## Possum helps disabled

A SPECIAL version of the Spectrum has been developed for use by disabled people. The basic machine has been adapted so that it can be used by people who cannot cope with the normal keyboard.

The machine is the result of collaboration between Sinclair Research and Possum Controls of Slough, Berkshire which sells a wide range of electronics systems for the severely disabled.

There are three methods available for using the Spectrum — an expanded keyboard, a joystick or footskate, and a scanning system in which the operator stops a scanning light when it reaches the required instruction.

## Delays 'are shorter'

CONFIDENCE is growing at Sinclair Research that the worst of its delivery problems are over. A spokesman said at the time of going to press that production is running ahead of new orders and the backlog is being reduced daily.

It was admitted that the previous hopes of everything

being back to normal by the end of September were not achieved but it was expected that orders would be on 28 days' delivery during October.

During the last month *Sinclair User* continued to receive many complaints, a selection of which we publish on page iii. One reader

**Timex Factory in Dundee where Spectrums are built**

telephoned the office following Mrs Thatcher's visit to Japan, during which she presented a Spectrum to the Japanese premier. He said it seemed the only way to obtain one was to be Japanese.

The company spokesman said that delivery of the 16K was less than 10 weeks and improving quickly, and the 48K situation, which had worsened at the beginning of September, was also improving rapidly.

"We have additional output from the Timex factory at Dundee and that is having an impact on the backlog," he said.

He added that the recent revival in sales of the ZX-81 — see page iii — had not been affecting production of Spectrums.

## Software converter launched

SINCLAIR said that it could not be done but someone has managed to discover a way of loading ZX-81 programs recorded on cassette into the Spectrum.

The device is made by East London Robotics, which says

that it will deal with most of the incompatibilities between the two machines.

To load a ZX-81 cassette, the Robotics program must first be loaded into the Spectrum. The ZX-81 program can then be loaded and

read into the Spectrum by following the prompts from the Robotics loader program.

There are several incompatibilities between the two computers. They include the SCROLL command and several graphics characters from the ZX-81 and the INVERSE command on the Spectrum. For some of those incompatibilities there are machine code routines which can be called to deal with them but the INVERSE command cannot be dealt with, as there is no similar command on the ZX-81.

A character set similar to that of the ZX-81 is designed by the loader for programs which might require it.

The soft loader is available from East London Robotics, Finlandia House, 14 Darwell Close, East Ham E6 4BT and costs £10.

## Schools scheme boost

SINCLAIR RESEARCH has announced a £15 million scheme to increase the use of the Spectrum in schools. The machine has already been chosen as one of three computers in the Department of Industry Micros in Primaries scheme and Sinclair has now said that it will increase the benefits available.

Schools which order a Spectrum under the Government scheme will receive a free ZX printer, a free copy of the Logo

computer language and 10 special discount vouchers. The offer is open until the end of 1984.

One voucher can be returned with each additional order for a 48K Spectrum to have the price reduced by £45 or to receive another free printer.

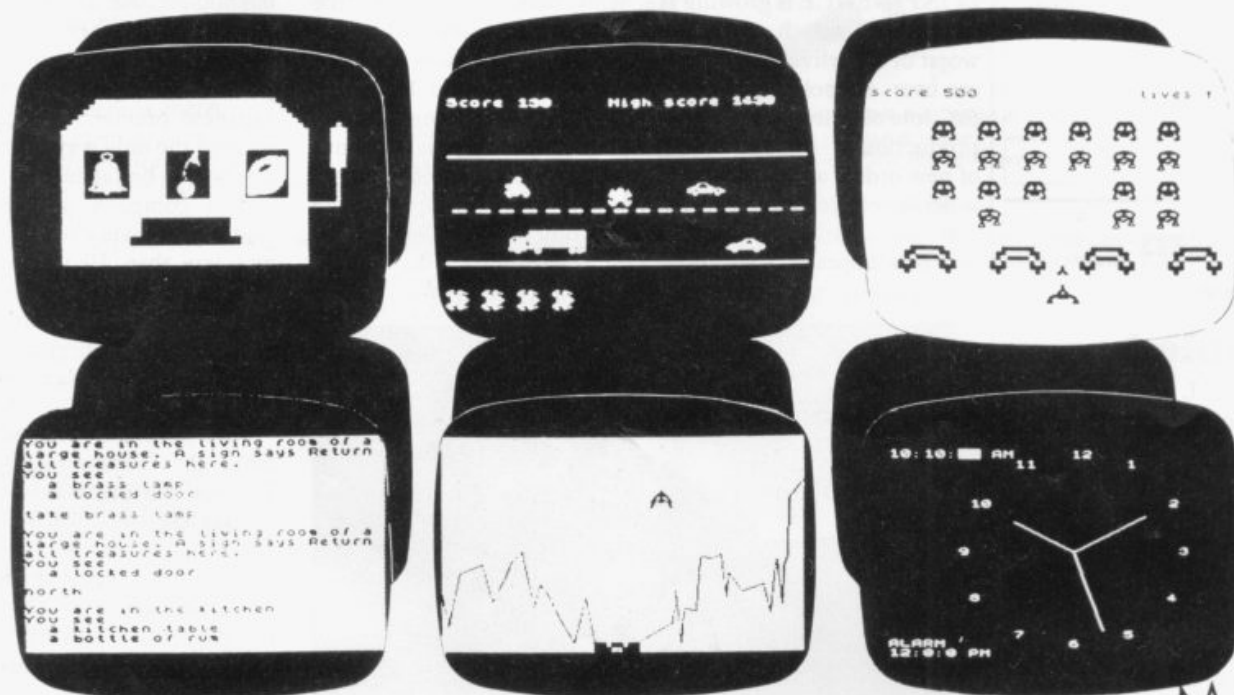

Announcing the scheme, Clive Sinclair said: "Believing that one micro per school is inadequate, our school scheme seeks to make computers

available at low cost to provide sufficient numbers for all pupils to have practical hands-on experience.

When asked about the possibility of delivery delays, Nigel Searle, head of the computer division, said that by the time orders begin arriving there should be no difficulties.

Logo is a language developed in the U.S. for use in education. A new version has been written for the Spectrum.

# Over The SPECTRUM...

## Where Your Dreams Really Will Come True

Actual  
Spectrum  
Screens

**Over The Spectrum** is the book to amaze you with programming techniques that go beyond your wildest expectations!

- ★ Full listings of over 30 programs
- ★ Specially designed easy-to-read format
- ★ Detailed notes for each program
- ★ Programming hints
- ★ Tips on extending the Spectrum

You'll find:

- ★ Exciting arcade games
- ★ Strategy games
- ★ Utilities
- ★ Business programs
- ★ Educational programs

Incredible value, over 160 pages including 8 pages in full colour.

**Only £6.95.**

Now on cassette all the programs from the Over The Spectrum book!

**Cassette 1** includes *Lunar Lander*, *3D-Mazeman*, *Chess* and 7 more; **Cassette 2** has 9 programs including utilities, *Eliminator*, *Freeway Frog* and a full scale Adventure. **Cassette 3** includes *Sales Analysis*, *Payroll*, *Spectrum Invaders*, *Meteor Storm* plus 5 others. Each cassette is **only £5.95** including V.A.T.

## MELBOURNE HOUSE PUBLISHERS

# Promises, promises..

DURING the summer months there was a growing tide of anger and bitterness about the delays in delivery of the Spectrum. We have tried to keep readers informed of what has been happening and in return readers have been telling us their experiences.

For a short time in August the flow of complaints eased slightly but throughout September they streamed in again.

Rather than select portions from the letters and telephone messages, we decided it would be better for the readers to tell their stories in their own words.

As we report on page i, Sinclair Research is again confident that such problems as are related will not be experienced by many other people.

CONGRATULATIONS on your expose of the anger which has developed of the promise-with-no-performance by Sinclair about the Spectrum. I ordered mine in May and it had not been delivered by September, a 15-week delay. There had been various promises from time to time indicating that it would be coming shortly but they proved meaningless.

Irritation has been compounded first by the continued advertising promising a 28-day delivery and also by the various statements reported in the computer press saying that things would be normal shortly.

The latest in one paper was that the 28-day delivery would be achieved by the end of September. If they were still on 15 weeks in the first week of that month, this seems somewhat unlikely.

Perhaps the Spectrum might be re-christened the *Mirage*, as it appears to be an illusion?

**Martin Bennett,**  
London W10.

I AM WRITING to express my frustration regarding my attempts to obtain a Spectrum. Whatever information the Sinclair organisation has released to yourselves, it certainly has not given it to one of its customers.

I ordered a 16K Spectrum via Teledata after checking specifically the delivery time at the beginning of June. On June 28 I received a letter from Sinclair informing me of a further six weeks' delay.

SPECTRUM OR SPECTRE is Sinclair's new machine a mirage?

Since then I have heard nothing.

Sinclair does not answer its telephone on 0276 685311, neither will it reply to letters, even though a s.a.e. is enclosed. Individual customers are powerless to obtain any service from it other than to cancel an order, an action Sinclair can safely gamble we will not do.

May I request that individually or collectively you take some action to move Sinclair from its complacent position? It is a tragedy that its technical achievements are not being supported by its customer service.

**John Catherall,**  
Allestree, Derby.

I FELT I must write to tell you of my experience with Sinclair. I do not know who quoted the delivery claims such as "New orders down to 28 days by the end of September" but by my reckoning my 16K machine

ordered at the end of June would arrive after those new orders.

After six weeks of waiting I received an "It will be only another six weeks" letter. Now after telephoning the despatch department I was told "only another six weeks". I telephoned again and was told that delivery would be as per my 12-week letter, i.e., a total of 18 weeks from order date.

Anyway, at the beginning of

September, at the opening of a new John Menzies store in Glasgow, I was assured by a Sinclair representative that I would have my machine within a week. What rubbish.

According to Sinclair's reckoning of delivery dates, I would get my machine more rapidly if I were to cancel and re-order at the end of September. I still wait — and wait and wait?

**John Tobins,**  
Glasgow.

I WAS interested in your news item of delays on delivery in the September issue. I believe that my situation is even worse. I placed my order on May 15. I telephoned Sinclair at Camberley today to be told there was a minimum wait of another four weeks. I make that a minimum delivery of 22 weeks.

Do you offer prizes for the slowest delivery?

**M R Lee,**  
Sale, Cheshire.

I HAVE made enquiries about the £10 voucher offered by Sinclair. It appears that the offer does not apply if you go to W H Smith or any other authorised dealers. I asked if I could be sent a printer with the Spectrum if I paid the price, then £10, and I was told I could not change my order, so I have to make a new one. I would not get the £10 off until the Spectrum is delivered.

I wonder what Mr Sinclair is offering. To get a printer or a pack of two rolls of paper costs £2.95 in postage. So the real value to the customer of the £10 is only £7.05.

For all the aggravation the whole affair has caused and the many calls we had to make to discover what is happening, I think we deserve something more. I suggest that the RS232 network interface board would be a more appropriate compensation.

**A I Toumazis,**  
London W2.

SEEING YOUR recent news headline that anger is growing over delays in delivery of the Spectrum prompted me to write. After waiting 15 weeks, not the 12 widely-quoted in the technical press, my Spectrum finally arrived.

It worked very well for four days and suddenly stopped, never to go again. I have returned it to Sinclair at a cost of £2.35 and telephoned to find the turn-round time on repairs. My heart sank when I was told that they are not being repaired but I be will sent a new one, and I will join the queue again waiting for a new one.

Three to four weeks is quoted for delivery, which the company obviously cannot meet and I consider I have done my waiting already.

Needless to say I am furious and would cheerfully give Clive Sinclair a piece of my mind if I could get through to him.

**M H Abbott,**  
Newbury, Berkshire.

# ZX SPECTRUM SOFTWARE

**SUPERDRAW16 £5.00 SUPERVIEW48 £5.00**

## List of Features

- \* 16K Spectrum graphics pack.
- \* Full screen high resolution colour.
- \* Moving cursor control.
- \* Large alphabet facility.
- \* Pictures saved on cassette.
- \* Automatic "slide show" option.
- \* Menu driven, easy to operate, crash proofed.
- \* Documented to usual high Video Software standard.
- \* Demonstration slide show.
- \* Audio commentary on reverse of cassette.

## List of Features

- \* 48K Spectrum personal viewdata.
- \* Page creation with moving cursor.
- \* Large alphabet option.
- \* 48 full screen two colour pages OR
- \* 24 full screen full colour pages.
- \* Random page recall.
- \* Continuous page rotate.
- \* Print option.
- \* Full operating manual to our usual standard.
- \* Audio commentary on reverse of cassette.

**Prices include VAT, P & P. Immediate delivery.**

**Full range of ZX81 software still available.**

**VIDEO SOFTWARE LTD.**  
Stone Lane, Kinver,  
Stourbridge,

*You waited long enough for your Spectrum!  
Wait no longer for . . .*

## SPECTRUM STORM-FIGHTERS

*. . . explosive machine code space action*

They come from deepest space.

An alien fleet whose skill is matched only by its ruthlessness.

They hide and manoeuvre in the cover of asteroid clouds . . . showers of cosmic rubble that spell death on collision to the commander of the lone space ship that protects Earth.

You are that commander.

In one of the toughest challenges the Sinclair Spectrum can offer, your mission is to destroy the aliens and avoid the asteroids before they destroy you.

Your weapon is a twin firing laser canon. Double bolts of pure energy that mean instant annihilation to on-target aliens. It's responsive. It's fast. But only as fast as you are.

Put yourself at the controls. On the thrilling edge of adventure . . . the STORM-FIGHTERS await you.

*All machine code action . . . full colour graphics . . . full sound sync . . . progressive difficulty . . . comprehensive scoring . . . high value mother-ship . . . runs automatically on both 16K and 48K models:*

**Available on quality cassette at £4.95 (post free in U.K.) from:**

**JOHN PRINCE**

Manchester M19 3DQ

ZX Spectrum — ZX81

In 1981, ACS Software published ACSEMBLER and DIS-ACSEM. These are now generally regarded as quite simply the best assembler and disassembler programs available for the ZX81.

*"The disassembler . . . is really fantastic."* A.M., London  
*"I am very pleased with the assembler and I feel that you have a real winner in this program."* R.B., Gloucester  
*Your programs are first class. Looking forward to more."* A.J., Norway.

*" . . . the single biggest step to proficiency in machine code programming."* SINCLAIR USER

Now, with the superior facilities of the ZX Spectrum, ACS Software have done it again. **Ultraviolet** and **Infrared** are assembler and disassembler programs that will extend your Spectrum. Look at the facilities that Ultraviolet offers:

Works entirely in decimal (no hex problems); all Z80 instructions correctly assembled; supports the pseudo-instructions EQU, ORG (multiple ORGs allowed), DEFB, DEFW and DEFS; code can be assembled at one location and then re-located; allows alphanumeric labels of any length; full listings of assembled code and mnemonics can be output to the printer; full error trapping with faulty instruction clearly indicated; comments can be included in the source file.

So now there is no need to be intimidated by machine code - with Ultraviolet and Infrared it's child's play! Buy them from the machine code specialists - ACS Software.

**ULTRAVIOLET - £7.50**

**INFRARED - £6.75**

The following programming aids are available for the 16K ZX81 at £5.50 each. SAE for details. Prices include postage and packing for UK orders, overseas clients please add appropriate postage.

ACSEMBLER DIS-ACSEM; ACS DEBUG; PROGSTORE; TOOLKIT; PROGMERGE (version 2); TAPEKIT  
PROGMERGE and TAPEKIT won't make a Spectrum out of your ZX81 but they will give it some interesting new facilities!

**ACS SOFTWARE** 7, Lidgett Crescent,  
Roundhay,  
Leeds LS8 1HN

## SPECTRUM NEWS FROM

Just received your ZX SPECTRUM? No point in looking any further—we have the products you need at the prices you expect.

**SP48**

32K Memory extension  
(giving total of 48K. Upgradeable to SP80)

**£25**

**SP80**

64K Memory extension  
(giving massive 80K)

**£50**

Both the SP48 and the SP80 fit inside the Spectrum case, are fully compatible with all Sinclair add-ons (ZX Printer, RS232, Microdrive etc.), are very low in power consumption, require no soldering, are easy to fit and remove and carry our full guarantee.

Transfer your ZX81 BASIC and machine code programs and data onto your Spectrum in minutes with the fabulous new

**ZX SLOWLOADER**  
**£10**

**SOFTWARE PRODUCT OF THE YEAR**

This superb piece of software enables your Spectrum to LOAD programs from ZX81 tapes and automatically converts them to "Spectrumese" ready for normal Spectrum SAVEing.

## SF GOBBLERS

PUCKMAN FOR 16K ZX81

BEAT THAT HIGH SCORE!  
GOBBLE THOSE DOTS  
BEFORE THOSE MEANIES  
GOBBLE YOU! YOUR ONLY  
AIDES ARE FOUR "POWER  
PILLS" WHICH MAKE THE  
MEANIES EDIBLE. BUT  
NOT FOR LONG!

- MACHINE CODED FOR FAST ACTION
- EXTRA "GOBBLER" FOR 10,000 POINTS
- ON SCREEN SCORING
- HIGH SCORE WITH "ENTER NAME" FACILITY
- UP TO 4 PLAYERS

AN ANNOYINGLY FRUSTRATING GAME FOR ONLY £5.95

## SF ASTEROIDS FOR 16K ZX81

STAY ALIVE AS LONG AS POSSIBLE IN OPEN SPACE FILLED WITH FLYING ROCKS. SCORE BY SHOOTING THEM — WHICH ALSO CAUSES THEM TO BREAK INTO LOTS OF LITTLE BITS AND MAKES LIFE EVEN WORSE!

- MACHINE CODED FOR FAST ACTION
- ON SCREEN SCORING
- HIGH SCORE WITH "ENTER NAME" FACILITY
- UP TO 4 PLAYERS
- EXTRA SHIP FOR 1,000 PTS (NOT AS EASY AS IT SOUNDS!)
- SHIP MOVES JUST LIKE ARCADE VERSION
- ROTATE LEFT/ROTATE RIGHT/THRUST
- FIRES IN ALL 8 DIRECTIONS
- INCREASING NUMBER OF ASTEROIDS
- THREE ASTEROID SIZES
- "NASTY" ALIEN SPACE-SHIP (FIRES BACK!)

THIS GAME IS JUST AS BAD — AND ONLY £5.95

AN OFFER FOR REAL MASOCHISTS — BOTH TAPES FOR £9.95

MAIL ORDER ONLY—PLEASE MAKE CHEQUE/PO PAYABLE TO

## ZX81/SPECTRUM

A fantastic range of 16K games, each complete with fully comprehensive instructions from:-

**M.C. LOTHLORIEN**

**CHRISTMAS PRICE REDUCTIONS**

**ALL ZX81 GAMES NOW £4.50: SPECTRUM ONLY £5.50**

*All spectrum games will run on 16K and 48K machines*

### TYRANT OF ATHENS (ZX81 and Spectrum)

Can you survive long enough to turn Athens into the most feared state in the Mediterranean? Train troops, build warships, fight battles by land and sea against hostile Greek States and the vast Persian Empire. Many more features in this, our best selling game.

### ROMAN EMPIRE (ZX81 and Spectrum)

Your aim is to conquer the hostile countries surrounding Rome. Build armies, appoint generals and fight campaigns. This challenging game takes full account of troop morale, fighting efficiencies, leadership ability etc. 3 levels of play. Test your generalship in this, our most satisfying game. Playtime — 2 hours — 2 days!!

### SAMURAI WARRIOR (ZX81 and Spectrum)

How would you have fared as a Samurai in 13th Century Japan? Face challenges from other Samurai, give aid to villages and resist attacks by groups of marauding bandits. 7 levels of play, a most fascinating game.  
Are you a survivor or will you commit ritual suicide?

**ZX81 only:- PELOPONNESIAN WAR and WARLORD — for details of those games please**

**see last month's Sinclair User — prices £4.50 each**

*Please indicate whether ZX81 or Spectrum. Cheques or postal orders please, payable to:-*

Stephen Adams shows how to adapt ZX-81 add-ons

## Updating peripherals

AS THE Spectrum is fairly new and most of the people who are buying one have had a ZX-80 or ZX-81, I thought it would be a good idea if could use my ZX-81 equipment on the Spectrum. That would have two advantages — one, that I would not have to dispense with ZX-81 equipment and buy new and, two, that I would save time waiting for manufacturers to catch up with the new device.

Looking at the expansion port, the big

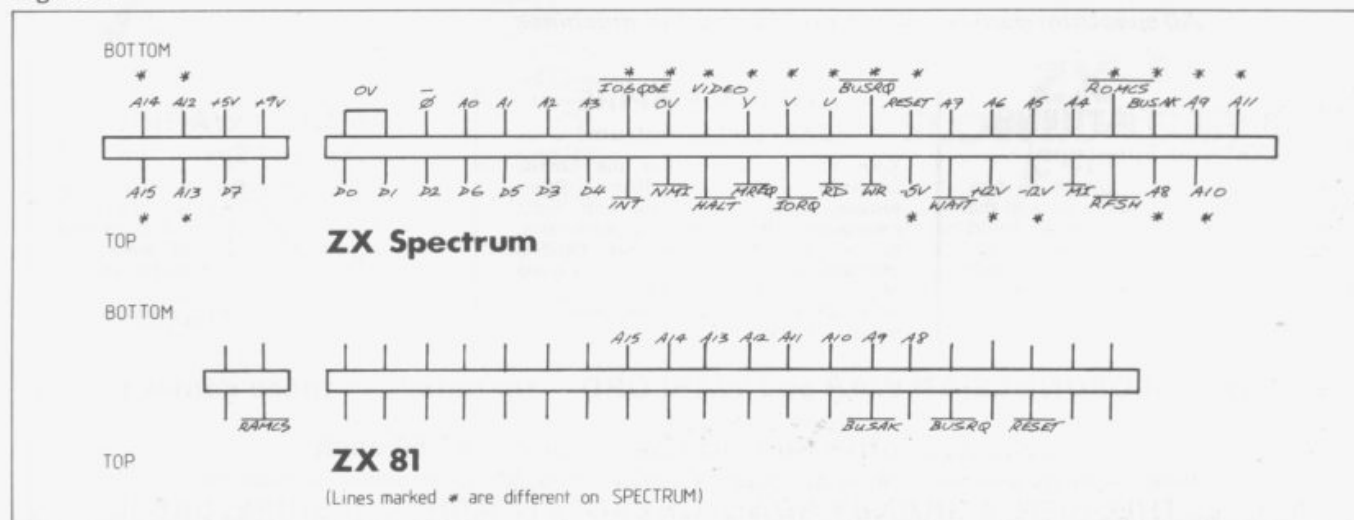

hole at the back of both machines, and its explanation — pages 167 in the ZX-81 manual and page 180 in the Spectrum — I concluded that they were very similar, as only a few lines had been moved out to the edge of the now 28-way long edge connector — the ZX-81 had a 23-way one. Those new lines could be excluded on the ZX-81 side, as they were not essential. If you look at figure one you will see what I mean.

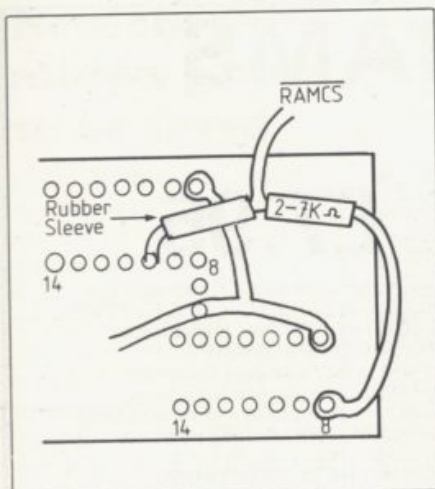

I designed a piece of PCB to move the

address lines which were out of position (A8-A15) back to where they were on the ZX-81. To that I connected a Spectrum edge connector and left unconnected all the other lines marked with an asterisk. I left the ROMCS disconnected as it would be turned off by the ZX-81 equipment at the wrong time, it being 16K long.

If you have a 16K Spectrum there is no need to go any further, as the 32K to 64K part of the memory on the Spectrum is

Figure 1.

**Figure 2.**

empty. Any ZX-81 equipment which worked in this space would also work on the Spectrum, so long as it did not use ZX-81 ROM routines.

The Sinclair 16K RAM pack would also work but would be in the same position as the on-board RAM — from 16K to 32K — so would not increase the RAM available. Input/output devices would also work, except if they used the Spectrum clock signal or the address lines A0-A4. The full 64K of addresses would also be available, even with the printer connected — the printer blocks-off 10 of the connections if used direct.

On a 48K Spectrum input/output devices still work but the space in the memory map is now full of RAM. On the ZX-81 this is taken care of by a RAMCS connection which can be used to turn-off all or part of the internal RAM on the computer when another device wants to use the space.

The Spectrum has had this pin left disconnected inside on the edge connector and the next job is to restore this device to it. As there is no provision for a RAMCS on the 32K plug-in RAM board we shall have to make some alteration to the circuit. That involves cutting a metal track on the underside of the board where the components are — see figure three — and connecting a resistor across the break. That is the same way the ROMCS is done on the ZX-81.

The idea is that we can turn-off the RAM by raising the RAMCS connection to +5V on the input to the gate — see figure four — which will have the effect of preventing the output of the other gate having any effect. That means that any time the address on our ZX-81 device is reached it can put out +5V and replace the RAM.

It also means, of course, that you cannot use this RAM at all, as you will always address the device. There is

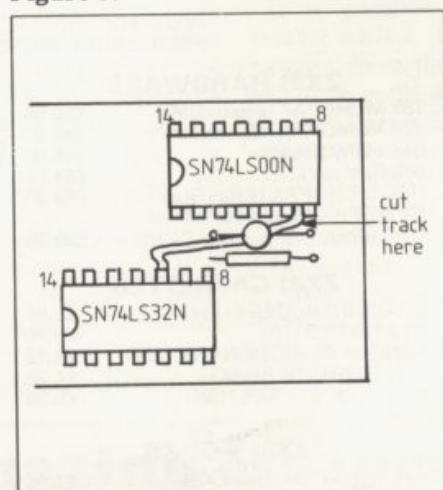

usually +5V put out by most ports but it does not appear on the RAMCS pin — it appears on the ROMCS pin.

That was because where all the spare space was on the ZX-81, the ROM appeared also. Figure five shows a transistor and resistor circuit to overcome this. A transistor used as the ROMCS on its own is usually not sufficiently powerful to turn-off the RAMCS. It should be mounted on the adaptor instead of inside the Spectrum, as the ROMCS pin on the Spectrum is in use.

The transistor is operated like a switch, in that when +5V is applied to its base (B) it provides a connection from its collector (C) to its emitter (E). That applies +5V via the 10K ohm resistor to the RAMCS connection on the Spectrum.

This system will work only if the ROMCS of the port, or whatever, turns on the +5V only when it is addressed. I have seen at least one device which turns off the ROMCS only when the 0-8K

**Figure 3.**

section of memory is requested. That meant that the RAM was permanently turned off. This modification, of course, turns-off only the 32K board RAM and does not affect the bottom 16K of RAM, which is used to hold the screen — see page 165 of the Spectrum manual for the memory map.

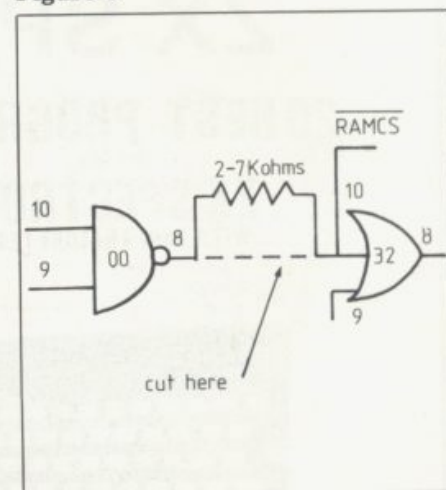

When turning-on the Spectrum with a port attached, some loss of RAM must be expected. The amount of RAM lost can be checked by PEEKing the PRTOP variable stored in locations 23732 and 23733. PRINT PEEK23733\*256 + PEEK 23732 will give the last piece of RAM available to the Basic.

The lower the port location in memory, the more memory will be lost. That is because the RAM check done by

the Spectrum looks for the last piece of continuous memory from 16K upwards. If that is broken in the middle by port, it will be ignored.

So there are now two ways of putting

**Figure 4.**

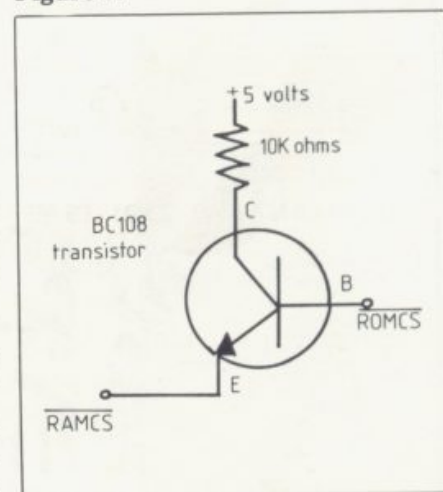

ZX-81 equipment on to the back of a Spectrum. One, by de-selecting some of the top 32K of RAM to put in your device and the other via the I/O map. A memory-mapped device can sometimes be transferred to the I/O map with some success if it fails to decode the bottom five address lines.

The only physical change which needs to be made is to cut the track on the device going to MREQ and connect to the next pin on the right (IORQ) — see diagram one.

All the addressing will then have to be done via IN and OUT instructions in Basic instead of PEEK and POKE.

The author can supply an adaptor to make use of the 16K RAM pack or other devices which need decoding. Contact him at 1 Leswin Road, London N16 7NL, enclosing a SAE if it is an enquiry.

**Figure 5.**

# 20 BEST PROGRAMS for the ZX SPECTRUM £7.95

## 20 BEST PROGRAMS for the ZX SPECTRUM WITH EXPLANATORY TEXT

Mr HELPLINE — the man who answers your ZX queries in his column in *Sinclair User*, the author of HINTS & TIPS FOR THE ZX80 and HINTS & TIPS FOR THE ZX81 now presents his 20 BEST PROGRAMS FOR THE ZX SPECTRUM.

- \* 20 original programs for you to load into your Spectrum.
- \* 20 interesting programs for you to enjoy and learn from.
- \* 20 great programs to teach you about fixed and variable length records, binary searches, bubble sorts, floating point arithmetic, graphic displays and much, much more . . .
- \* 20 BEST PROGRAMS FOR THE ZX SPECTRUM.

### Program Titles Include:

- Machine code editor — Write, modify, extend and load machine code using this all-Basic machine code editor. No need to use an Assembler when you have this program.
- Index file — Learn about fixed length records, save numeric and string fields, add to, sort, modify, delete and print your records. Ideal as a computer based card index.
- Duckshoot — Learn how to manipulate the attribute file and have fun at the same time.
- Diary — Binary searches and variable record lengths are explained with this useful and interesting program.

PLUS: FOOTBALL, DIGITISER, DATA PLOT, FUNCTION PLOT, REGRESSION, HISTOGRAM, LINE RENUMBER and many more . . .

### Z80 OP CODES £1.45

A must for the beginner and the experienced programmer alike. This handy ready reckoner lists all 600 plus Z80 machine code instructions in decimal and hexadecimal with their mnemonics. Each Op Code is succinctly explained and cross-referenced. Supplied in a protective transparent wallet for easy reference and durability.

### PROGRAMMERS TOOLKIT ZX81 £6.50

Toolkit functions include:

- \* RENUMBER including the destination lines of GOTO's and GOSUB's.
- \* START and Finish lines and Step size specified by you.
- \* DELETE part or all of a program at your command.
- \* REPLACE character(s) or token(s) with an equal number of others specified by you.
- \* EDIT to create sub-routines at a stroke by moving blocks of basic program lines.
- \* FIND a basic program string specified by you.
- \* INPUT prompts for a two digit hexadecimal code and pokes it in at a specified address.
- \* Separate version available for 48 + B and 64K memories (resides at B192).

### PILOT ★ ZX81 £5.95

New and exciting. Pilot challenges you to take off, fly between beacons, then land whilst watching wind speed and dodging craggy mountains — either could lead to disaster! If you take the challenge, you may soon learn to fly solo — so detailed are the flying instructions. Coast along in Autopilot — put to gain confidence, then battle your way through 6 further modes, 6 different ways of trying to steer your plane safely back to base, increasing in difficulty, testing your skills. Good luck with your fight against the unpredictable elements!

### PUCKMAN NEW! ZX81 £5.95

- \* All action display
- \* Scour the maze for food
- \* Dodge the ghosts who come to devour you
- \* Automatic option — the machine plays itself
- \* Full keyboard display
- \* Full instruction display
- \* Continuous scoring
- \* Beat the best score to date
- \* Super graphics when used with Quick Silva graphics board

### ZX81 HARDWARE

16K MEMOPAK (expandable)	£29.90
32K MEMOPAK (expandable)	£49.90
64K MEMOPAK	£79.00
56K Ram pack	£54.95
HRG MEMOPAK Hi Res Graphics	£59.80
MEMOPAK Centronics printer interface	£39.90

### ZX81 CASSETTES

SPACE INTRUDERS (16K)	£5.95
STATISTICS (1K)	£3.75
LANGUAGE DICTIONARY (16K)	£3.75
LINE RENUMBER (16K)	£4.95
NAVAL BLOCKADE (16K)	£5.95

### ZX81 BOOKS

HINTS & TIPS for the ZX81	£3.95
---------------------------	-------

### ZX SPECTRUM CASSETTES

MACHINE CODE EDITOR	£4.95
MUSIC & SKETCH	£4.95

### SPECTRUM ASSEMBLER/ DISSASSEMBLER £8.95

It's here now, the ZX SPECTRUM Assembler from HEWSON CONSULTANTS Side 1 Assembler Side 2 DISSASSEMBLER No more is there a need for two separate tapes because we have put both programs on one tape to give you the best possible value for money. Cassette comes with comprehensive instructions. Order your copy today and soon you will be enjoying the speed of your own machine code programs.

## New chess allows games to be saved

ONE OF the first companies to produce a chess program for the ZX-81 was Artic Computing. Now Artic has beaten even Sinclair and Psion to writing a chess game for the Spectrum. It can be used only with the 48K Spectrum but it gives options which were not possible on the ZX-81. On first loading, the program asks whether the player wants to play, analyse, or load.

Taking the play option first, there are seven levels of play with response times ranging from two seconds to five minutes. The board is represented in high resolution at the right-hand side of the screen and the moves made by player and computer are printed on the left.

The players are represented using user-defined graphics but are a little too small for our liking. It would have been better to have a larger board with bigger characters on it.

Using the analyse option, it is possible to set up the board to allow the computer to analyse a position with which the player may have had difficulty or has found in one of the many chess magazines and books under the heading of chess problems. The instructions for the game also say that this option is ideal for end-game analysis.

The main difference between ZX-81 and Spectrum chess is the ability to save games you have not completed. You can then load the unfinished game into the machine and resume where you finished. It is irritating on the ZX-81 when it is necessary to complete a whole game which could take as long as an hour, or not finish the game. Now that problem has been overcome and it takes only seconds to re-load a game.

Spectrum Chess is from Artic Computing, 396 James Reckitt Avenue, Hull, HU8 0JA and costs £9.95.

## Making Britain great in 48K

IN Great Britain Limited, a game for the 48K Spectrum, the player inherits the problems of the British economy. You have a choice of becoming Conservative, Labour, Liberal or SDP Prime Minister, with a five-year term of office which would give ulcers to any hardened Minister.

The purpose is to manipulate the yearly budget to keep inflation and unemployment at the lowest possible level. That may be difficult one way or another because you may have to raise company taxes to bring down inflation. If you do so, however, people will be made redundant, because bosses cannot afford to retain them. As a result of the tax increases, the dole queues will grow longer.

On top of the mass unemployment, soaring inflation rate, increases in prices and taxes, you may have to deal with riots and general public disquiet.

Every five years you will have to face a General Election and perhaps suffer a humiliating defeat. It is easier to lose in this game than to win. Inflation and unemployment seem to escalate for no reason at all. The game may enlighten a few to the problems of Government but it is a game, not a simulation. It costs £4.95.

**Great Britain Limited** is available from S W Hessel, 15 Lytham Court, Cardwell Cres., Sunninghill, Berkshire.

## Debugging monitor

THE SPECTRUM Monitor is a new machine code entry and debugging program for the Spectrum 16K and 48K. The program is written in machine code and allows free interchange between it and Basic. The monitor occupies slightly more than 4K of user memory, leaving plenty of space for machine code programming and debugging.

Access to any part of memory is allowed and the monitor contains a disassembler which uses the standard Z-80 mnemonics. It is possible to change memory locations and move around blocks of memory.

One major advantage of the

Spectrum Monitor is that it will display the contents of the CPU registers. That will help users to identify bugs in machine code programs.

Another useful addition is a hex/decimal converter.

It is possible to put a disassembled listing of memory on to the printer as well as on to the screen. That is a very useful facility, as it will allow the user to scan programs in a leisurely fashion.

The Spectrum Monitor is an attractively-presented program and easy to use. It costs £7.50 and is available from Picturesque, 6 Corkscrew Hill, West Wickham, Kent, BR4 8BB.

## Amazing escapes in 3D

YOU ARE trapped in a maze which looks slightly like Hampton Court maze. There are several hungry monsters on the prowl waiting for you to give them a quick snack to satisfy their meaner instincts. If you bump into one of the creatures from the prehistoric age while running around the maze your life will not be worth two flint axeheads. That is how a new game for the 16K Spectrum, **Escape**, begins.

The most amazing thing about the game is the graphics. The screen shows a three-dimensional overview of a maze. You must control the

little man at the bottom right-hand corner of the screen with the cursor control keys. The purpose is to wander around the maze to find and pick up an axe. Once you have found the axe you can break down the door of the maze and escape. To do that you must also keep out of the jaws of the monsters.

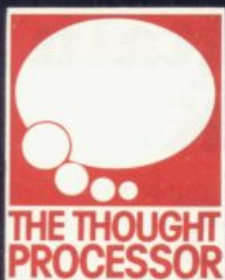

The maze is generated randomly at the beginning of each game.

The game was written by the author of the J K Grege **3D Monster Maze** and is one of the best and most original games we have seen for the Spectrum so far.

Escape is available from

New Generation Software, 16 Brendon Close, Oldland Common, Bristol, BS15 6QE.

## USE AND LEARN VOL.1: 25 BASIC PROGRAMS AVAILABLE NOW

**USE** 25 PRACTICAL BASIC programs you can put to work immediately—

Programs to demonstrate the wide-ranging potential of your 16 or 48K Spectrum:—  
World Atlas — Cassette and Videocassette Index — Music Composer — Computer Term Glossary — Star Maps ...

Personal Programming Aids to help you write your own programs more effectively:—  
Memory Map Monitor — System Diagnostic — Program debugging aids ...

Time-saving routines to use in your own programs:—

Text Editor — Flexible graph drawing routines — Sort and Search routines ...

Plus much more.

And, of course, original games to entertain and challenge you.

**LEARN** New ways to get the most from your Spectrum. Over 100 pages packed with —

Powerful programming techniques:—  
use Structured Programming to save time and make your programs more reliable —  
Ideas to make your games more exciting —  
How and when to use trees, tables, sorts and searches (do you know the Monkey Puzzle sort?) ...

Facts at your Fingertips:—  
Memory and runtime Benchmarks for every

# £9.95

command — Display File Memory Map

— Important PEEK and POKE locations you won't find in your Spectrum manual .

Program Design Aids:—ScreenDesigners, for fast graphics and print layouts —

Memory Manager, to keep track of every variable and array. PLUS:— All 25 BASIC programs explained line by line

— a goldmine of practical hints and tips.

Send today for USE AND LEARN

Volume 1— 25 BASIC Programs, and

we'll also keep you posted with details of further important MiCROL products for your Spectrum. And USE AND LEARN comes with MiCROL's full 14-day money-back Guarantee.

To order simply complete the coupon, and FREEPOST with your cheque, made payable to MiCROL (UK Mail Order).

Despatch normally by return.

Telephone orders—credit card holders can order by telephoning (0223) 312866 from 9-5.30 Monday to Saturday, stating name and address, Card No. Access/Barclaycard/Visa and item(s) required.

# THE DATA BASE

## PRACTICAL. AND ONLY

## POWERFUL. FOR 48K

## RELIABLE. SPECTRUMS

**AVAILABLE NOW £9.95**

Whether you want to update mailing lists, re-organise the filing, or simply produce an index of your stamp collection, THE DATABASE makes it easy and enjoyable:

Easy-to-use one-touch commands and full onscreen prompts for fast, confident operation.

Down-to-earth 40-page manual — full operating instructions plus practical examples to show how THE DATABASE helps you in almost every work and leisure interest.

Massive storage capacity for real-work capabilities — over 900 screens of information (or over 7,000 names and addresses) on a single C90 cassette.

Advanced features you won't find on most £100 + databases — Machine-code automatic sorts and six kinds of searches (including Find Smith, Find Smith And Croydon, Find Smith or Croydon).

Performance you can depend on — professional design and testing ensures the reliability you need for storing important information.

And, with THE DATABASE, you get FREE MiCROL UserCare — informed, intelligent assistance and advice, whatever your question — by letter or telephone.

You can put THE DATABASE to work immediately. And as your Spectrum system grows, THE DATABASE will grow too, with low-cost MiCROL add-ons for Microdrives and full-size printers available soon.

**AVAILABLE NOW!  
ONLY £9.95**

Find out for yourself how THE DATABASE puts real computing power at your fingertips.

Send for THE DATABASE today, and we'll also keep you posted with details of further important MiCROL products for your 48K Spectrum. And THE DATABASE comes with MiCROL's 14-day money-back Guarantee.

**We're tired of telling how good our game is..... let our customers tell you**

I received F.M. about 10 days ago, and have played about 23 hours so far — addictive is the operative word. —  
D. BLAIR, FIFE

I think your game is fabulous since starting with Port Vale in the 4th Division, being promoted, winning the F.A. Cup, and being promoted again to the 2nd Division.—  
C. DICKENSON, CANTERBURY

I recently bought your F.M. program and was very pleased indeed. I found it very good value for money and played it all day the day it arrived — I own a ZX81 which is now only used for F.M.—  
Yours addicted, M. FRAMPTON, CANVEY ISLAND

I felt that I had to write and congratulate you on your program F.M. I found the game very compelling and exciting, really just like the real thing — keep up the good work and standard.—  
N. LAWRENCE, FULHAM

ORIGINALS CAN BE SEEN ON REQUEST

## ZX SPECTRUM HARDWARE

### 24 line programmable Input/Output Port

This new port has been designed exclusively for the ZX Spectrum and utilises MOS technology to minimise bus loading. The main features are:

- 3 x 8 bit ports
- Port mapped using IN and OUT commands
- 3 basic modes of operation
- Direct Bit Set/Reset capability
- Outputs capable of sourcing 1mA at 1.5 volts
- Access via 3 x 16 pin DIL sockets and 28 way edge connector

The port is available fully built together with a set of detailed instructions and suggested control applications. The port can either be used with our new Motherboard thus allowing a further card to be used, or with a stackable connector. Either way, it means that Micro-Drives, Printers etc. will run happily with the port.

ZX Spectrum PPI Port ..... £16.50  
ZX 2 Slot Motherboard ..... £16.95  
ZX Stackable Connector ..... £5.50

The prices are inclusive of VAT but postage must be added at 70 pence for a single item (100 pence for 2 or more items).

Please note that we shall continue to support the ZX81 and that we also offer a 16 bit port for the 81 based on a Z80A PIO at £15.50 inc.

**KEMPSTON ELECTRONICS**  
60 Adamson Court, Hillgrounds Road,  
Kempston, Beds MK42 8QZ

## ZX81 Klik-Keyboard

This is a full, forty key, moving keyboard which fits into the recess left after peeling off the existing 'touch-sensitive' keypad. Consider the following advantages:

- Positive feedback from keys
- Fits onto the ZX81
- No trailing wires
- No special case needed
- Elegant design with two colour legends

The fully built keyboard requires *absolutely no soldering* since two flexible connectors plug into the ZX81 sockets. Alternatively, the keyboard is available as an easy to build kit at a considerable saving. Other ZX81 products available include a two-tone keyboard bleeper (fits inside the case) at £8.95 built, and a Repeat key kit at £3.95. Now available with 41 keys, the extra key can be used to give a repeat or reset facility £26.50 (built) £23.00 (kit).
