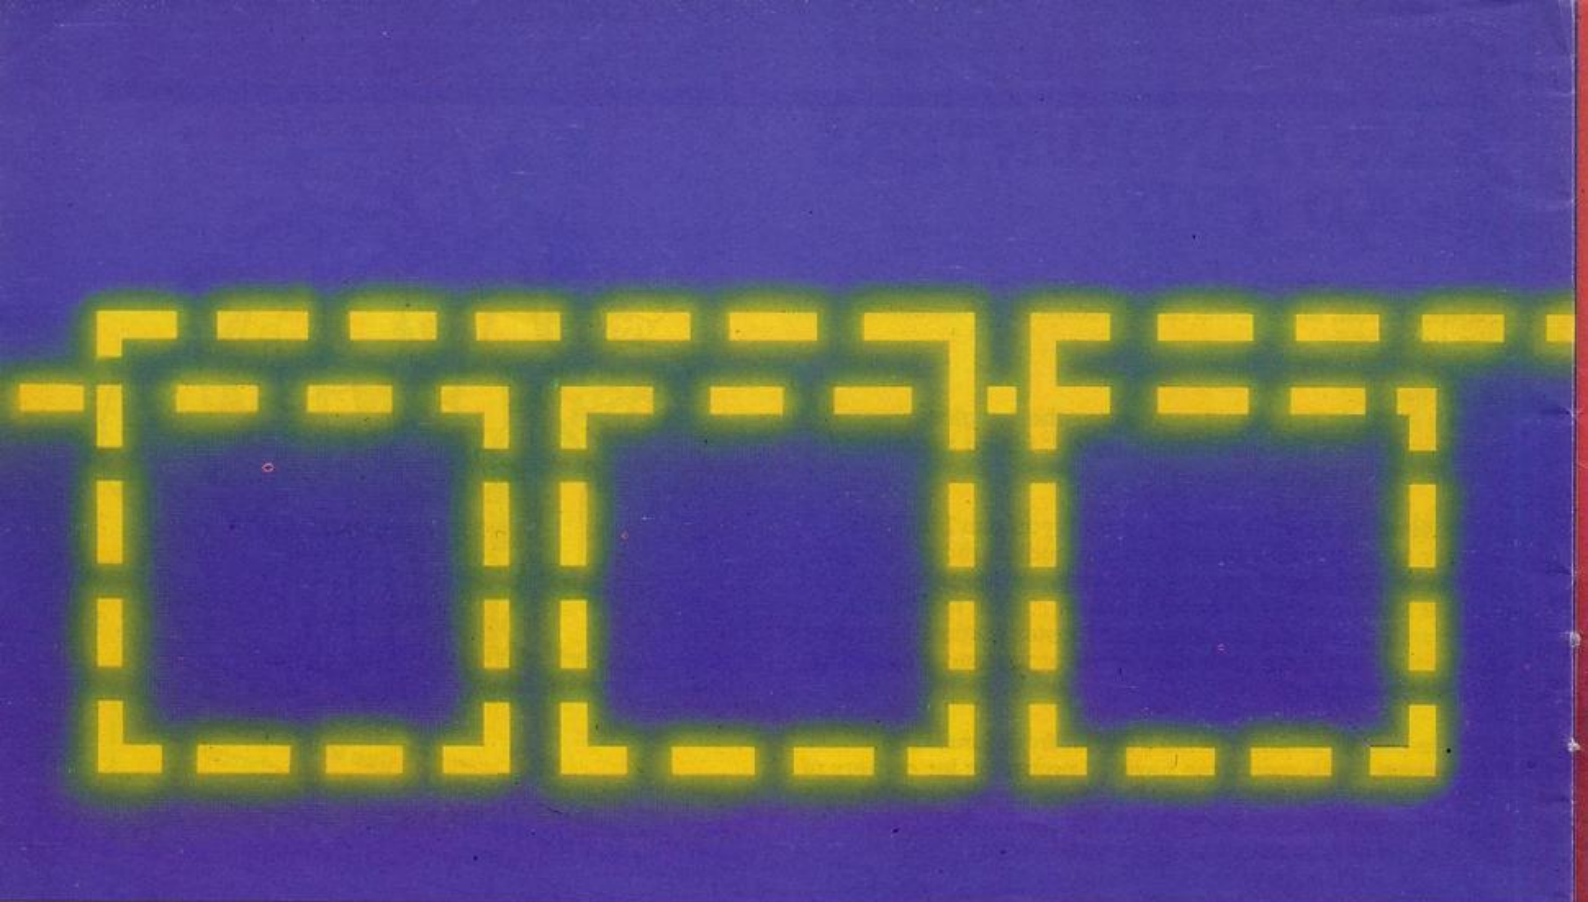
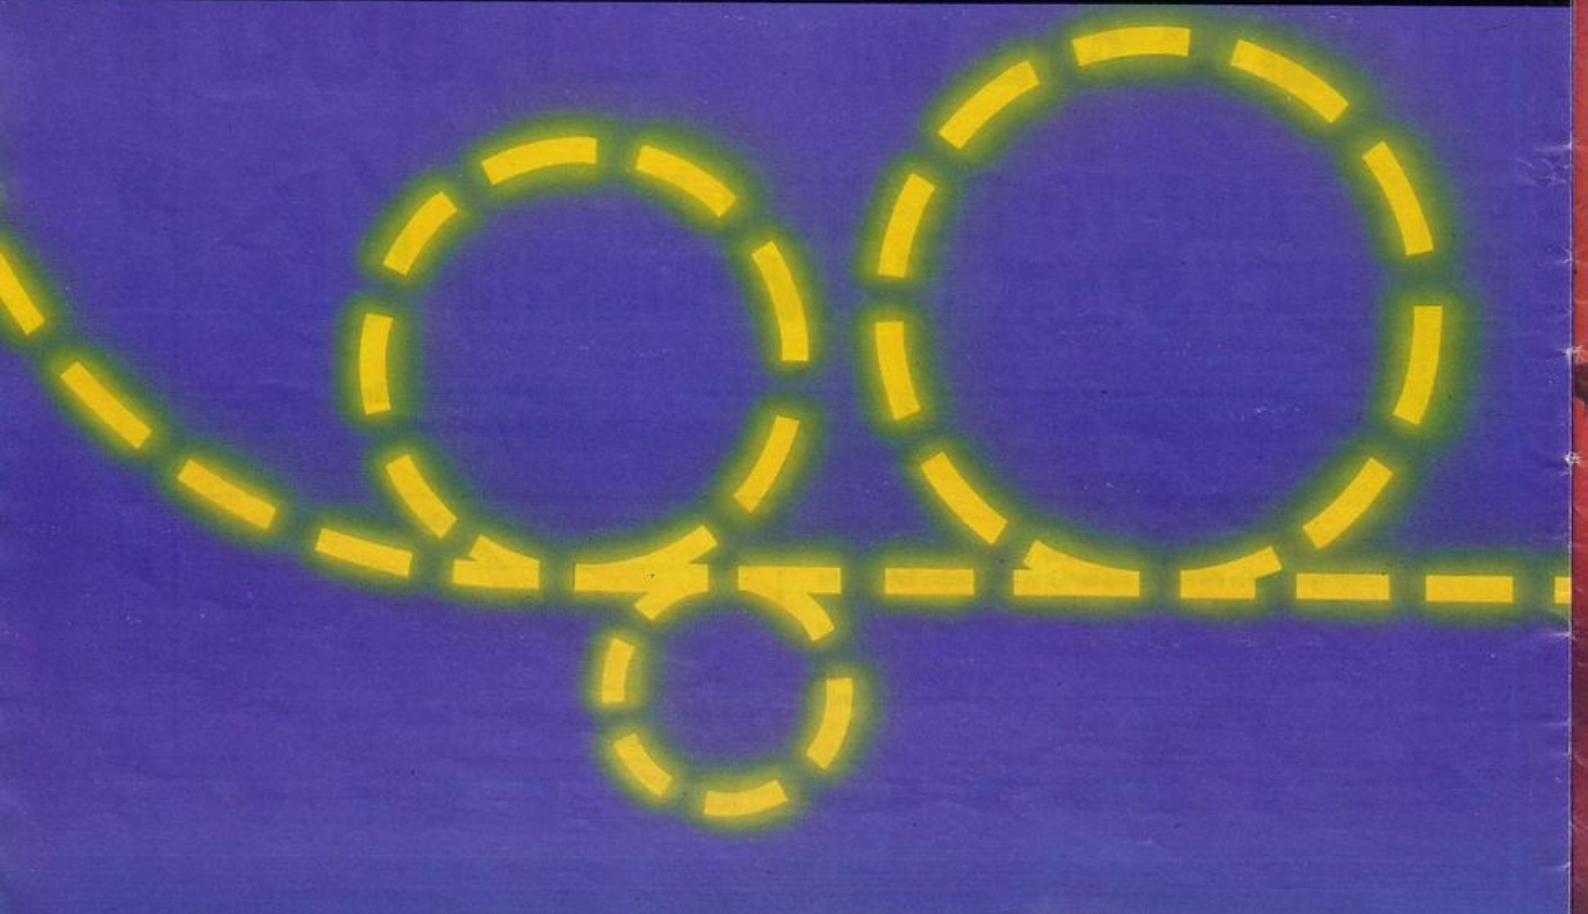
Post this coupon to East London Robotics, No. 11 Gate, Royal Albert Dock, London E16.



THE TRICKSTICK.
A REVOLUTION THAT RUN
AROUND ORDINARY JOY



You know what it's like when there's someone closing in fast and your joystick won't do what your brain wants it to.

It won't let you loop or curve the way you'd like, or arc and spin at the speed you want.

You can't get away quick enough, so what happens? ZAP!

For just £28.00 (+ postage), the Trickstick responds at the speed of light.

With its revolutionary light sensitive controls and own interface, the Trickstick lets you go where you want, at the speed you want.

Not just up and down or side to side, but round and round in any sized curve or loop you need to build up really big scores.

And the Trickstick is easy to use. All you do is pass your thumb or fingers over the controls and your craft responds.

Immediately.

And because the only moving parts are the firing buttons, the new Trickstick will last far longer than old fashioned joysticks.

Best of all, for £28.00 (+ postage), you get a Trickstick, a special training program and a chance to enter The National Trickstick Championships.

Up to eight people can play simultaneously.

For the very first time, you can now play with up to seven of your mates.

With our specially written game, you can either play against the computer, against one friend, in teams of two or three or however you want.

Just by plugging in extra interfaces to each other, up to eight of you can loop the loop and battle it out. All at the same time.

So if you thought computer games were already exciting, wait until you get your hands on a Trickstick.

Revolutionary new software.

Developed especially for use with the Sinclair ZX Spectrum and fully compatible with standard Kempston software, the Trickstick makes your existing software even more fun.

But because it's so revolutionary, it's actually made possible a whole new generation of software.

The first of this new generation is Attaktics, a brand new game which really brings out the full potential of the Trickstick and is available for only £7.50 when you buy your Trickstick.

So fill in the coupon now. And start running rings around your mates before they start running rings around you.

Please send me (state number required):–

☐ Trickstick/s with training cassette at £28 each £_____ ☐ Attaktics at £7.50 (with each Trickstick) £_____ ☐ Attaktics at £10.00 (without Trickstick) £_____

Postage 65p. I enclose Cheque/P.O. for £_____ made payable to East London Robotics Ltd.

EAST LONDON ROBOTICS

Can you combat the ALIEN ATTACK?

Artic Computing Ltd

NEW

48K SPECTRUM ONLY £4.95
Your spaceship must survive by destroying asteroids that plummet through space at you. Your aim is to shatter and re-shatter the cosmic debris, while destroying the nasty little flying saucers.

NEW

48K SPECTRUM ONLY £5.95
The real 3-D tank battle game. You must travel across the flat plains and battle with the enemy 3-D tanks, supertanks and flying saucers. Includes a battle readout and radar above your sights. Full 3-D explosion, burning, firing and moving effects.

16K/48K ZX/Spectrum £4.95
16K ZX81 £3.95
You are doomed to roam through the haunted maze until you are eaten alive by the ravenous ghost. Similar to the classic arcade game.

16K/48K Spectrum £4.95
16K ZX81 £3.95
This full colour, hi-resolution (Spec) machine code program is as exciting as the classic arcade game. There are nine levels of play in which you must defend yourself against invisible Galaxian fighters which swoop down to bomb you.

16K/48K Spectrum £4.95
Fight the invaders as they drop, line by line, to eventually land and destroy you. This classic arcade game includes nine levels and four variations of play.

16K/48K Spectrum £4.95
16K ZX81 £3.95
In this high speed arcade game, you must blast through the alien's force field avoiding the fighters and bombers to destroy the Mother ship.

PLACING this routine at the beginning of your 48K Spectrum programs will allow you to change the ink and paper colour and the bright and flash mode without the usual CLS command. Select the colours you require by POKEing 32509 the ATTR number you require. Thus to call-up yellow letters on a red background enter POKE 32509, 85: RANDOMISE USR 32500.

For readers not familiar with ATTR an explanation can be found on page 219 of the Spectrum manual.

Written by C J Barnatt of Fernhill Heath, Worcester.

BEGINNER

SOW SOW

A PATCH OF fertile ground appears at the bottom of the screen. Your seeds go flying across the top of the screen. Press S to sow one. Your aim is to sow as many seeds as possible. If a seed falls where a flower has already grown it will kill the flower which will wither away to become soil again.

Sow Sow was written for the 1K ZX-81 by David Knight of Newcastle-under-Lyme Staffordshire.

```

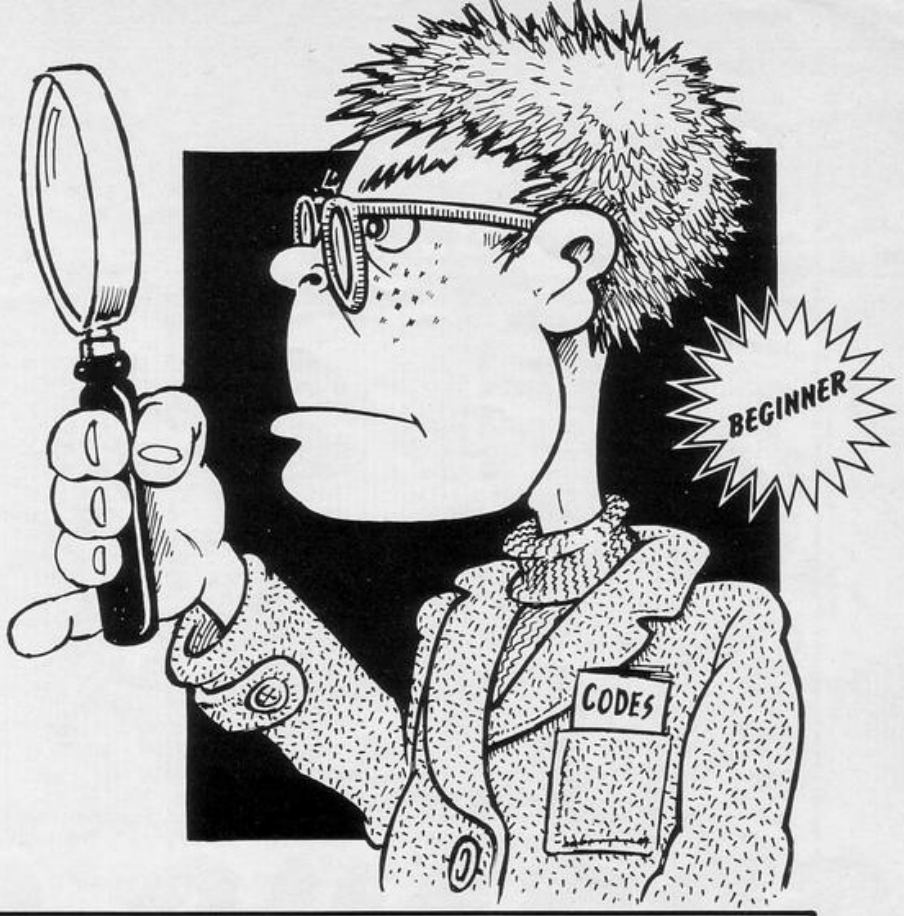
THIS SHORT routine, submitted by D Jones of Liverpool for the 16K ZX-81, scrolls the letters or symbols contained in the PRINT statement in line 2 from the bottom to the top of the screen. Enter line one of the first section of program and the following POKE statements. That will then become line one of the second section of program.



THIS SHORT Spectrum program was written for very young children to use by A Tyson of Christian Malford, Wiltshire. It should be accompanied by this story.

When Katie's little brother, David, was given a magnifying glass and a torch for his birthday he became, potentially, the greatest sleuth since Sherlock Holmes. He developed a passion for invisible writing and codes and, when he borrowed a Morse code buzzer, he practised his dots and dashes as if he had not a moment to lose. After all, one of these days or nights, he would probably need his Morse code in a life-or-death situation.

Of course, not everyone can appreciate the dedication of our young secret agent. On the contrary, his family were nearly driven mad as Dai bach buzzed away in the corner, like a little dentist with a drill. Katie was not one to discourage her brother but she was wise enough to step in before her father gave a poetic rendering of the Welsh language. She devised this program to satisfy everyone in the family.

SJUDGE of Mold, Clwyd has devised **Security Devices,** a machine code routine to protect software from unwanted users. Enter the first section of program, RUN it, and then enter the list of numbers one by one, working horizontally across the list.

Delete lines 2 to 7 and use the REM statement as the first line of your main program.

Adding lines 9997 to 9999 at the end of the program will mean that, once LOADed from cassette, your program will not RUN until your ZX-81 receives a signal at the EAR socket. Meanwhile the BREAK key will be disabled and the screen display will be random.

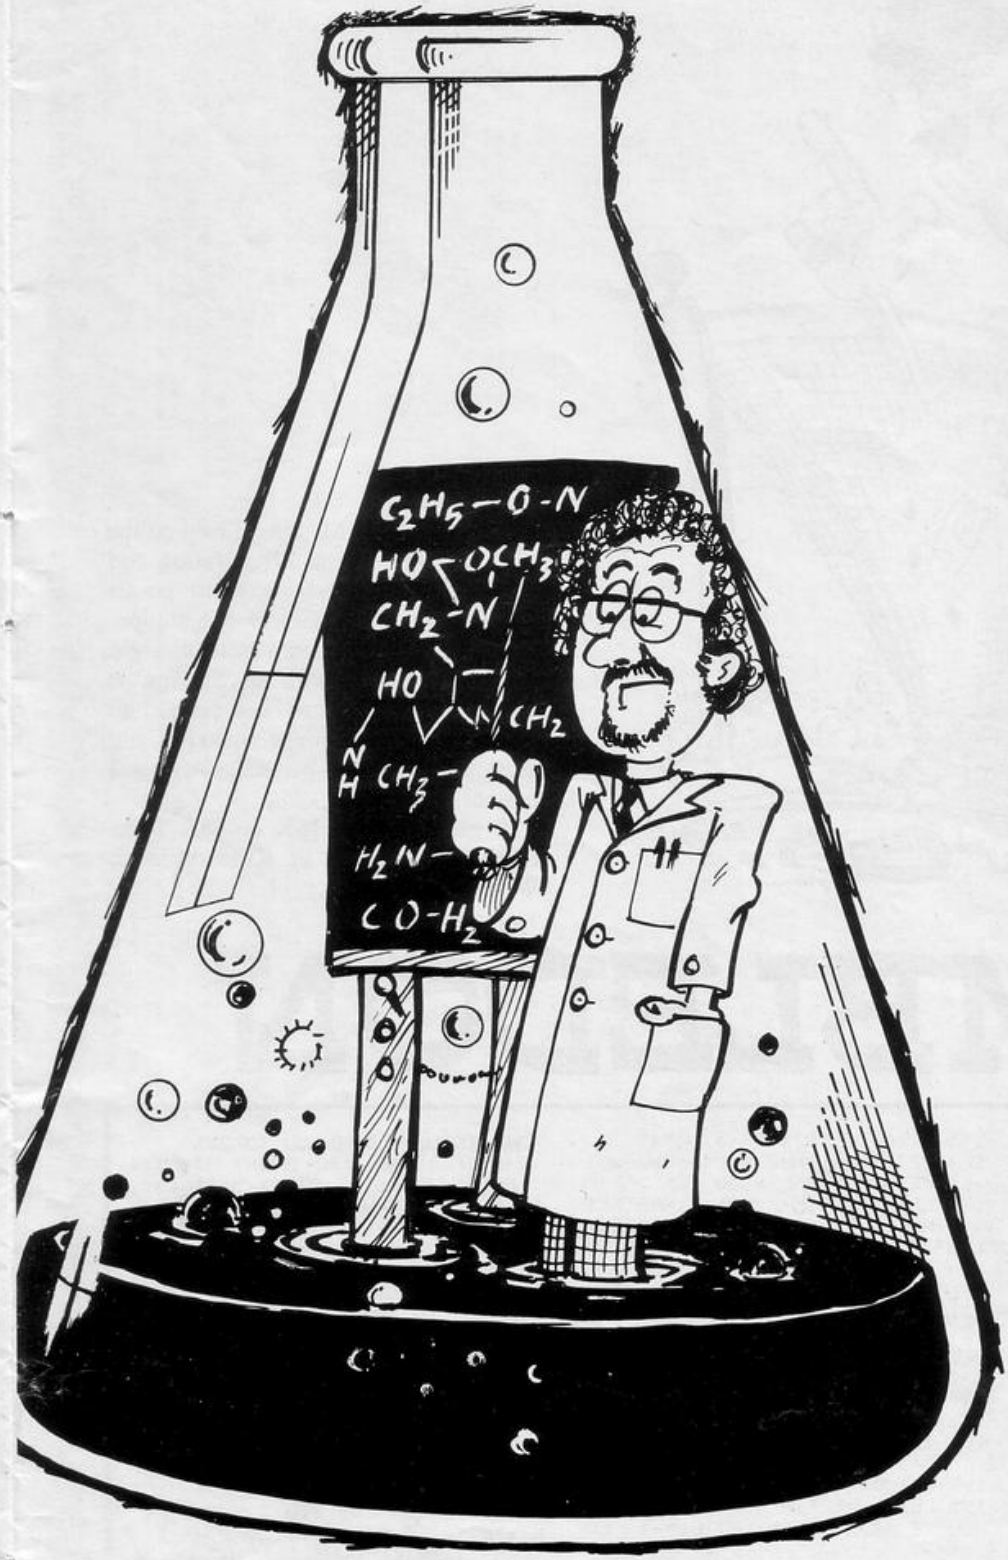
PERIODI



CHRISTOPHER EDE of Grimsby, South Humberside wrote **Periodic Table** for Spectrum owners who are studying chemistry. The program will print on-screen the entire periodic table, or a selected part of it. Each element is shown, together with its symbol, its mass numbers and the appropriate number of protons, neutrons and electrons.

The advantage the program has over a table in a book is that it will also test you on the entire periodic table or on any part of it.

C TABLE

YOU FACE Mr Spec Trum on the centre court at **Wimbledon** and the first player with 10 points will be declared Grand Champion. Move up with q, down with a, right with p and left with o. Serving is automatic. After w has been pressed all future hits will bounce upwards and after s has been pressed they will bounce downward.

A game for the 16K or 48K Spectrum by M Birch of Kidderminster, Worcestershire.

PARACHUTE DROP

AS THE aircraft flies across the screen, jump by pressing 0. Pressing 9 opens your parachute, allowing you to steer with keys 5 and 8. Your aim is to land on the randomly-placed landing pad each time and the later you open your parachute the more points you gain.

After you have dropped 10 times, if your score is more than 120 and you still have five lives remaining the game will continue with the aircraft flying slightly lower.

Parachute Drop was written for the Spectrum by Andrew Burton of Worksop, Notts.

PANIC

A SERIES of levels are connected by ladders. On some of those levels there are monsters. Your task is to kill as many monsters as possible, by standing next to a monster and pressing key 0. Each time a monster is killed a hole will appear in the floor and if you fall into one you will be killed. Forethought is needed to allow you to survive for as long as possible.

Panic was written for the 16K ZX-81 by S Miller of Bideford East, Devon.

SHOOT THE missiles as they try to escape their planet's atmosphere on the right of the screen. If five escape into hyperspace they will destroy your home planet and the game will end. Your cosmic cannon is situated on the left of the screen. It moves left with "5", right with "8", and fires with "B". Its shots travel upwards, hit the top of the play area and ricochet down on the right. Skill is needed to aim them correctly.

Rebound was written for the 16K Spectrum by P J Willcox of Ely, Cardiff and is this month's program of the month. Willcox works in a local hospital and bought his Spectrum primarily for his children to use. He found the games which could be played on it captivating and began to write his own.

In the future he would like to write a program which would provide complete horoscopes. After that his plans are more optimistic. He would like to learn machine code and write a program which would make his fortune.

GOBBLE TRAP

RICHARD PARR of Ipswich, Suffolk, who wrote **Gobble Trap** for the 16K ZX-81, defines it as "Pac-man with a difference", the difference being that there are no ghosts. Move round the maze eating the power pills but the maze develops around you and eventually will either trap you or squash you beneath a wall.

You have three screens on which to achieve as high a score as you are able.

COLIN CLARKE of Colchester, Essex wrote **German Tester** for 48K Spectrum owners. The program tests your vocabulary, definite and indefinite articles, verbs and translation. A menu at the beginning of the program allows you to choose on which area you are to be tested and how long the test should be.

TWIGGY

SET THE SIZE of a pile of matches and the maximum number of matches which can be removed from it at once. Then you and the computer take turns to remove matches. The object is to force your opponent to remove the last match.

Twiggy was written by M Clarkson of Leeds for the 16K ZX-81.

OUR CHALLENGE earlier in the year to write a Noughts and Crosses program in which the computer took part resulted in several programs being sent to us, the best of which was printed last month. Stuart Humphreys, Pip Wright and Ian Humphreys of Newtown, Powys took the basic formula of the game and changed it round to produce the game **Hard Lines** for the 48K Spectrum. Here the idea is to avoid either you or the computer forming a line. If no line is completed you win the game; if not, the computer wins.

```

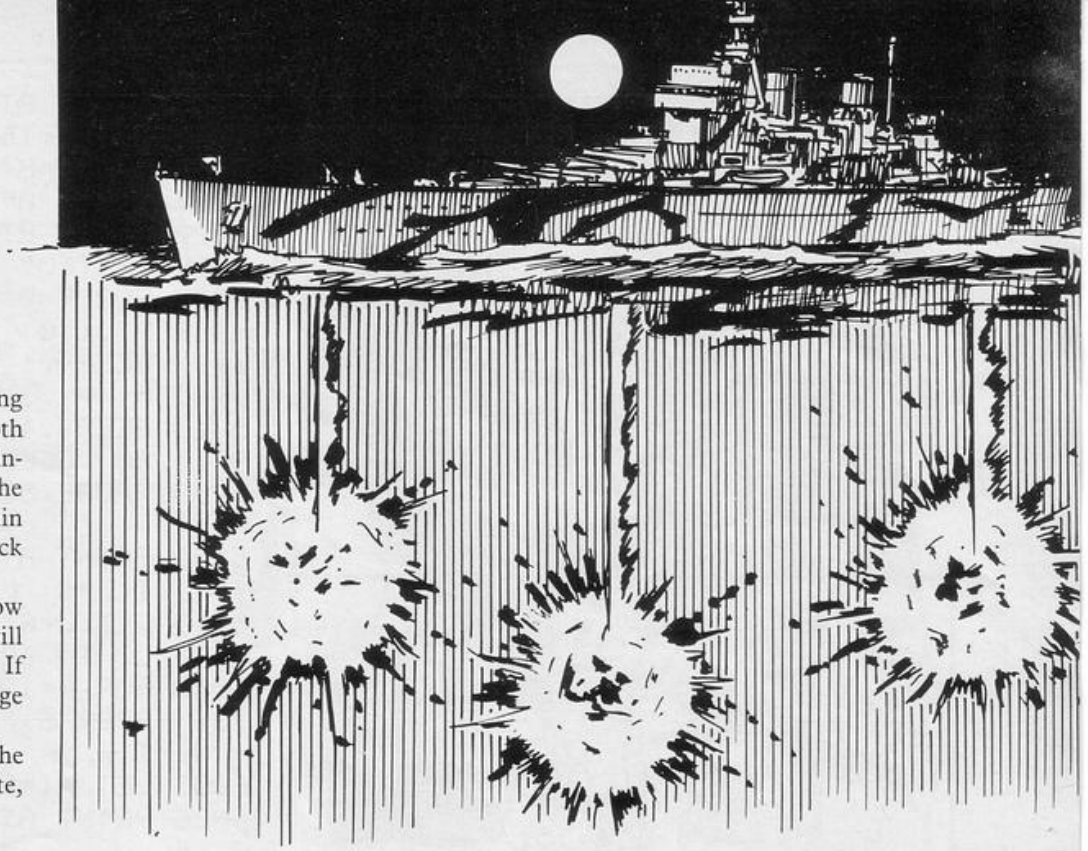
YOU ARE a bricklayer who has just completed a wall. A bird flies over, dropping rocks which chip away bricks.

Repair the wall by climbing to the top of the ladder on the right of the screen to get some bricks and place them in the appropriate place.

M Green of Maidstone, Kent, who wrote **Brick a Brack** for the 16K Spectrum, says that a score of more than 1,000 is excellent.



YOU ARE a submarine-destroying ship armed with 50 depth charges. Your equipment continually throws shock waves towards the sea bed. When a submarine is within range the shock waves will bounce back more quickly than usual.

Judge from the shock waves how deep to set the depth charges. You will have two strikes at each submarine. If you miss they will fire back and damage your ship.

Depth Charge was written for the 16K Spectrum by Neil Seward of Yate, Bristol.

CODE BREAKER

THE COMPUTER will select a three-digit code number in **Code Breaker** which you must decode as quickly as possible. Enter your version, one digit at a time, and the computer will tell you which numbers are correct. It should be possible to find the number in fewer than 10 attempts. If you are completely baffled enter A, B and C for the correct answer.

Written for the 16K ZX-81 by B Merry of Clifton, Bedfordshire.

GRAND PRIX

MOVE YOUR car around a fixed track. Turn right with "8", left with "5", brake with "6", and accelerate with "7". Do not keep your finger on the steering keys or you will find yourself turning more than once and crashing into a wall. Imagine that you are the driver of the car, so that what appears to be up or down on the television screen involves a turn either to left or right.

Grand Prix was written for the 16K Spectrum by C Stock of Chelmsford, Essex.

AGF

PROGRAMMABLE JOYSTICK INTERFACE

for

Spectrum

or ZX81

ONLY 32-95 +£1·00pp

ABOUT OUR PROGRAMMABLE INTERFACE

Surpassing the outstanding specification of our Interface Module II which still offers the best software support at its price, a Joystick Interface that is compatible with ALL SOFTWARE through its unique hardware programmable design.

The Interface plugs on to the rear connector of your ZX81 or ZX Spectrum.

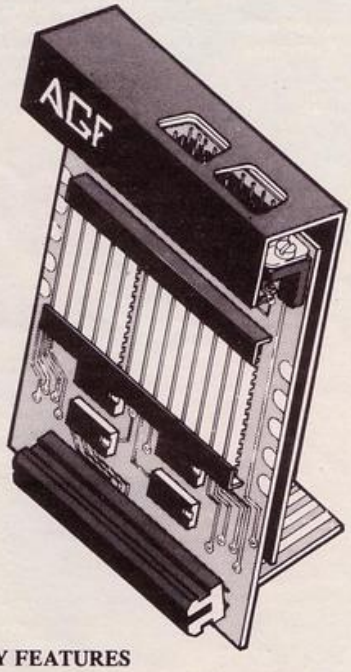
Quick clip-on connections, which are configured from a reference card supplied, allow you to define which of the forty keys are simulated by which action of the Joystick. A pack of ten Quick Reference Programming Cards makes setting for your favourite games even easier. These can be filled in to show at a glance the configuration required and stored in the cassette case of the particular game. When you change to a game using different keys the module is re-programmed in a few seconds.

As with our Interface Module II the Programmable Interface accepts all standard switch Joysticks that are Atari-compatible. Two sockets are available which are connected together for two player games which use the same keys for both players.

The Interface resides in the keyboard address space and does not affect its operation or interfere with any other add-ons. A rear extension edge connector will accommodate expansion of your system.

The unique AGF key simulation principle makes it extremely easy to incorporate Joystick action in your own programs. All eight directions and fire are read by simple BASIC.

With every order comes a free demonstration program called 'Video Graffiti' plus a full set of instructions.



KEY FEATURES

- ★ Programmable design gives TOTAL software support.
- ★ Accepts Atari, Competition Pro, Wico, Starfighter, Quick Shot, Le Stick etc.
- ★ Rear extension connector for all other add-ons.
- ★ Free demo program and instructions.

PACKAGE CONTENTS SUPPLIED

- Programmable Interface Module as illustrated, complete with clip-on programming leads.
- Self adhesive programming chart detailing how to define which key is simulated by UP, DOWN, LEFT, RIGHT, and FIRE. This can be fixed on to the case of your computer or if preferred the protective backing can be left on. The chart is made of a very durable reverse printed plastic and is extremely easy to read.
- One pack of ten Quick Reference Programming Cards for at-a-glance setting to your games requirements. The card allows you to mark the configuration in an easy to read fashion with space to record the software title and company name.
- Video Graffiti demonstration program which is written totally in BASIC to illustrate how all eight directions and fire can be read. This is also a useful high resolution drawing program.
- 12 months guarantee and full written instructions.

JOYSTICKS

ATARI CONTROLLERS

FOR USE WITH OUR INTERFACE Module or VIC 20, Commodore 64, Atari VCS, Atari 400, Atari 800

JUST AROUND THE CORNER, A NEW

BLACK CRYSTAL

The Classic, six program adventure game for the 48K Spectrum and 16K ZX-81 computers. No software collection is complete without it.

"BLACK CRYSTAL is an excellent graphics adventure and a well thought out package" (Sinclair User, April '83).

"BLACK CRYSTAL has impressed me by its sheer quantity and generally high quality of presentation. I am afraid I have become an addict" (Home Computing Weekly, April '83).

SPECTRUM 48K 180K of program in six parts . . . only £7.50
ZX-81 16K over 100K of program in seven parts . . . only £7.50

Why pay more for less of an adventure?

ZX-81 COMPENDIUM

Alien Intruder, Wumpus Adventure, Numerology, Hangman, Hieroglyphics, Movie Mogul.

The ideal software package for all 16K ZX-81 owners. Six major programmes on two cassettes for only £6.50.

"Alien Intruder/Hieroglyphics — Both programs make good use of graphics and words to make a very entertaining package." (Sinclair User, Aug '82)

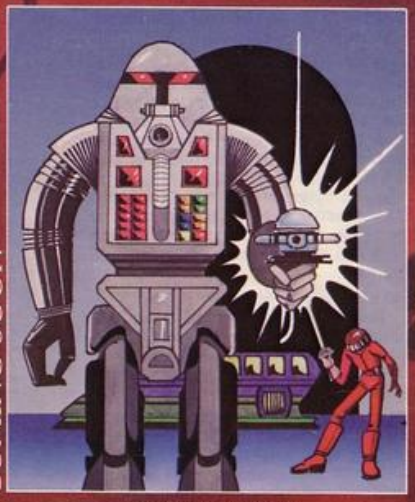
"Alien/Hieroglyphics/Wumpus/Movie — A varied mix from Carnell, all featuring imaginative responses and graphics and all of them good games for all ages (Hieroglyphics is particularly good for children)." (Popular Computing Weekly, Aug '82)

COMING SOON

THE ADVENTURES OF ST. BERNARD

An exciting, fast moving, machine code, arcade game where you guide your intrepid St. Bernard through the perils of the icy wastelands to rescue his Mistress from the clutches of the abominable snowman.

COMING SOON



STARFORCE ONE

Take on the robot guardians of the central computer in a superbly stylised three dimensional battle game.

(100% MACHINE CODE ARCADE ACTION)

COMING SOON

THE CRYPT

written by Stephen Renton

Prepare yourself for the many challenges that shall confront you when you dare to enter "THE CRYPT".

You will battle with giant scorpions, Hell spawn, Craners, Pos-Negs and if you are unlucky enough — the Dark Cyclops in this arcade style adventure.

Available now for the 48K Spectrum @ £4.95

COMING SOON

THE DEVIL RIDES IN

I uttered the last incantations as the clock struck thirteen. All fell silent except for a faint rustling in the corner. From out of the shadows they came, all Hell's fury against me but I was not defenceless until the Angel Of Death, astride a winged horse, joined the battle. Avoiding his bolts of hell fire, I took careful aim. My chances were slim, but if my luck held . . .

(Fast moving, machine code, all action, Arcade game)

RANGE FROM CARNELL SOFTWARE

COMING SOON

"THE WRATH OF MAGRA"

The first born has been destroyed. The Black Crystal of Beroth has been banished. The alliance of Evil has been defeated by the armies of Lord Fendal. So ends the Third Age. Now we invite you to write your name in the history of the Fourth Age of the Third Continent.

You will meet friends and enemies, old and new, in the long awaited sequel to Volcanic Dungeon. Using high resolution graphics and combining the best qualities of "Black Crystal" and "Volcanic Dungeon", we will allow you to become part of this tale of revenge.

"The Wrath Of Magra" comes as three, 48K programs on cassette, boxed with instruction manual and book detailing the history of the Third Continent and the many spells you will be using throughout the game.

NOTE: "The Wrath Of Magra" is a complete adventure. You need not buy "Volcanic Dungeon" or "Black Crystal" to play it.

Available through most good computer stores or direct from:
Carnell Software Ltd, North Weylands Industrial Estate, Molesey Road, Hersham, Surrey KT12 3PL.
Dealers: Contact us for your nearest wholesaler.

CARNELL SOFTWARE LTD

ORWIN SOFTWARE: ZX81 & SPECTRUM

SUPER SOFTWARE AT LOW PRICES

"Michael Orwin has built a reputation for value-for-money software and his Cassette 4 offers quantity as well as quality."

Sinclair User, October '82

"If each game was on a separate tape and selling for £5 each I would still recommend them. But all on one for £5 . . . ! This sort of value for money just has not been seen before on any personal computer."

"Without sounding pushy I would like to conclude this review by saying — if you have a ZX-81 and like games, then you should buy Michael Orwin's cassette 4."

2 extracts from *ZX Computing*, Oct/Nov '82

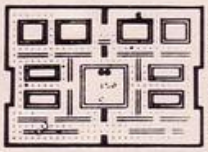
"Eight games, including an excellent version of the Scramble arcade game . . . Easy to operate, graphically impressive and good value for money."

The Times, Saturday 11th December 1982 (about Cassette 4)

NEW! FOR 16K SPECTRUM

(will also run on 48K Spectrum)

CASSETTE A **Ten programs for £6**



GHOST GOBBLER Eat the ghosts before the ghosts eat you. Eat a star and you can chase the ghosts for a while.

ALIENKILL Control lasers, rockets and a force-field to stop the aliens from landing.
MOUSETRAP Trap the mouse in the corner but not anywhere else.
REVERSI A game of skill with simple rules but sophisticated tactics. Play against the computer.
LASER DEFENCE Control the laser sight to shoot down the alien ships. Machine code sound routines.

TANK BATTLE For 2 players simultaneously or play against the computer. Each player has 2 rotate controls and move and fire controls. The tanks fire steerable missiles.
PHOEBUS A puzzle.
BLACKSPOT Gobble the stars and avoid running into black spots created by crossing your own path.
CUBE Manipulate a cube any size from 2×2×2 to 7×7×7.
MINEFIELD Collect the crowns while avoiding the mines and the electrified fence.

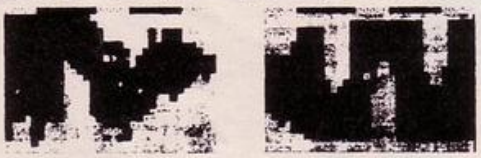
plus an extra . . .

GRAPHIC DEMO Did you know your Spectrum could do all this!?

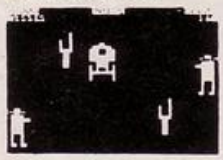
CASSETTE 1, eleven programs (including 7 in machine code) for 1K ZX81 **£3.80**	**CASSETTE 2**, ten games in Basic for 16K ZX81 **£5**	**CASSETTE 3**, eight programs (including 1 in machine code) for 16K ZX81 **£5**

CASSETTE 4 **8 games for 16k ZX81** **£6**

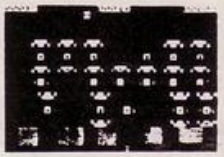
ZX-SCRAMBLE (machine code) with 3 stages.
Bomb and shoot your way through the fortified caves.

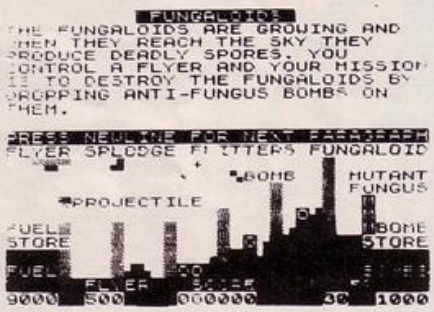


GUNFIGHT (machine code)



INVADERS (machine code)





GALAXY INVADERS (machine code)
Fleets of swooping and diving alien craft to fight off.

SNAKEBITE (machine code)
Eat the snake before it eats you. Variable speed. (very fast at top speed).

LIFE (machine code)
A ZX81 version of the well known game.

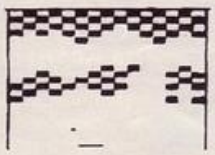
3D TIC-TAC-TOE (Basic)
Played on a 4×4×4 board, this is a game for the brain. It is very hard to beat the computer at it.

7 of the 8 games are in machine code, because this is much faster than Basic. (Some of these games were previously available form J. Steadman).

CASSETTE 5 **8 games for 16k ZX81** **£6**

BYTE-MAN (machine code)
(previously available from Mindseye)

BREAKOUT (machine code)



SPACE RESCUE (machine code)
(previously available from Mindseye)

BLITZ (machine code)

PLANETOIDS (machine code)
Rotate, move, fire and hyperspace controls. Wide range of choice of speed and difficulty.

DODGEMS (machine code)
Dodge the computer's car while eating the dots.

DRAUGHTS (machine code)
Three skill levels.

MERCHANT (Basic)
Make your fortune on trading voyages in the Mediterranean and beyond.

7 of the 8 games are in machine code because it is much faster than Basic.

Please make cheques payable to ORWIN SOFTWARE.
ORWIN SOFTWARE, Dept. OSP, 26 Brownlow Road, Willesden, London NW10 9QL.
ZX81 & SPECTRUM SOFTWARE WANTED

PLONS

PLONS is a Space Invader-type game written for the 16K Spectrum by Umer Nalla of Bolton, Lancashire. Thirty Plons start at the top of the screen and move downwards rapidly. Move left with Q, right with W and fire with P. If you succeed in clearing one screen, a new screen will appear on which the Plons move even more quickly.

WEREWOLF LAIR

YOU ARE trapped in the deadly maze which is the **Werewolf Lair** and the werewolf is on your trail. Avoid him for as long as possible and try to collect all the treasure he drops. If you hide in the doorway marked "E" the werewolf will not be able to sense you.

Written for the 16K ZX-81 by Neil Stevens of Shoreham-by-Sea, Sussex.

GUIDED MISSILE

YOU BEGIN the game in the bottom right-hand corner of the screen. As soon as the game begins a guided missile will begin to shoot towards you from the top left-hand corner. It has the advantage of being able to move diagonally while you have the advantage that it does not chase you in the most efficient way possible. Although you can survive for a long time on slow speeds, it is very difficult to reach a high score on the fastest speed.

Guided Missile was written for the 16K Spectrum by D N Heathfield of Southampton, Hampshire.

EMERGENCY STOP

IN EMERGENCY STOP, two cars appear on the screen. Enter how many metres forward you would like your car to move. The further you move the more points you gain but if you advance too far you will crash and be dragged away to hospital. In how few turns can you reach 100 points?

Written for the 16K ZX-81 by Stephen Turner of Wolverhampton, West Midlands.

DOORS

YOU HAVE fallen unwittingly into the hands of an evil wizard from whom there is no escape. The wizard likes to play games, however, and has devised a special torment for you. A house with many rooms is the play area and each room has a certain number of doors. Behind one of those is the wizard. The longer you avoid him the longer you survive. **Doors** was written by Raymond Mitchell of Warrington, Cheshire for the 16K ZX-81.

40 BEST MACHINE CODE ROUTINES FOR THE ZX SPECTRUM £5·95

By Andrew Hewson and John Hardman. This book teaches the beginner all he needs to know in a simple, easy-to-learn form and its an invaluable reference work for the expert too! SECTION A: Three chapters explaining what you need to know about Z80 machine code on the Spectrum. • How to load and save machine code. • How to use the system variables. • How memory is organised. • How program lines are stored. • How to use the stack, the display, the attribute files. • How to call ROM Routines – where they are and what they do. • The structure of Z80 code – plus a valuable glossary. SECTION B: 40 routines including, • Scroll – up, down, side to side by pixel or by character. • Search and replace, token swap, string search. • Rotate character, invert character – horizontally and vertically. • Line renumber – including GOSUBs, GOTOs, RUN etc.

20 BEST PROGRAMS FOR THE ZX SPECTRUM £5·95

By Andrew Hewson. Program titles include: MACHINE CODE EDITOR – Write, modify, extend and load machine code using this all-basic program. No need to use an Assembler when you have this program. INDEX FILE – Learn about fixed length records, save numeric and string information, add to, sort, modify, delete and print your records. Ideal as a computer based filing system. DUCKSHOOT – Learn how to manipulate the attributes file *and* have fun at the same time. GRAPHIX – Construct up to 210 graphics characters with the full on-screen editing facilities, enhance and modify them and recall them later to build a detailed display to save on cassette. SPIROMANIA – A program to stretch your artistic talents, imagination and ingenuity. Draws a limitless variety of curves and spirals. Plus: FOOTBALL, DIGITISER, DIARY and many more.

SPECTRUM "" Software

COSMIC RAIDERS (16K) £5,95

You — the only remaining pilot of the "Earth Defence Fleet" — have the daunting task of defending the Earth from attack by alien beings that have already set up a base of their own on earth.

*** Radar Scanner display in hi-res ***
*** Full colour and sound effects ***
*** From the author of Spectrum 'Scramble' ***
*** 100% machine code ***

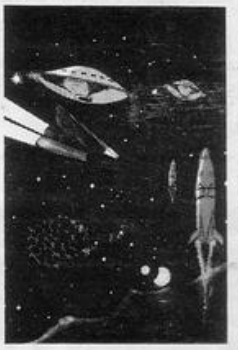
SPACE ZOMBIES (16K) £5,95

Shooting through space you are ambushed by a fleet of Space Zombies flying at you in formation, swooping and diving at you. Destroy them, if you can! But in destroying them, you attract more to the area, and the game gets progressively harder.

*** Full screen hi-res graphics ***
*** 1 or 2 players * Joystick option ***
***Full sound and colour ***
***Three playing speeds ***

MINES OF SATURN and RETURN TO EARTH £5,95

(16K) Text Adventure



Mines of Saturn While piloting a routine orbit of Saturn, you are caught up in a radiation storm which forces you into the giant planet's rings. Your energy drained, you make a forced landing on the planet's surface. Luckily you crashed near an abandoned mining base and you set off in search of some di-lithium crystals to refuel your stranded space ship. Can you do it?

Return to Earth Having escaped from your previous dilemmas, you reach Earth Station 1, but fail to make radio contact. You effect a safe if harrowing manual ducking. On entry you find it deserted, and the control room destroyed. You must explore the station and find some way to alert Earth of your predicament, but beware, many of the rooms are identical, there is extensive damage, and signs of alien intruders.

MAD MARTHA £6,95

Graphic Adventure (48K)

Poor little Henry is the hen-pecked hero of this domestic tale. One night he can take no more. He steals his wages from his wife's purse, sneaks out of the house being careful not to wake the baby or trip over the cat, and heads for the bright lights to have some fun. Trouble is he runs out of money. His only way to raise some cash is to gamble his few remaining pounds on the spinning wheel of the roulette table. Just as Henry is getting into his evening his wife — Mad Martha — has noticed his absence. Realising Henry has absconded with the housekeeping she sets out after him with an axe. Guess what part you play in this happy tale? That's right, you're Henry. Watch out for that axe!

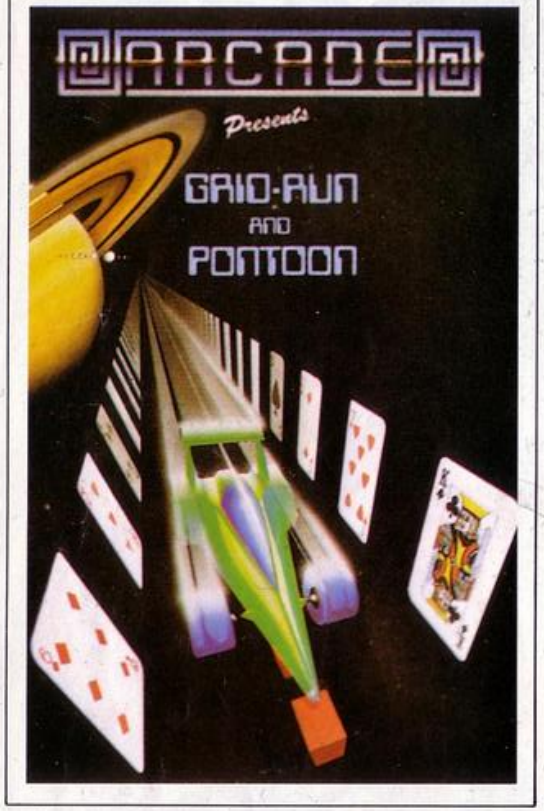
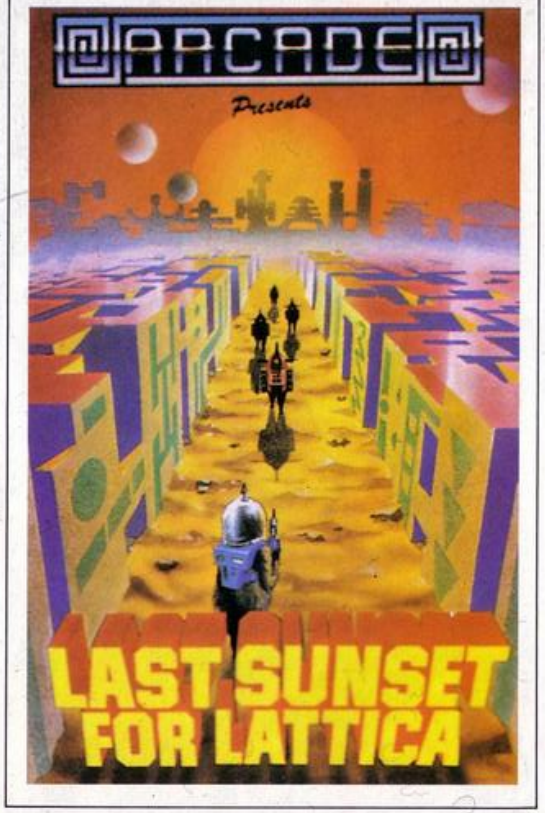
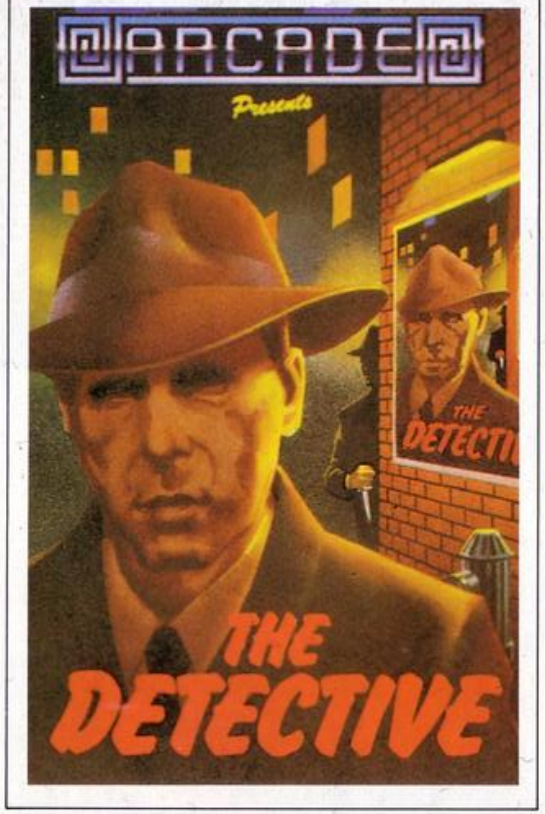
THE ARCADE COLLECTION



GRID RUN is a high resolution, fast machine code game using the spectrums sound and colour to the full. Set in a maze you must avoid oncoming android cars bent on your destruction. Bonus car every 10,000 points "Famous Five" hall of fame, increasing speed and difficulty. There is even a hold button to get your breath back.
PONTOON included on side B absolutely free. Pontoon has full graphical representations of all the cards including King, Queen, Jack, "Intelligent" play of aces, and full analysis of results at end of each game. REF. GRID.



LAST SUNSET FOR LATTICA (Original) is a true graphical adventure game in real time. Your aim is to defuse a bomb hidden somewhere in a highly complicated maze avoiding many well armed androids along the way. Extra lives are there for the taking, so are the keys to take you to the next level and all the while time is running out for the little Planet of Lattica. REF. SUN.



THE DETECTIVE (Original) You thought it was just another "Take the secrets from a Safe and Run" job but the mob thought differently. They will try everything to stop you this time, if madmen, lasers, bombs, dynamite, daggers, barrels, blister bombs, crates, helicopters, jets and fourteen other levels do not get you, you might just make it. Opening the safe has its pitfalls too. Fast moving, m/c game with excellent graphics and sound. A very addictive game. REF. DET.

RAIDER OF THE CURSED MINE (Original) Greed drove you down into the old diamond mine, sheer determination and luck is the only way out again. Lifts help you, so do lamps, and diamonds can be worth a fortune but beware of the evils that lurk deep in the mine. Trolls who throw boulders at you, spiders who eat you, ghosts who show no mercy and bats who steal things, add to this a time bonus and you have an exciting Arcade quality game. Reach level 32 and escape to the big outside world. REF. RAID.

All these games are available for the ZX Spectrum 48K for the incredible price of only **£5.50** including P&P VAT etc. Just complete the mail order form for prompt dispatch by return of post.

Arcade are committed to original game concepts so look out for new titles in the Arcade range. Trade enquiries welcome. Phone Orpington 35639 anytime or write to Arcade Software Ltd, Technology House, 32 Chislehurst Road, Orpington, Kent BR6 0DG.
